## GOODYEAR ATOMIC CORPORATION Portsmouth Area Gaseous Diffusion Plant

VOLUME VIII

PIKE COUNTY, OHIO, WEDNESDAY, OCTOBER 19, 1960

NUMBER 2

### OCAW Scholarship Applications Now Being Considered

J. K. Stevenson, President, Local 10-689, OCAW, has advised the *Clan* that applications are now being received for the 1961 Scholarship Program offered by the Oil, Chemical and Atomic Workers International Union.

The four year OCAW Scholarships, worth \$2,000, are available to sons and daughters of OCAW Union members. Application forms may be obtained by calling at the Union Office, Sargents, Ohio or by writing P. O. Box 667, Piketon, Ohio.

One scholarship is given in each of four geographic regions based on competitive examinations and a final judging by a panel of impartial educators. The OCAW Scholarship is renewable each year for four years provided the student maintains a satisfactory scholastic average.

Students beginning their senior year of high school should make application now in order to be eligible for a scholarship for the collegiate year beginning in the fall of 1961.

Each student competes only with

### EMPLOYEES RESPOND TO FUND RAISING MONEY USED BY LOCAL AREA TO CARRY OUT THEIR ANNUAL PROGRAM

A DAILY ROUTINE during the All-In-One Campaign Week October 3-7. Reporting the results of Utilities Maintenance Department are Clarence Massie (left) and Carl Alexander (right). These two were typical of the joint Labor-Management teams handling solicitations throughout the plant. The 730 Subdivision had better than 90% employee participation. Seated at left is J. K. Stevenson, Co-chairman for the 1961 All-In-One Campaign. With back to camera is Mary Burks, Community Relations, who recorded the day-to-day progress of the Campaign.

in his geographic region and must take a competitive examination administered by the College Entrance Examination Board. Winners will be judged on the basis of their Secondary School records, personal qual-

ifications and the results of their Scholastic Aptitude Tests.

Complete rules and regulations and procedures are available in pamphlet form for each youngster requesting an application.

The final results of GAT's joint labor-management United Fund effort show that better than ninety-three percent of the employees contributed during All-In-One Week. Total employee cash contributions and pledges to the Campaign are \$20,257.35. The Company Gift was \$10,800 to bring the sum to a grand total of \$31,057.35. Co-chairmen J. K. Stevenson, President of Local 10-689, OCAW, and P. F. Bliss, Community Relations Department, reported that sixty-nine departments out of one-hundred and eight had 100% employee participation.

G. H. Reynolds, General Manager, voiced his appreciation to the many solicitors who gave their whole-hearted support to the Campaign.

The total of \$31,057.35 was distributed last Monday to the representatives of the United Fund agencies in the four counties of Scioto, Pike, Ross, and Jackson. The division of the Company Gift is determined by the percent of the total employee contribution as reflected in each of the four counties. The Scioto County Community Chest will again cooperate by forwarding pledges to counties outside the four-county area as designated by the employee.

Following is the percent participation by county with the combined employee contribution and Corporate Gift going to the representative United Funds:

- Jackson County — 11.4%
- Pike County — 30.9%
- Ross County — 19.1%
- Scioto County — 38.6%

The organization which made it possible for the employees to make the 1961 All-In-One Campaign a success was based upon a solicitation team of Union and Company representatives contacting the hourly employees at plantsite while salaried employees were contacted by their supervision. The cash contributions and proportion of the Company Gift, as indicated above, were presented to representatives from the various United Funds at a meeting last Monday attended by the Co-chairmen; G. H. Reynolds, General Manager; D. W. Doner, Manager, Industrial Relations Division; and W. L. Sams, Manager, Finance Division. Each United Fund representative spoke appreciatively of the labor-management cooperation as evidenced by the fine showing made by the employees.

The 1961 All-In-One Campaign is the seventh for the employees of Goodyear Atomic Corporation. Six of those years employee participation has exceeded 90%.

Enclosed with this issue of the *Clan* is a "Medical Expense Diary." This diary will help you keep an accurate account of your family medical expenses.

