NUMBER 8

Bloodmobile Fails To Reach 200 For First Time Since 1955

The semi-annual visit to plantsite of the Huntington Regional Bloodmobile, held last week, failed to meet the desired 10 percent of the total number of employees. Employees donated 189 pints of blood. The total amount given since the GAT Blood Bank was established in October, 1953, is 3,106 pints.

Seventy-nine employees were donors on January 11, and 110 employees gave blood on January 12. Cancellations of bloodmobile appointments were more numerous than usual due to the wave of colds and respiratory infections that seem to be prevalent in the area. Seventy-three employees were unscheduled walk-in donors.

Virgil Holsinger, stores department, was the 3,000th donor to give blood. His donation also qualified him for membership in the gallon club. Robert Craycraft, SS accounting department, and Ralph Leach, paint shop department, received pins signifying membership in the two-gallon club. Other gallon club members were: William Smith, safety department; Charles Horner, receiving and shipping department; Charles Trivisonno, chemical analysis department; Donald Woodruff, motor pool department; and Carl Wheelersburg, OVEC.

Donations of blood by a number equal to 10 percent of the total number of employees makes it possible to have sufficient blood available in time of need to cover all Goodyear employees, their immediate families, the employee's father and moth-

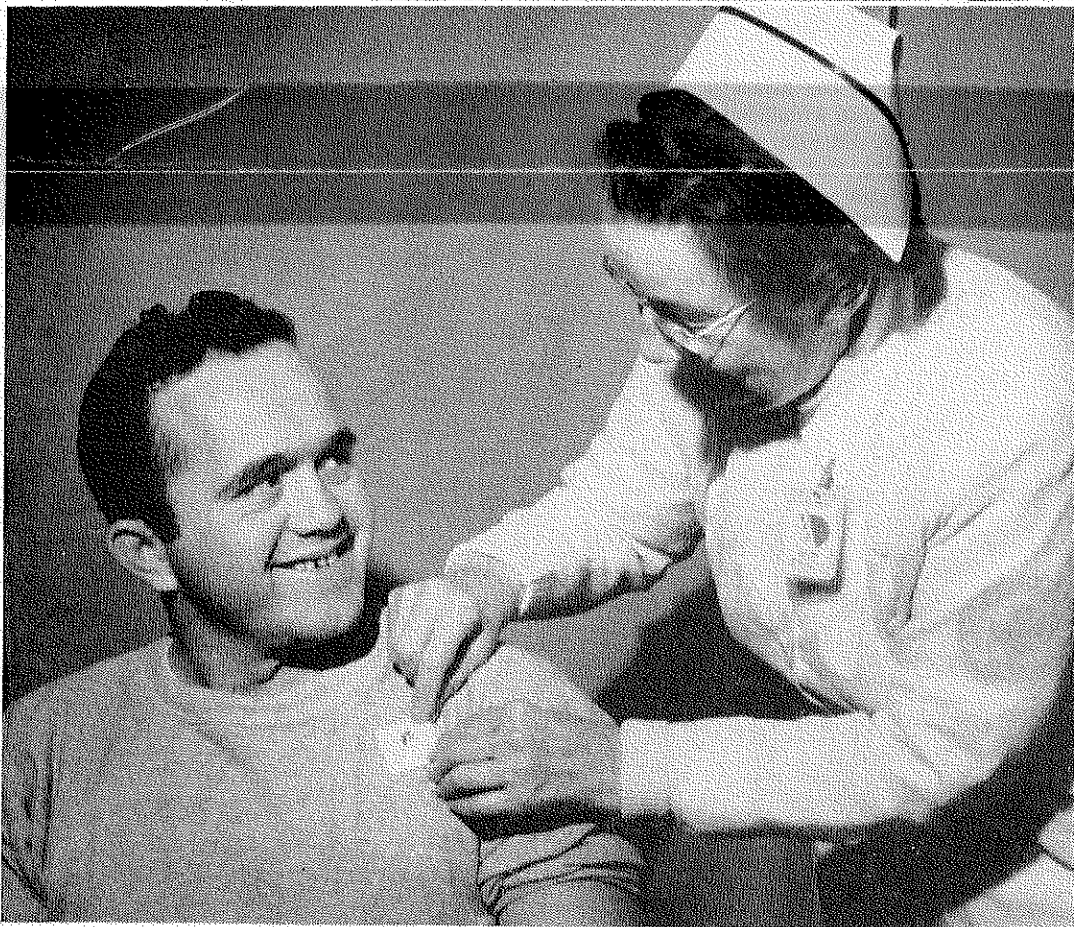

er, father and mother-in-law. It is estimated that the Blood Bank helps to protect the lives of 20,000 people.

