## GOODYEAR ATOMIC CORPORATION

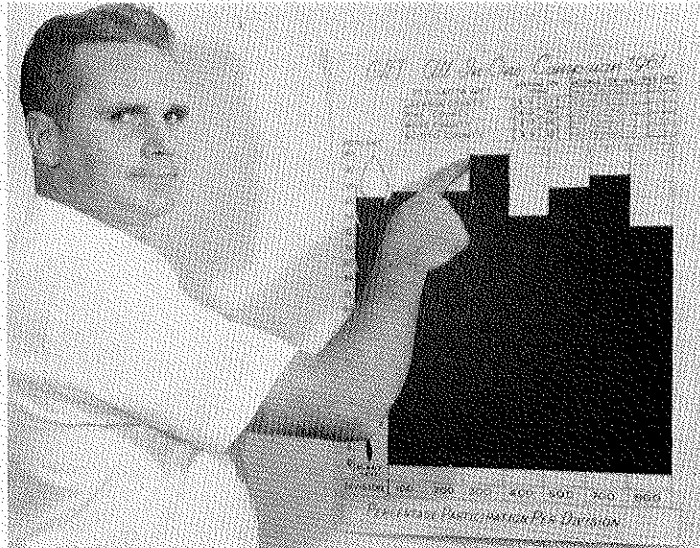

A Subsidiary of THE GOODYEAR TIRE & RUBBER COMPANY

VOLUME IX

PIKE COUNTY, OHIO, WEDNESDAY, OCTOBER 18, 1961

NUMBER 2

### Goodyear Atomic Employees Contribute \$17,623.95 During All-In-One Campaign; Company Gift \$10,800

100% PARTICIPATION BY THE FINANCE DIVISION is pointed out by Ed Hartnett, Training Department, on the daily All-In-One Chart which was posted on all bulletin boards. Hartnett assisted the Reproduction Department in preparing the chart each morning for distribution.

#### Area United Funds Benefit By Efforts

Final tabulations for the 1961 Labor-Management All-In-One Campaign show that the employees contributed a total of \$17,623.95 toward area United Funds.

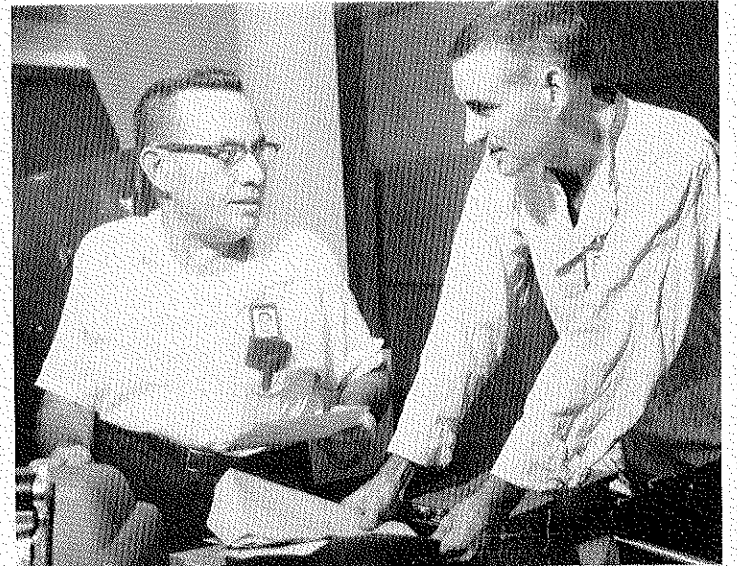

The Company Gift of \$10,800 brought the grand total to \$28,423.95 which will be distributed among the four counties surrounding plantsite as directed by the employees pledges and cash cards. The employee average gift increased 10% over the past year.

The campaign goal was 100%. The Finance Division reached that goal midway during All-In-One Week.

Co-Chairmen J. F. Wettstein, President, Local 10-689, OCAW; Paul F. Bliss, Coordinator, Community Relations Department; and E. R. Weakland, representing the UPGWA, Local 66, noted that the success of the Campaign was reflected in the increased average gift by GAT employees.

GAT's General Manager, G. H. Reynolds, voiced the Company's approval of the joint labor-management campaign as another outstanding example of cooperative effort on the part of labor and management.

"This was a most successful campaign," he said, "with 86.4% of our employees responding. The organizations in the surrounding communities will be better able to do

THANK YOU VERY MUCH. These were the parting words to each solicitor by John Hall (left) Employment Department. Here he is pictured with J. C. Hickey, OCAW solicitor in the Special & Mechanical Shops Department. Mr. Hall was assigned to All-In-One Headquarters during the Campaign and did an excellent job in keeping daily records.

the job that is necessary because our Goodyear people have done their fair share. The efforts expended by the solicitors and the giving by our people is greatly appreciated."