The diary will help you (1) record the information necessary to file a claim for Major Medical Group Insurance Benefits; (2) medical deductions on income tax; (3) budget purposes for medical expense.

An Aetna Booklet, describing Major Medical insurance coverage will be distributed to participating employees at a later date.

### GAT MALE CHORUS

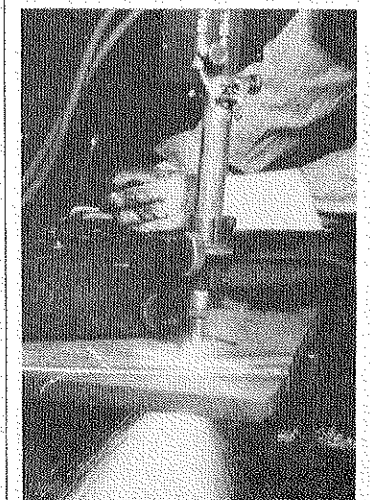

The GAT Male Chorus has started rehearsals for the coming year. The first rehearsal was held September 12, and will continue each Tuesday beginning at 4:15 p. m.

New officers for the 1960-61 season are: R. A. Hook, President, chemical analysis department; S. A. Kobut, Secretary, plant engineering; W. L. Brown, Treasurer, chemical analysis department; and J. W. Wesner, Librarian, wage and salary standards department.

The Chorus now meets in a room adjacent to the safety department, K-100 building.

GAT employees desiring to participate in the Chorus should attend rehearsal next Tuesday, October 27.

### Buy Goodyear — Sell Goodyear

## OUR WEEKEND IN NEW YORK

BY

BETTY LILLY

PURCHASING DEPARTMENT

Last month twenty lucky people spent an enjoyable all-expense paid weekend in New York City.

This type of weekend could be labeled a cure for many ills. Those making the trip were the ten lucky winners in the 1960 Buy Goodyear — Sell Goodyear contest and included the following employees and their wives: Roger Monk, welding shop;

Elbert Bowman, welding shop; Robert Craycraft, SS accounting; Joe Carver, timekeeping and payroll; Jack Rankin, engineering & maintenance services; John Cannon, metallurgy; Cyrus Whitfield, metallurgy; Andy Lilly, special & mechanical shops; John Murrell, SS engineering; and John Hall, Sr., electrical maintenance.

We left the Minford Airport at 10:30 a. m., September 16. The weather and visibility were fine and we could see the white clouds of vapor rising from the plantsite as we winged our way northward toward Columbus. We left Columbus a short time after noon and had a very pleasant flight . . . landing at LaGuardia field about 3 p. m. At LaGuardia we were met by representatives from The Goodyear Tire & Rubber Company and Thomas Cook & Sons Travel Agency. We were transported by bus, along with the winners from Akron, to the Barbizon-Plaza Hotel on Central Park South.

(Continued on Page 2)

"To my mind, American citizens must be much more conscious of the real dangers of our times and be willing to treat the time as not peacetime . . . "How can American democracy meet the crises of our times? To my mind, Theodore Roosevelt's guidance of many years ago is still good. 'Americanism means the virtues of courage, honor, justice, truth, sincerity and hardihood — the virtues that made America.

"The things that will destroy America are prosperity-at-any-price, peace-at-any-price, safety-first instead of duty-first, the love of soft-living and the get rich-quick theory of life."

"If Americans can get together — unite behind their leaders in the crisis of today — which is a real crisis, believe me — their security is assured. If they cannot so unite if they insist on business as usual — politics as usual — then I fear for the future of this Republic, no matter how much military strength we have in being."

—American Security in the Nuclear Age, an address by Admiral Arthur W. Radford before the Cincinnati Council on World Affairs, Cincinnati, Ohio, January 30, 1959.

BETTY LILLY (right), Purchasing Department, is photographed with Shelly Winters just before leaving New York on return flight to Columbus. The photograph was taken by Betty's husband, W. A. Lilly, Special & Mechanical Shops, a winner in the 1960 Buy Goodyear-Sell Goodyear Contest.