Employees of Goodyear Atomic Corporation are urged to maintain what has been an outstanding record of blood donation to the GAT Blood Bank which is part of the National American Red Cross Blood Program.

It is hoped that none of us will ever have to call upon the Blood Bank. However, when blood is required it is often needed in a hurry. You can help to maintain the Blood Bank at a satisfactory level by donating when you are scheduled.

PIKE COUNTY VOLUNTEERS. Pictured above are ladies from the Pike County Chapter, American Red Cross, who assist when the Huntington Regional Bloodmobile visits plantsite. Front left to right: Mrs. E. E. Rhodifer, Mrs. Elmer Shoemaker, Mrs. Victor Dixon, and Mrs. Charles Givens. Second row from left: Mrs. Lamar Hammerstein, Mrs. Herman Davis, Mrs. Harry Patterson, Mrs. Robert M. Andre, Mrs. Robert C. Murray, and Mrs. J. H. Hamilton. Back row from left: Mrs. R. F. Henry, Mrs. Robert C. Netherton, Mrs. Henry Steinhauer, Mrs. Leonard Wise, Mrs. Omer Davis, Mrs. Richard Arnett, Mrs. Robert C. Vallery and Mrs. Loren Jameson.

NUMBER 3000. Virgil Holsinger, stores department, is all smiles as Mrs. Omer Davis, presents him his gallon club pin. Virgil was the three-thousandth donor to make a contribution to the GAT Blood Bank since the program began in 1953.

It's That Time Again

The District Office of the Internal Revenue Service, Columbus, Ohio, has established a "Taxpayer's Information Unit" to assist in filing income tax returns.

All communications should be directed to Mr. Homer C. Wilson, Supervisor, Taxpayer Information Unit, Bureau of Internal Revenue, Columbus 15, Ohio.

Beginning January 30, the Internal Revenue Bureau will conduct a series of five successive informative programs each Saturday afternoon at 1:30 p. m., over Channel 10, Columbus. The program will be a question and answer period of those questions most frequently asked of taxpayers.

PLANTSITE COURSES EQUAL TO THOSE OF CAMPUS

Since their inception in 1945, Ohio University branches have been growing not only in enrollment but in relative academic importance to the overall University program.

An Ohio University student attending classes in Lancaster, Zanesville, Portsmouth, Martins Ferry, Chillicothe or Ironton receives on-campus credit just as if he were in

Athens. The same is true for two "sub branches" at Lockbourne Air Force Base in Columbus and for plantsite courses taught at Goodyear Atomic Corporation.

The students can complete two years of work in commerce, arts and sciences and education, and one year in engineering and fine arts at a branch.

Branch students attend Ohio University football games without charge. They are invited to take part in other social events on the campus. They are eligible for scholarships and for membership in honor societies.

In short, there is no division between branch student and campus

(Continued on page 2.)

Industry Increases Aid To Education

Despite the fact that profits were off in 1958, U. S. business gave about 23 per cent more to higher education than it did in 1956. The Council for Financial Aid to Education, Inc., which reported this interesting fact after its latest survey of corporations, also notes that eight of the companies in its sample made contributions despite operating losses. Some other highlights of the survey are as follows.

(Continued on page 4)

You Can Speak And Act In National Affairs

YOUR VOICE IN WASHINGTON

So you'd like to go to Washington some day and make some laws yourself?

Chances are slim for this dream to come true for very many of us, yet you can still help make your laws, take advantage of services and privileges offered by the federal government, and keep a finger in national affairs.

The secret, of course, is making more effective use of your congressmen . . . both the representative you select from your own district and the senators you elect from your state.

While congressmen are among the world's busiest men in national and international affairs, they are never too busy to listen to your reasonable requests and . . . within reason . . . to help you whenever they can. Usually your best contact for results is your district representative in Congress, for he generally is in closer touch with the current situation in your immediate area.

How do you go about making more effective use of your congressman?