The total of \$28,423.95 will be distributed among the United Fund agencies in the four counties of Scioto, Ross, and Jackson. The division of the Company Gift is determined by the percent of giving by employees in each of the four counties.

Following is the percent participation by county with the combined employee contribution and Corporate Gift going to the representative United Funds:

Jackson County —	11.2%	\$ 3,181.49
Pike County —	29.4%	\$ 8,358.49
Ross County —	20.4%	\$ 5,806.89
Scioto County —	39.0%	\$11,077.08

The organization which made it possible for the employees to make this excellent showing was based upon a solicitation team of Union and Company representatives contacting the hourly employees at plantsite while salaried employees were contacted by their supervision. The cash contributions and proportion of the Company Gift will be presented to representatives from the various United Funds at a meeting to be attended by the Co-Chairmen, a member of the UPGWA, and G. H. Reynolds, General Manager; D. W. Doner, Manager, Industrial Relations Division; and W. L. Sams, Manager, Finance Division.

### GT&R Agrees To Give Technical Assistance To Japanese Firm

Technical assistance for the manufacture of a polyester plastic resin for synthetic textile fibers will be given by The Goodyear Tire & Rubber Company to Toyo Spinning Company, Ltd., of Osaka, Japan.

A ten-year pact signed by Goodyear President Russell DeYoung and T. Taniguchi, president of the Japanese firm, calls for Goodyear to furnish technical "know-how" for the design, construction and start-up of a 10-million pound-a-year plant to be built in Japan.

The new plant will be located at Iwakuni, about 25 miles from Hiroshima.

The negotiations between the two firms resulted in Goodyear's first alliance with any foreign company for the manufacture of Vitel polyester resin. The agreement is subject to validation by the Japanese Government.

Toyo Spinning, better known as Toyobo in Japan, is that country's oldest and largest manufacturer of textile products with 26 plants in operation.

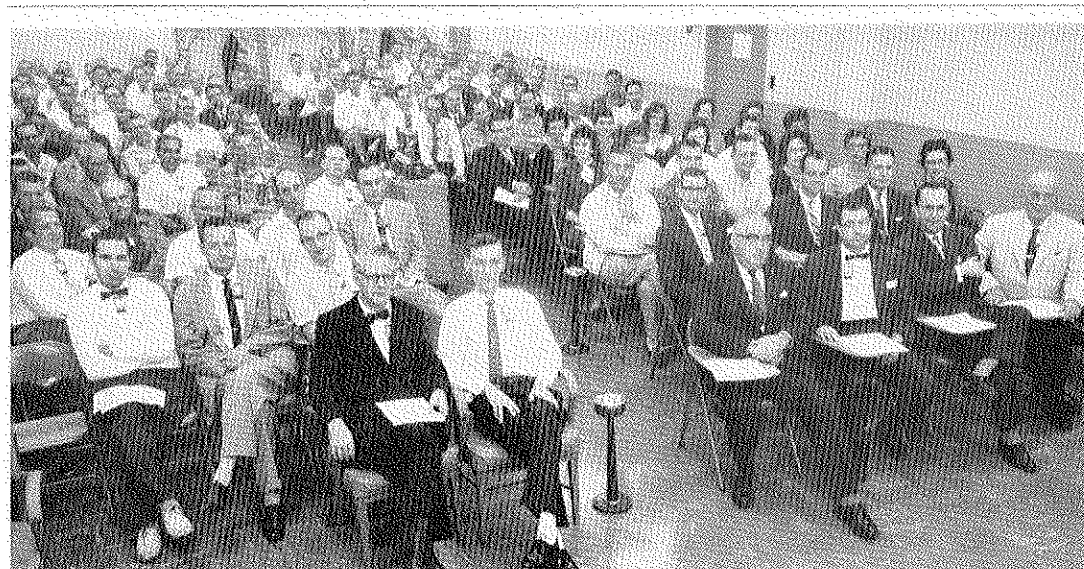

The agreement marks Toyobo's first entry into Japan's rapidly growing polyester textile markets. The firm produces a wide variety of cotton, wool, rayon and other synthetics from raw materials to finished goods.

Vitel was developed and patented by Goodyear after many years of intensive research effort. It has been

produced commercially for several years in the company's Point Pleasant, W. Va. chemical plant. It is used in this country by Beaunit Mills to make a synthetic textile fibre called Vycron.

Fiber made from the resin is noted for its excellent wash and wear features, light weight and strength.