**GENERAL MANAGER SPEAKS**

G. H. Reynolds, general manager, was guest speaker last Monday to the Middle Ohio Valley Engineer's Club in Gallipolis. His topic was "An Unclassified Description of the Gaseous Diffusion Process." Next Wednesday he will speak in his home town to students at Waverly High School on "The National Scholarship Association."

where Washington bade farewell to his officers at the time of his retirement as commander-in-chief of the Army.

Next was the trip to Pier 81 at the end of 43rd Street, where we boarded an excursion boat of the Circle Line for a cruise around the Island of Manhattan.

After returning to the hotel, we were on our own for the rest of the weekend. Saturday night was spent in various ways by the group . . . some to the theaters, some to Radio City, and other points of interest in the city.

Sunday morning was rainy and the time was spent by different ones in various ways.

Our flight was scheduled to leave at 3 p. m. It was still rainy and cloudy when who should appear at the airport to help brighten the day . . . none other than "Shelly Winters" who graciously consented to pose for the shutterbugs in our group. She was starring in a play at the Hartman, so her troupe on our flight to Columbus was an unexpected pleasure.

The sun shining on the silvery clouds beneath us made a "picturesque "snow scene" unequalled in beauty. After changing planes in Columbus, we arrived at Minford about 6:30 p. m. For an enjoyable weekend we highly recommend such a trip to New York.

ress to ready the chambers for the very important reopening of the General Assembly the following week. An air of tension seemed to prevail in anticipation of the coming session at which twenty-six heads of government, notable among which would be the controversial Khrushchev and Castro, would be present. Perhaps the atmosphere can best be described as the calm before the storm. The UN is an interesting place at any time. Delegates and personnel of all the member nations are coming and going at all times.

After the UN tour, we were taken to the financial district where we posed for group pictures on the steps of the Treasury building. None of us were invited inside, however. Following this, we were served an excellent lunch at the Fraunces Tavern on the corner of Broad & Pearl Streets. This place, being the oldest building in New York, has many historical aspects. This is the place

**WEEKEND IN NEW YORK**

(Continued from Page 1)

The afternoon was used as a sort of "get acquainted" time with other members of the Goodyear party. Friday evening we were taken to the Latin Quarter for dinner and floor show. After leaving here, we found we still had some evening left which we used to become a part of the throng to tour Times Square at night. Times Square is spectacular in itself. Here you will find people from all walks of life; the rich, the would-be rich, the middle class, the poor and the free-loaders as well as many nationalities from the four corners of the earth.

The next morning, Saturday, the Goodyear group was transported to the United Nations where we enjoyed a conducted tour of the building. Neither the General Assembly nor any of the councils were in session but preparations were in prog-

WILLIAM E. BROWNING is pictured using an automatic Oxweld cutting machine. At the time the photograph was taken he was machine cutting a part for the Machine Shop. Welding is one of the many types of occupations required to operate a gaseous diffusion plant.

**First Welder Employed By GAT Reviews Significant Changes In Method**

Seven years ago, September 21, Goodyear Atomic Corporation employed the first welder. That welder was William E. Browning. Browning, like other maintenance employees at the time, began a 14-week basic training course in the training building (now X-120).

He is assigned to the weld shop, X-720 building. He reports to Ray Simpkins, foreman, welding shop department. His job assignments may include anything from mild to alloy steels to plastics. He is a typical welder among the fourteen included in the shops. Jobs are scheduled through the maintenance and engineering services department.

How did he become interested in the welding trade? "I had a brother-in-law who was a welder," says Browning. "It was through him that I became interested in welding as a vocation." "Looking back over the years," (he began in the thirties) he went on, "I have noted many changes in this field." "I have been welding since the use of the bare electrode. In the beginning the manual arc and acetylene were the chief methods in use. Early in the forties one of the great advances in welding was the submerged arc by manual and the automatic process. Next came the perfection of the heliarc or inert gas method. This was the first great advance in the welding of non-ferrous metals. One of the first methods to incorporate speed in welding was the semi-automatic or 'squirtgun' method. Along with all these advances, procedures were developed for the welding of ceramics and plastics. These are improvements that I have noted in my experience

. . . I'm sure there are others . . . but I'm speaking from my job experience."