Initially, of course, you should get to know him. Not personally, perhaps, but know something about his background, interests, and abilities, so you can feel a closer personal acquaintanceship with him. Through the Congressional Directory, you can find out most of these facts about him. The Directory is available at your public library.

It's also well to know what he thinks about current matters you may be writing to him about. For some of his previous or current thinking, you can find his views generally expressed in the Congressional Record, the day by day journal of proceedings in both Houses. Or more than likely, if he's made a speech or written an article on his views, you can get a copy simply by asking him.

If you are in doubt about his stand on any issue, you can always query him by mail. Such mail, expressing your own views, helps him too. It keeps him in touch with public opinion at home, and he needs to know this if he is truly to represent the general interests of his voters.

Of course, his main job is to legislate in the national interest . . . in the interest of ALL the people of the country, including you. If you have any matter for legislative consideration, such as a bill to benefit your community, he is generally eager to help you, for such tangible fruits of government help him win greater voter confidence.

If you can gain group support for a bill in your own district, you add to your own working effectiveness, since a group voice speaks louder than a single one.

It is well to know, also, what committees and sub-committees in Congress he is serving on. Knowing this means he may be of greater help and influence in certain areas in which he is well acquainted than in others lesser known to him. In any case, he will be able to transmit your request

to the proper group.

If your congressman has an office back home, visit the person who runs it during the congressman's time in Washington. Many times this office manager can help answer your questions directly.

Besides strictly legislative matters, your congressman can help you generally in these areas:

Help you with matters dealing with social security, immigration, visas, or veterans' rights and benefits.

Help get an appointment to Annapolis, West Point, or the Air Force Academy.

Direct you where to go for disaster relief, how to get information on various federal projects and activities, and how to apply for a government loan. He has many brochures available for you at cost.

Help expedite settlement of government claims.

Naturally you should hold your requests to a minimum since he serves 125,000 persons in your district. But no question or problem facing you in your relationship with your federal government is beyond his interest and attention. Part of his staff regularly devotes much of its time to answering such requests.

Despite the fact that our nation is growing by more than a million voices a year, there is still room for your voice to be heard. And as you express yourself to your representative, your voice will be heard and echoed in Washington in your own government.

HOW TO WRITE TO A CONGRESSMAN

When you write to your congressman, whether you are suggesting legislation or making a request, keep your letter brief, and be specific.

Instead of merely signing a petition or a printed form letter, use your own stationery. Take time to give your own reasons for wanting or not wanting a piece of legislation. Your congressman wants to know what YOU think.

When writing, it is proper to address the letter to your representative in this form:

The Hon. (name)
House of Representatives
Washington 25, D. C.

Your salutation in the letter may read:

Dear Mr. (name) or, Dear Mr. Representative.

PLANTSITE COURSES

(Continued from page 1)

student. As Dean Albert C. Gubitz, a frequent plantsite visitor, says, "The only difference is location."

This semester there are 2,634 Ohio University students in the six branch colleges and two sub-branches. They have the same standards, the same courses, the same instruction and the same future as they would have if they were on campus.

Employees receiving five-year pins between January 15, and February 1, are as follows:

- | | |
|-------------------|-------------------|
| D. L. Clark | A. D. Smith |
| J. C. Franklin | E. E. Brooks |
| W. H. Hedrick | H. S. Carico |
| E. A. Montavon | J. Bower |
| H. C. Newman, Jr. | R. A. Faris |
| A. H. Stewart | K. L. Ritchie |
| K. E. Beu | A. H. Stewart |
| C. Campbell | J. A. Ray, Jr. |
| L. I. Spainhower | A. Wilamowski |
| J. E. Belford | D. M. Johnston |
| B. L. Graham | C. C. Caulley |
| M. H. Knauff | W. L. Kincaid |
| R. Maroney | J. A. Rouse |
| W. B. McDonie | K. R. Gunter |
| W. L. Slusher | R. L. Ice |
| N. M. Wooten | W. R. Murphy, Jr. |
| W. Walter | C. E. Snyder |
| | W. L. Kyle, Jr. |

January Safety Slogan Winners

The two January Safety Slogan Contest winners are R. R. Garlits, laboratory services department, and M. V. Gill, police department.

Mr. Garlits submitted the following slogan:

"Don't let your insurance policy replace your safety policy"

R. R. Garlits M. V. Gill

Mr. Gill, the second winner for the month, presented this slogan:

"To work safely is your best New Year's resolution"

During the period November 22, through December 21, fifty-five slogans were submitted and entered in the January contest.