The company previously has entered into similar technical assistance with foreign companies for the production of synthetic rubber and latex

SOLICITOR'S MEETING. This photograph was taken following the "kick-off" meeting for the 1961 All-In-One Campaign. During the meeting representatives from the four United Funds surrounding plantsite spoke briefly regarding their particular campaign. The in-plant solicitation is a Labor-Management endeavor.

#### IN MEMORIAM

Mrs. Martha Anna Coryell, 81, died September 29, 1961, at Fort Lauderdale, Florida. A son, Max, is "C" Shift Superintendent.

Mrs. Bertha Yinger, 78, died October 3, 1961, in Mercy Hospital, Portsmouth, Ohio. A son, Paul, is in the stores department.

## Antique Automobile Club

336 inches. The tires are 20x6:50 is a real student of antique automobiles. At the present time he has three 1929 Studebakers . . . one a Convertible with a rumble seat; another classified as the Victoria which is a forerunner of the 5-passenger coupe; and his pride and joy the 1929 7-passenger Touring Car (President's Series).

His interest in antique autos dates to 1949 when he purchased a 1929 Studebaker Roadster. This also was one of the President's series.

The car was sold to Mr. Robert Kilborne III, New York City, an antique collector. Barker drove the car to New York. Mr. Kilborne entered the car in the International meet in England in 1959.

His 1929 7-passenger Touring Car was purchased from Mrs. Carolyn Bender of Philadelphia, Pa., in 1960. He traveled by bus to purchase the car and drove it back home. It was the Bender family car and was almost like new.

The car is capable of 90 miles per hour but he cruises at 50-55 mph. "Everyone," states Barker, "asks about the gas mileage. I don't think the car was made for economy. It operates about 10 miles to the gallon." It has an 8-cylinder engine (straight), with a displacement of

It has since been repainted in the original color of red and black.

It is interesting to note how he matched the original paint. "We borrowed a 1929 Sales Folder from an Akron car dealer," he said. "Al Koehler (special analysis department) then took a color-photo of the picture in the sales catalogue. We used the photo to match the paint."

Barker has re-upholstered the car. At times he has had to purchase parts for the vehicle. This resulted in a thorough search. Parts have been obtained from six different States and Canada. The radiator is 4½ gallon capacity. "That's a lot of anti-freeze," drawls Barker.

Barker is one of several GAT employees who are members of the Scioto County Antique Car Club and the Antique Automobile Club of America.

### YMCA Board Member

C. R. Milone, Goodyear Atomic's Deputy General Manager, has been elected as a new director of the Chillicothe YMCA. He succeeds Mr. Don Collins who moved from the area last spring.

**WHAT'S YOURS?** Over a period of a year's time GAT employees will travel thousands of miles to and from plantsite. A check of the GAT parking lots will reveal many different types and models of vehicles which are used for transportation. Grouped together in the above photograph are six of these vehicles. In the foreground astride their motor bikes are L. E. Owens (left), Chemistry Department, and R. N. Hoskins, Jr., Mechanical Development Department. In the convertible is Pat Hankins, Accounting Department. Milford Barker, Chemical Operations, is conspicuous behind the wheel of his 1929 Studebaker 7-passenger Touring Car. W. M. Armstrong, Employment Department, follows with his T-Bird, while W. G. Kensinger, Internal Audit Department, displays his 9-passenger station wagon. In the background may be seen a cross-section of the various styles and makes of vehicles that may be found in the GAT parking lot on any given work day.

### Member Color Guard

## Dysart's Son Sees World Series Game

Jim Dysart, son of J. S. Dysart, administrative staff, was a participant in the 1961 World Series.

Jim is a member of the University of Cincinnati's Chapter of the National Society of Pershing Rifles. He represented Pershing Rifles as a member of the color guard at the fifth game of the World Series in Cincinnati, October 9.

Young Dysart, who is a junior pre-medical student at the University of Cincinnati, is a graduate of Chillicothe High School.

The organization known as the Pershing Rifles is familiar to football fans as they have observed its members raise the colors at football games at various universities throughout the country. Now sixty-seven years old, the Pershing Rifles has chapters in forty-nine states and Puerto Rico.

The stated purpose of the fraternity is to "encourage, preserve and develop the highest ideals of the military profession as exemplified by the life of General of the Armies John J. Pershing," who founded the organization sixty-seven years ago.

The national convention of Pershing Rifles will be held in Columbus, October 18-21. During the convention the organization will engage in drill meets, rifle matches, military science studies and social affairs.