A native of West Virginia, Browning graduated from Barboursville High School. He attended the Lincoln Electric Company's Welding School in Cleveland, Ohio, completing the course as an apprentice welder. He later enrolled in an adult education class at Huntington (W. Va.) East Vocational High School in an advanced welder class.

The Browning family include the wife Frankie; Van, 38; Charles, 17; Roger, 15; Rebecca, 11; and Virginia, 9. Van is in the U. S. Navy serving aboard the Aircraft Carrier USS Hornet. The last letter received from him was postmarked Hong Kong, China. Charles is a freshman at Rio Grande College; Roger is a junior at Jackson High School; while Rebecca and Virginia are students at Lick Local Elementary School in Jackson. The family mailing address is RFD 4, Jackson, but "we don't live so far from the city limits that we can't see the street lights," said Browning.

Browning left GAT in October, 1956, to take employment with Goodyear Aircraft, Litchfield Park, Arizona. The move west was recommended by the family physician due to an illness in the family. He remained with Goodyear Aircraft until March, 1957. He was rehired by GAT in April, 1957.

The Browning family are members of the First Baptist Church in Jackson. Mr. Browning is a trustee of the Church and Vice-President of the Men's Brotherhood.

MOVING TIME. Last week the Receiving & Shipping Department was relocated from the X-746 Building to the southwest corner of the X-720 Building. Utilities Maintenance was responsible for the transfer of equipment. Pictured above are members of both departments as they complete the move. From left to right: O. W.

Hinkle and O. L. Gammon, Utilities Maintenance; L. T. Waller, K. L. Carter, M. C. Blaum, B. M. Haas, Supervisor, Louise Pettit, Receiving & Shipping; C. L. Mahle and C. E. Kanouse, Utilities Maintenance; V. O. Ramsey, Receiving & Shipping, and M. W. Bouts, Utilities Maintenance.

1960 - 1960 - 1960 WHO WILL IT BE ???  
YOUR VOTE WILL HELP DECIDE !!!

## BLISS TO SPEAK TO REGIONAL BOY SCOUT EXECUTIVES

On October 28, Paul F. Bliss, community relations coordinator, is to address national officers, regional officers, and council presidents of Region 4, Boy Scouts of America in Lexington, Kentucky.

Region 4 includes Ohio, West Virginia, and Kentucky. The title of his address will be "Selling The Scouting Program To The Community."

## KALMON PRESENTS GAT'S MONITORING PROGRAM

Ben Kalmon, industrial hygiene & health physics department, was the principal speaker at the fall meeting of the Southeast District of the Ohio Public Health Sanitarians Association in Lancaster, Ohio, October 5.

This group are responsible Public Health Environmental Control officials of twenty-three Southeast Ohio counties.

Mr. Kalmon's topic was "GAT's Environmental Monitoring Program."

## Cox-Spencer

R. L. Cox and Jane Ann Spencer were married October 1, 1960, in the Rectory of St. Mary's Church, Portsmouth, by the Reverend William Johnson.

Mr. Cox is in the metallurgy department.

Mr. and Mrs. R. C. Adams, (process area 6), son, Richard H.

Mr. and Mrs. A. E. Roach, (engineering & maintenance services), son, Karl Edward.

Mr. and Mrs. E. L. Evans, (process area 3), daughter, Julie Beth.

Mr. and Mrs. J. L. Davies, (process area 2), son, David Dwin.

Mr. and Mrs. W. P. Brown, (utilities maintenance), son, David.

Mr. and Mrs. A. E. Fischer, (instrument maintenance), son, Scott.