Wisor Will Present Paper In Boston

H. H. Wisor, electrical maintenance department, is the author of a paper entitled, "Preventive Maintenance and Testing of 345-KV Oil Circuit Breakers."

He will present the paper in conjunction with a panel-type discussion on circuit breakers at the Twenty-Seventh Annual Conference of Doble Clients, January 25-29, in Boston, Massachusetts. The Doble Engineering Company sponsors the annual meeting.

Goodyear Atomic Corporation is a client of the Doble Company. Included among the clients are most of the country's electrical utilities, scores of larger industries, two major railroads, United States Steel, the United States Corps of Engineers, General Electric, Westinghouse, du Pont, and the Aluminum Companies of the United States and Canada.

Training Department Prepares For Second Semester Courses

Employees desiring to enroll in plant site courses offered by Ohio University are requested by the training department to make their wishes known as soon as possible. The second semester will start during the week of February 7.

Employees must satisfy course prerequisites to participate in any plant site course.

GAT employees enrolling in one of the Ohio University Branches, who qualify for educational assistance, are requested to submit an A-1170 (application for educational assistance) to the training department by February 19, 1960.

Sufficient interest must be shown in the suggested courses listed below before the course will be scheduled to be taught.

Mathematics 3 — Intermediate Algebra (3 credit hours). A review of high school algebra and some simple topics from college algebra. Prerequisite, Math 2, Plane Geometry, or one year each of high school algebra and high school plane geometry.

Mathematics 304 — Advanced Calculus (3 semester hours). A critical treatment of certain topics in calculus. Limits, continuity, differentiation of functions of one and several variables, series, and definite and multiple integrals, line integrals. Prerequisite, Math 102, Analytical Geometry and Calculus III.

Mathematics 316 — Advanced Applied Mathematics II (3 semester hours). An introductory treatment of matrices, vector analysis, complex variables, and Laplace transforms. Prerequisite, Math 315, Advanced Applied Mathematics I.

Chemistry 434 — Advanced In-

organic Chemistry (3 semester hours). Modern theoretical inorganic chemistry. Prerequisite, Chemistry 333.

Goodyear Treatise Presented To GT&R

Original Charles Goodyear Treatise, "Gum Elastic," was presented to the Goodyear Tire & Rubber Company by descendant of Goodyear's lawyer, Etienne Blanc of Paris. The attorney's grandson, upon hearing that Goodyear Tire & Rubber Company plans to build a tire plant at Amiens, brought the book to the Paris Office of Goodyear-France and requested it be delivered to E. J. Thomas, board chairman. Six copies of the book by the father of the rubber industry were printed, and this is one of the only two which were bound. Handwritten letter from Charles Goodyear to attorney Blanc was inserted inside cover, and is dated December 13, 1853.

Oyler Elected President

L. T. Oyler, supervisor of the safety department, has been elected President of the South Central Ohio Chapter of the Ohio Credit Union League. He was elected at a regular chapter meeting held at the Veterans Hospital in Chillicothe. Twenty-five representatives from eleven Credit Unions attended the meeting.

Now a doctor says ulcers do not necessarily indicate the stress and strain of high-pressure jobs, but if the ulcer isn't a success symbol, what good is it?

A LOOK TO THE FUTURE

Democracy's way of life is on trial in our homes, in our schools, in our communities, in all free nations. Democracy is on trial today in the near and far places of the earth.

We have for use in these days of trial all the strength and the promise that democracy has given us from earlier days. We know how to help the individual to help himself; to work with others in identifying common needs and in finding ways of meeting these needs; to share in the making of decisions by which he will be affected.

We are told that before the next 10 years is over, that we will have refrigerators, air conditioners, dehumidifiers and freezers without motors or compressors. Electroluminescent wall panels will provide light and also warm and cool the house. Dishwashers will be ultrasonic, airwaves will cleanse and sterilize. Houses will have control centers for heating, cooling, and filtering the air, adjusting sunshades and draperies, deicing sidewalks and even sprinkling the lawn. Typewriters will be available that respond to the spoken word; computing machines that read, respond to verbal commands, translates, even "think" for themselves; push button telephones, TV sets that record programs for showing later; and eating establishments where orders are placed and served electronically.

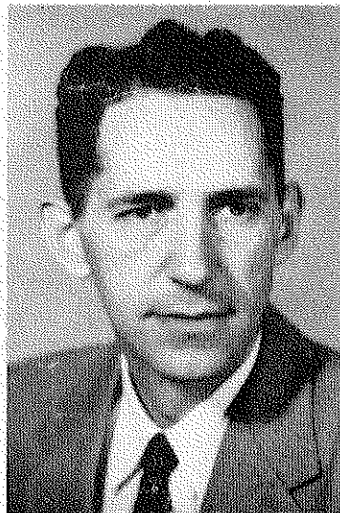

To live in this kind of world . . . and this is the only kind of world in which we have the option of living . . . calls for knowing a great many things which we did not know yesterday, could not know, and had no need to know.

These, too, must now be learned if we are to compete successfully in a democratic society.

However we refer to the future . . . whether it be the "fabulous sixties" or the "exiting sixties" . . . it will be what we strive to make it.

Dr. Martin To Be Speaker For ACS

The Central Ohio Valley Section of the American Chemical Society has scheduled the next regular monthly meeting February 3, at the Elks City Club, Portsmouth.

Dr. Richard B. Martin

Dr. Richard B. Martin, Deputy Director, Research & Development Division, Oak Ridge Operations, U. S. Atomic Energy Commission, will be the principal speaker. Dr. Martin will speak on "Chemical Pro-

cessing of Spent Reactor Fuels." He is expected to discuss current technology, current problems in research and development and processing of power reactor fuels.

F. A. Koehler, special analysis department, and a member of the reception committee for the ACS, is in charge of arrangements for this meeting. Employees desiring to attend may make reservations with Mr. Koehler by telephoning extension 2524. Deadline for reservations is February 1.

Mr. and Mrs. James Ward, (materials sampling and testing department), daughter, Julie Ann.

Mr. and Mrs. Robert H. Holland, (technical information department), son, Thomas Michael.

Mr. and Mrs. Thomas Haley, (chemical analysis department), daughter, Karen Leigh.

CAUSE AND EFFECT. Pictured is the aftermath of C. W. Mock's safety glasses after being struck by the bolt broken loose from a cooler.

WISE OWL CLUB

C. W. Mock, cascade maintenance department, is the most recent GAT employee to be enrolled in the Wise Owl Club of America.

The Wise Owl Club is sponsored by the National Society for the Prevention of Blindness and awards membership to employees whose eyesight is preserved by the wearing of eye protection.

C. W. Mock

During an assigned job, Mr. Mock was removing struts which are in a strained position from a cooler. He used a socket wrench to loosen a bolt, but did not remove it completely because he loosens all bolts before removing any of them. After loosening the first bolt, he began to loosen the second which was located approximately two feet distant. As he loosened the second, the strain on the first one threw it with powerful impact. The bolt hit Mr. Mock's safety glasses breaking the rim and knocking out the left lens.

The wise use of eye protection prevented this employee from serious injury to or loss of his left eye.

Mr. Mock's Wise Owl membership certificate, lapel pin and shop badge were presented by Ray Simpkins, weld shop foreman, with members of the weld shop in attendance.

Goodyear Atomic's Wise Owl Club Membership Committee includes A. E. Creech, special and mechanical shops department, as chairman; J. W. Walter, machine shop; and L. M. Donini, utilities maintenance department.

Mr. and Mrs. Charles Adams, (cascade maintenance department), daughter, Beth Ann.

Mr. and Mrs. Norman Potts, (process area 5), son, Brent Bennett. Mrs. Potts (Virginia) was formerly in the planning department.

Mr. and Mrs. Charles Davena, (electrical maintenance department), son, Joseph Michael.

Mr. and Mrs. Harry Parmeter, (cascade maintenance department), daughter, Vickie L.

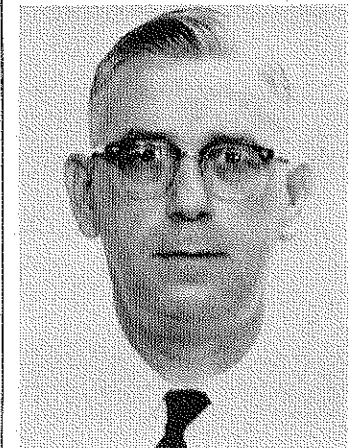

Mr. and Mrs. James Murray, (fire department), son, James Logan, Jr.