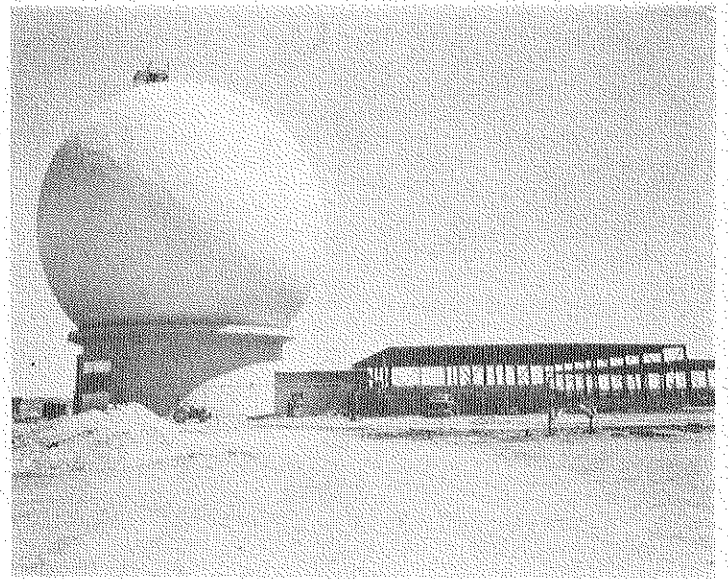

Mr. and Mrs. W. R. Dials, (electric power area), son, Douglas Ray.

Mr. and Mrs. R. T. Mayhew, (process area 6), daughter, Annette Jean.

## Anyone For Volleyball

A volleyball league has been organized in Waverly. Play began in Waverly High School October 10.

Employees who are interested should submit their name or teams to the recreation department, X-100 building.

**ZEUS COVERALL.** Imposing 110-foot diameter spherical radome, built by Goodyear Aircraft Corporation, houses research and development model of the Zeus acquisition radar installed at White Sands Missile Range, N. M. The radar is part of the Army's NIKE ZEUS anti-missile system. Containing 445 triangular fiberglass-reinforced plastic panels attached to a welded random space-frame made up of 635 curved beams, the structure stands 11 stories high and weighs 220,000 pounds. As a member of the Army-industry team headed by Bell Telephone Laboratories and Western Electric Company, Goodyear Aircraft also is producing the complete transmitting antenna structures and receiving antenna structures for the acquisition system.

## Goodyear Aircraft Gets \$2 Million Contract

A \$2 million contract for additional work on the Army's Nike Zeus anti-missile system has been issued to Goodyear Aircraft.

The contract calls for development of advanced manufacturing techniques and tooling for volume production of components GAC now is

fabricating manually in the research and development phase of the project.

Let by the prime contractor, Western Electric Co. of New York, the award brings to approximately \$40 million the value of the Zeus contracts GAC is handling for Western Electric and the Bell Telephone Laboratories at Whippany, N. J. The latter firm is directing the design and development of the system.

## Named To Office In Safety Group

Victor Holt, Jr., Executive Vice President, The Goodyear Tire & Rubber Company, has been elected Vice-chairman of the Auto Industries Highway Safety Committee.

This group, sponsored by auto and tire manufacturers, National Automobile Dealers Association and the National Tire Dealers and Retreaders Association, serves the public through the cooperative efforts of manufacturers and dealers to help provide safer and more efficient highway transportation.

New chairman of the committee is J. B. Wagstaff, Vice President, Chrysler Corp., who succeeds Charles C. Freed, Salt Lake City auto dealer.

## SILVER COMPASS CLUB

The Silver Compass Club will install 1961 officers Friday, October 21, at 7:30 p. m., in the Waverly Temple.

New officers for the coming year are C. A. Hopkins, President, janitor services department; A. G. Boggs, Vice-President, instrument maintenance department; M. G. Webb, Secretary, engineering & maintenance services department; L. L. Wise, Treasurer, process area 2; and R. A. Smith, Chaplain, special & mechanical shops department.

Members are reminded that 1961 dues may be paid at this meeting.

## IN MEMORIAM

Clarence L. Staten, 68, died September 29, 1960, enroute to Mercy Hospital, Portsmouth.