Mrs. Murray (Helen) is a former employee of GAT in the janitor services department.

Clibourn Receives 15-Year Service Pin

Robert M. Clibourn, operations analysis department, was presented his 15-year service pin January 15, by Dr. Frank Woltz, department supervisor, in the presence of the engineering development subdivision.

Clibourn began his career with Goodyear January 15, 1945, as an employee of the Synthetic Rubber Corporation, located in Houston, Texas. He remained with this organization until 1951, when he was

Robert M. Clibourn

assigned temporarily by Goodyear to the Office of Synthetic Rubber, Research and Development Division, applied Development Section, at Washington, D. C. He transferred to Goodyear Atomic Corporation March 15, 1955.

He received a Bachelor of Science degree from Arkansas State Teachers College, and has attended the University of Arkansas, and George Peabody College. He holds the degree of Master of Letters in Chemical Engineering from the University of Houston.

He is a member of the American Chemical Society, Waverly Service Club, and a 32° Mason. He is an active Elder in the First Presbyterian Church of Waverly.

Mr. and Mrs. (Hazel) Clibourn and daughter, Sharon Elizabeth, are residents of Waverly.

Getting To Know The Secretary

In Germany, where titles are a serious business, this is no small thing. And it requires no small effort from the secretary.

Some of the things she has to do to win approval:

1. pass a rigorous examination at the end of a four-month course taken after working hours
2. answer a long questionnaire on office organization
3. type for ten minutes without a mistake, averaging at least 300 letters a minute
4. have a minimum shorthand speed of 180 syllables a minute
5. prepare a transcript of a business meeting
6. arrange an intricate air trip for the boss
7. show some insight into industrial psychology

So far, only nine secretaries have finished the first course and qualified for a place with the elite. But more are sure to follow. After all, in a country where a man may be addressed as "Herr Professor, Doctor Doctor," the possibilities are endless.

The Certified Professional Secretary is comparable to the examination outlined above. Eight secretaries at GAT are members of the National Secretaries Association.

Goodyear Atomic secretaries who are members of the NSA are: Judy Ray, personnel services subdivision; Geni Gundlah, safety and fire protection subdivision; Jan Forsyth, general manager's office; Carlene Mowrey, technical division; JoAnn Fraley, safety department; Barbara MacDonell, safety department; Ruth Shannon, operations analysis department; and Mary A. Mills, process engineering department.

Although the NSA sponsors the CPS examination, membership is not required.

GAT secretaries who have applied to take the CPS examination are: Mildred Taylor, accounting and budget department; Charlotte Webb, industrial relations division; Mary A. Mills, process engineering department; Geni Gundlah, safety and fire protection subdivision; Barbara MacDonell, safety department; Eleanor Harris, works laboratory subdivision; Meredith Evans, materials and service subdivision; and Lois Elswick, development laboratory subdivision.

Geni Gundlah is a member of the education committee of the NSA for the State of Ohio.

Teen-agers are a threat, middle-agers are dull, and old-agers are a burden. Can't somebody think up an age that's worth something?

Students May Qualify For Scholarship

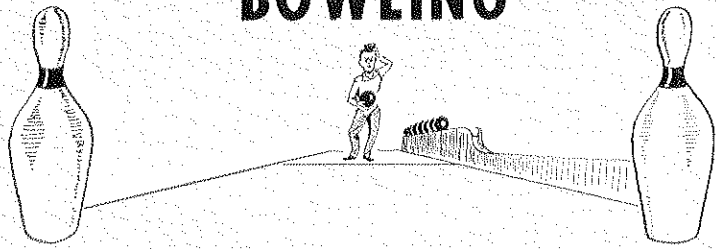

The Central Ohio Valley Section of the American Chemical Society will award a certificate to the outstanding chemistry student in each high school in Scioto, Pike, Jackson, and Lawrence Counties this school year.

To qualify for the award the student must be enrolled in chemistry during the current school year; must be in the upper third of the class; have an above average interest in chemistry; and be able to get along with and work with others.

The deadline for 1960 is February 15. This date was selected so that the certificates could be given out at the ACS meeting March 2, at Marshall College, Huntington, West Virginia. The speaker will be Dr. R. C. Swann, of Redstone Arsenal. The title of his address will be "Rockets and Rocket Propellants."

Norman F. Reiter, special analysis department, is Chairman of the High School Student Awards Committee. George Hedricks, chemical analysis department, is Area Chairman for Ohio. The Area includes Ohio, Kentucky, and West Virginia.

BOWLING

Goodyear Atomic Bowling Tournaments started off with a bang last Saturday when one-hundred and eight teams completed competition in the Third Annual Mixed Bowling Outing. The affair, which was the largest since its beginning in 1958, occupied all 16 alleys at the Sunset Lanes in Portsmouth. Twelve couples bowled January 9.

Art Lewis, utilities operations department, and Janet Eckhart, credit union, were the winners of this year's outing with a combined score of 1134. Bob Adams, engineering and maintenance services, and Norma Copen, communications department, had 1133 good for second place. Third place winners were Harold Rouff, process engineering department, and Winnie Chase, wife of Peck Chase, cascade coordination, with 1119. All three winners earned the right to attend the Annual Banquet of Champions next fall.

The recreation department has announced that trophies will be awarded again this year to the high average man and woman bowler in GAT league competition. In case of ties the total number of pins will determine the winner.

On hand for this year's event were the 1959 winners . . . Mr. and Mrs. Bill Stringham, who finished sixth. Following the outing forty-three persons attended a dinner at Lake Margaret.

Bowling tournaments will occupy a very prominent place in the employee activity program through March 26. Beginning next Saturday, January 23, the men's team event will be rolled at Weiss Recreation Center, Waverly, and will continue January 30, and February 6. Sixty-six teams will compete in the men's tournament.

On February 13, the women's team tournament will be rolled at the Jolly Lanes, Jackson, February 20, 27, and March 5, tournament action will resume at the 20th Century Lanes, Chillicothe. One-hundred and thirteen teams will roll off for the men's doubles championship. Two-hundred and twenty-six men will bowl for the men's singles crown.

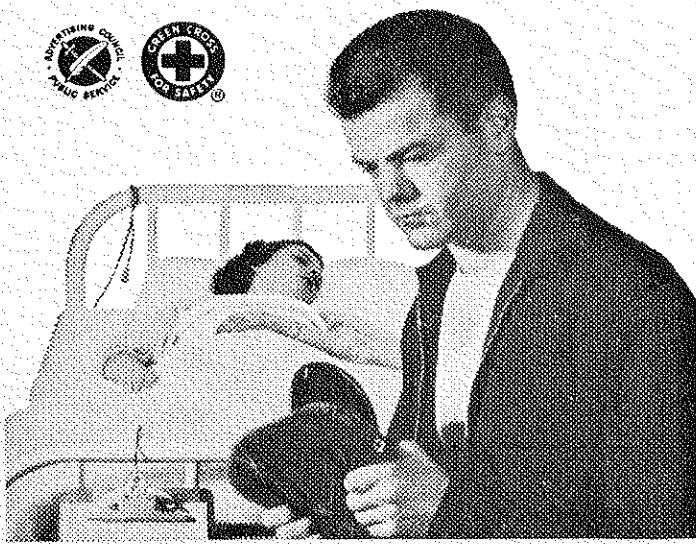

Tournament bowling shifts back to Waverly on March 12, for the women's doubles and singles championship.

The men's scratch singles tournament will be bowled in Jackson, March 19. Scores rolled in this tournament will be counted along with the scratch scores of the team, doubles and singles events in determining the company champion.

The last company bowling tournament of the season scheduled for March 26, in Portsmouth, is the women's scratch singles for the women's company championship.

"I was fighting mad . . ."

Too often the innocent suffer when temper's at the wheel! When another driver burns you up—cool off! Losing your head can cost you control of your car, make an innocent party a victim of your spite. Last year traffic accidents brought death to 37,000 people, painful injuries to hundreds of thousands more. Too many were innocent victims of good drivers who momentarily let emotion blindfold judgment. When *all* your mind's on driving, you'll be a safer driver.

Classifieds

All Wingfoot Clan ads must be typed or printed, and contain a "blind" address or telephone number to which initial contact can be made. The ad must be signed in ink and carry the employee's department number, badge number, and plant-site telephone number. This service is for employees who have items to buy, sell, or trade. No commercial ads can be accepted.

FOR SALE

Kitchen Wall Hung Cabinets. One 84" long, standard height and depth; one 36" long, (for over refrigerator). \$35.

Norge Electric Range, late model, cost \$279, will sell for \$50.