A son, Earl, is in the decontamination department.

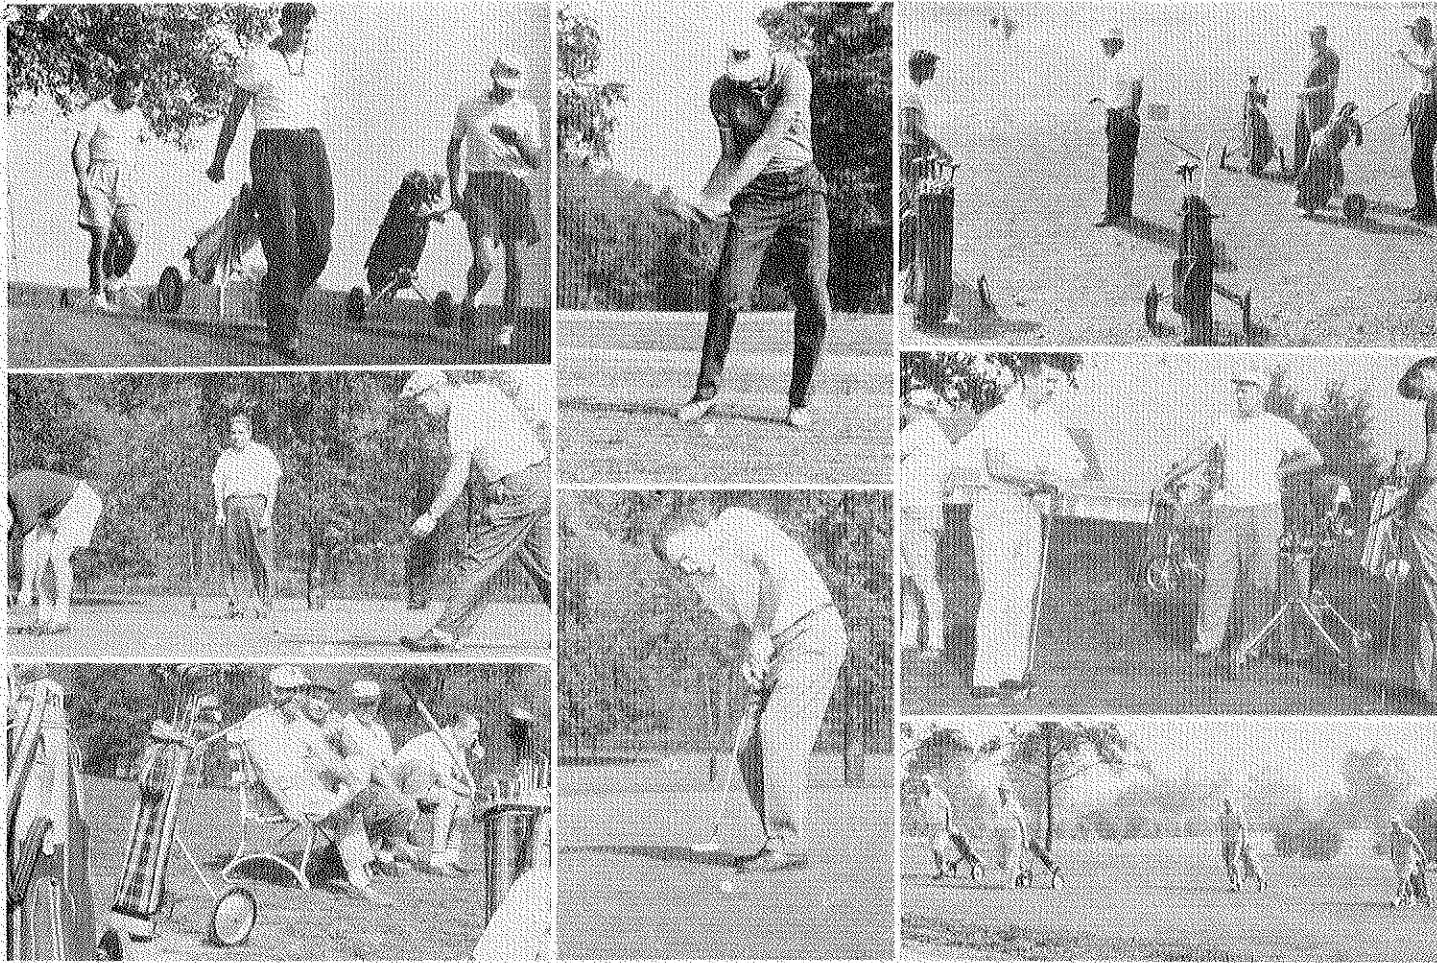

William L. Pence, 84, died October 2, 1960, while attending Church in Quincy, Kentucky.

A son, Ernie, is in cascade operations assigned to process area 5.

## POLIO SHOTS

Last year, 43 percent of paralytic polio cases were children under five years old. Has your child been protected from this crippling disease?

If you haven't had your full series of polio shots from your family physician, you're in a circle of danger. The circle is shrinking. Many of us have had polio shots. Those left — the unvaccinated — should ponder this: last year polio almost doubled among the unprotected. Don't take a chance — visit your family physician and take your polio shots.

1960 GOLF ACTIVITY comes to an end with the last playday of the season. Left, top to bottom: Chuck Trivisonno, Frank Voss, and Dave Zelinski move down the fairway after teeing off. Glen Russell seems to be disgusted after missing a putt, Miles Bruno looks on as Clark Robinson moves in for his shot. Waiting their turn are Gene Mutter, Warren Gilliland, Fred Cashman, and John Baker. Center, top to bottom: The COMPANY CHAMPION Dick Entler about to blast one. "Easy now", says Glenn

Kizer. Right, top to bottom: Ray Jamison, Hugh Ruel, Roy Gustavson, and Ed Alexinas relax a moment before teeing off. Dewey Wright, Dick Dever, Irwin Osborne, and Bill Nixon await action on the back nine. Coming up the fairway are Joe Brant, Fred Pickens, Dick Fleming, and Lloyd Fuller. Eighty-four golfers began the flight and championship tourney which resulted in Entler and Gustavson finishing 1-2, with Bruno and Alexinas rating third place in the Company Championship.

## AREA BOWLING ACTIVITIES PICK-UP PACE

### PORTSMOUTH

*Men's League* (Monday) — Through the first 48 games, Ray Bush leads all bowlers with a 169 average.

*Men's League* (Thursday) — In League action last week, Marty Redden, bowling with the "Maple Stir-Ups" timbered a 605 series which included games of 222 and 244.

*Women's League* — The "Sparrettes" were leading the league through October 11. Members of

this team include Phyllis Lallow, Barbara Glenn, Judy McGlothlin, Anne Hensley, and Helen Wion.

*"A" Shift*—John Vournazos, bowling with the "Crows", had three identical scores of 157 last week. This feat qualifies John for the ABC's triplicate patch. Bob Nance replaced Earl Staten as the league's high average bowler with 175.

### WAVERLY

*"B" Shift*—Bill Durbin and Paul Cravens are tied for the lead in av-

erage with 164. Jack Good has 194 as a substitute.

*Women's League* — The "Ten Pinners" lead the league. Members of this team are: Donna Oakley, Mary Lozier, Dorothy Bickett, Margaret McNaughton, and Winnie Chase.

### CHILLICOTHE

*Men's League* — Last Wednesday Dick Jones led all bowlers with a 608 series and 234 individual game.

RECEIVES ABC AWARD. C. A. Tabor (center), Works Laboratory, is presented an American Bowling Congress triplicate patch by Gene Dalton, Utilities Maintenance, and President of the GAT Bowling League of Jackson. Tabor recently rolled three consecutive scores of 203 in League action. Standing at right is Al Baughman, Process Area 2, Secretary of the League.

## GAT Foremen's Club Dance November 4

Tickets are still available for the GAT Foremen's Club dance at the Chillicothe Elks Club, Friday, November 4, from 9 p. m. until 1 a. m.