One and three-quarters inch solid exterior door, complete with hardware, 3' x 6' 8", \$10.

Screen Door, 3' x 6' 8", \$2.

Tension type aluminum screens, 3 different sizes, total of 18.

Telephone Jackson 983-L or inquire at 200 Florence Avenue.

8 1/2 cu. ft. Kelvinator Refrigerator. Good condition. Telephone Piketon 3941 after 4:30 p. m.

Two-wheel trailer, 4' x 8' marine plywood bed, 5.70 x 15 WW tires. Heavy duty hitch, \$50. Telephone Jackson GL 2052.

B Flat Clarinet. One Girl's Bicycle, "20". Telephone: Portsmouth ELMwood 4-1671.

Auffenhauser Manifold . . . for triple carburetor set with 3 '58 Rochester 2-barrel carburetors and ball-bearing linkage. Telephone Portsmouth ELMwood 3-3648.

Employees Appointed To School Boards

Willard Skaggs, cascade maintenance department, has been appointed to the newly formed Scioto Valley School District Board of Education.

Mr. Skaggs was a member-elect to the Piketon-Scioto Board of Education. The new Scioto Valley District encompasses 134 square miles and includes the present Central and Piketon-Scioto school districts.

William F. Kyle, Jr., feed plant department, was recently appointed to the newly organized Eastern School District Board of Education.

Mr. Kyle had been elected last November to the Stockdale Board of Education. The new Eastern District will consolidate the present schools of Beaver, Stockdale, and the Union Township elementary school.

First Aid Instruction

John Ostergren, training department, demonstrated the mouth to mouth method of resuscitation to the Liberty Local School Parent-Teachers Association, January 12. Glenn McConnell, electrical maintenance department, is vice-president of the Liberty Local School PTA, and program chairman for the month of January.

Mr. Ostergren is beginning an American Red Cross Standard First Aid course in the Methodist Church, Waverly, January 21. The course is being sponsored by the Boy Scouts of America, Troop 76, and is offered for the adult Scout leaders and parents.

The Dividends of Safety Can't Be Measured, But You are Sure To Receive More Than You Spend.

GAT Women's Club Of Pike County

The Pike County Goodyear Women's Club invites all wives, mothers, daughters, and sisters of Goodyear employees to attend the next regular scheduled meeting February 5, in the Lake White Club, Waverly.

The Club was first formed in 1955

and conduct regular meetings the first Friday of each month. Although the Club is primarily a social one, the women select at least two charities each year to lend financial support.

Officers for this year are: Mrs. R. L. Smith, president; Mrs. P. L. Slaughter, vice-president; Mrs. J. G. Crawford, treasurer; and Mrs. Charles Dinsmore, secretary.

Hostesses for the next regular meeting will be Mrs. J. J. Surack, chairman, Mrs. R. L. Chandler and Mrs. H. L. Foster.

Reservations may be made by calling one of the following: Mrs. J. C. Franklin, 547J; or Mrs. J. M. Thom, 814W, in Waverly.

Interested In Trip To Hawaii?

Goodyear Atomic employees and members of their families and friends have an opportunity to enjoy a vacation in Hawaii. The Goodyear Employees' Activities Committee in Akron have arranged for a delightful 17-day trip by air departing from the Akron-Canton Airport on Friday, March 25, returning Sunday, April 10.

The tour includes a wonderful stay in Honolulu at one of the luxurious Waikiki Beach hotels plus visiting San Francisco, Los Angeles, Hollywood and Las Vegas. Brochures are available in the recreation department.

A reservation fee of \$50 must be sent to the Goodyear Tire & Rubber Company immediately with the balance due on or before February 15, 1960. The entire tour costs \$559 each plus \$16.10 U. S. transportation tax. GAT employees interested in making this trip should contact the recreation department, second floor, X-100 building.

AID TO EDUCATION

(Continued from page 1)

The most striking increase in educational contributions was shown by banks (210 per cent more than in 1956).

The number giving \$100,000 or more has almost doubled.

Dr. Frank H. Sparks, president of the council, concludes from these figures that "the most alert business management in the world regards the financial support of higher education as the first importance."

Courtesy is the outward show of a truly great personality whether it is possessed by the janitor or the top executive of the company. Within the reach of all is this great characteristic, which, if only practiced, would proclaim the principle of the Great Teacher who taught kindness to a world that crucified Him.