Only 100 tickets will be sold. Tickets are \$2.50 per couple and may be purchased from any of the Foremen's Club trustees.

Lou Martin's Orchestra from Portsmouth will play for the dance. Cor-sages will be presented to the ladies at the door.

Though our nation's first automobile fatality occurred 125 years after our first war fatality, the millionth life lost in each category occurred the same month, December 1951.

## Classifieds

All Wingfoot Clan ads must be typed or printed, and contain a "blind" address or telephone number to which initial contact can be made. The ad must be signed in ink and carry the employee's department number, badge number, and plant-site telephone number. This service is for employees who have items to buy, sell, or trade. No commercial ads can be accepted.

### FOR SALE

**Writing Desk & Stool**—\$39.50. Accor-dian 120 Bass, Italian made. Very good condition — \$125.00. 3 - Piece Bedroom suite mahogany — \$69.50. Kitchen table cart — \$6.00. Folding bed — \$29.50. Occasional chair & stool. Pin-up Lamps and small items — \$39.50. Telephone Waverly 8133-R.

**Farm For Sale.** 39 acres. 5-room block house. Small barn, chicken house & pen, large outbuilding next to house. Case Tractor with hydraulic system and implements. fuel oil stove with 275 gal. tank. 18 laying hens. 30 bu. corn in crib. frigid-aire cook stove, small picnic ground. \$6500. Seven miles west of Jackson. Bethel Ridge Road, 1st house on left. Just off 124.

**Set of Britanica Encyclopedias.** 1948 edition consisting of 24 books plus 12 year books including 1960. All books same as new. \$210. Telephone Chillicothe PProspect 2-6065.

**Bassett Hound Pups.** AKC Registered. Telephone Waverly 897.

**Oil Burner.** American Standard Model MF-W. Arco Flame with ignition transformer for 120,000 BTU furnace. Telephone Chillicothe PR 5-5367.

**5-Room Ranch Type House** with bath, full basement, gas furnace and hot water tank, breezeway and garage. Lot 75 x 240. G. I. Loan. May be seen at 119 Waverly Gables Blvd., Waverly.

## WHAT IS SAFETY?

Have we given thought to what "safety" is? The definition is, "the state or condition of freedom from danger or risk."

There was never any thought of personal safety until the last century or so. Humans, and property, were considered as expendable. Let's look at some of the efforts that have been made to help us all to live to a ripe old age.

Glass was first made in Egypt in 2500 B. C., but it wasn't until 1903 that a Frenchman perfected "Safety Glass."

Fire was first made by man about 4000 B. C., but it wasn't until 1855 that a Swede perfected the "Safety Match."

Man has used razors for centuries, but it was the early 1900's before Gillette perfected the "Safety Razor."

Pins had been in use centuries before Christ, but it wasn't until 1869 that a patent had been issued for a "Safety Pin."

Watts perfected the steam engine in the 18th century, but it was 100 years later that the "Safety Valve" was perfected.

Miners have for centuries been going down into mines, but it wasn't until 1815 in England that a miner's "Safety Lamp" was invented.

Trains had been running for years, but it wasn't until Westinghouse got his patent in 1869 for the air brake that they were safe to ride at hi speeds.

There are other things that we take for granted, "safety shoes," "safety helmets," "safety belts for air-planes and cars," "safety slogan deposit boxes," and the safety patrols by our youngsters at the schools.

It wasn't until 1913 that American industry realized that something should be done to promote safety in industry. In that year the National Safety Council was formed.

The foregoing may or may not be interesting, but it all resolves on us, you and me, to be safe, play safe, and work safe.

## Bowling Playday

GAT male bowlers are reminded of the "bowling playday" scheduled for Jackson October 29. Chillicothe, Waverly, and Portsmouth will bowl November 5.

Hams will be awarded to the winners. The total pins rolled plus handicap will determine the winners.

Closing date of entry for persons bowling in Jackson is October closing date in other areas, October 28.

Entry fee must be paid to your league secretary or the recreation department.