Today, Pershing Riflemen wear a membership ribbon especially authorized by the Department of Defense. Because he is honored to wear this ribbon, Jim Dysart not only performed a service during the 1961 World Series, but he thus exemplified one of the major purposes . . . "to provide appropriate recognition of high degrees of military ability coupled with responsible citizenship of the United States . . ."

Mr. and Mrs. R. G. Haydon, daughter, Joalynn. The mother, Ruthie, is a former employee of the general manager's office.

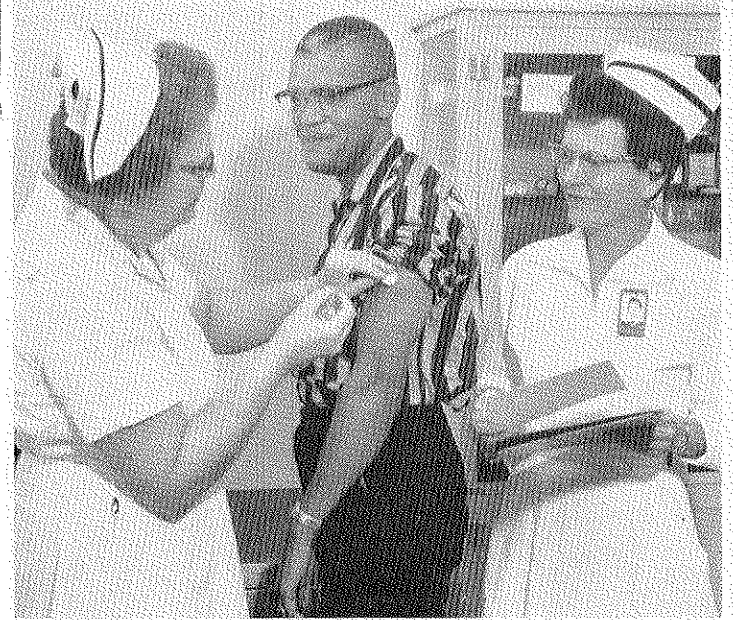

Mr. and Mrs. H. R. Hoskins, (process area 1), son, Gary Ray.

Mr. and Mrs. R. H. Gillespie, (SS materials handling department), daughter, Sue Angela.

Mr. and Mrs. P. R. Ogle, (chemistry department), daughter, Winifred.

Mr. and Mrs. W. K. Rowe, (special & mechanical shops department), son, James Michael.

Regardless of how much money you have, wisdom has to be bought on the installment plan.

IT WON'T HURT A BIT. R. A. Edwards (center), Cascade Operations, takes advantage of the Company's flu vaccination program. Preparing to give the shot is Nurse Helen Lewis as Nurse Ruth Cook looks on.

## Employees Urged To Get Flu Shots

Dr. H. B. Lehman, GAT's Medical Director, urges all employees to take advantage of the influenza vaccination program. The program, which began in early September, is still under way and at present approximately 50% of GAT employees have either received a first shot or a booster shot.

Public Health reports indicate that an upswing in the influenza cycle is likely to hit this country during the fall and winter months. Asian flu outbreaks come in two to three year cycles and Type B flu has been dormant since March 1960, and it has been more than six years since a Type B epidemic. England had an epidemic last year which caused over

1000 deaths and was indirectly responsible for thousands more.

The GAT Hospital is temporarily out of flu vaccine. The next shipment from the vendor is expected by the first week in November.

The influenza vaccination may be obtained at the GAT Hospital from 9 a. m. to 11:30 a. m. and 1 p. m. to 3 p. m. during office shift hours. During other than office shift hours, employees may report to the Hospital at their convenience.

Those employees who have received the vaccine before will need to get only one booster injection. Those who have never had the vaccine should get one injection as soon as possible and a second inoculation no less than two weeks after the first.

**TWENTY YEARS OF SERVICE.** That's the story of the Goodyear All-Weather Tire displayed by Roy Coldicott, Police Department. The tire, which was original equipment on a 1941 Plymouth, is still in use on a farm trailer. Patrolman Coldicott said he had no way of knowing the exact mileage on the tire, but "it's a plenty."

## 1961 ALL-IN-ONE CAMPAIGN

The results of the 1961 All-In-One Campaign include some interesting facts which will be of interest to all employees: (1) 86.4% of the employees contributed to the Campaign. (2) The number of employees who pledged was up 4% and the number of cash contributors down 4% as compared to 1960. (3) The total employee contribution, \$17,623.95 was below the total employee gift of last year but the average employee gift increased 10.5%. (4) The average contribution of the employees was \$11.65. (5) The number of employees who signed pledge cards for the All-In-One increased 4%. (6) The Company Gift was \$10,800. (7) The total, employees and Company gifts, was \$28,423.95. (8) The total sum of money which will be distributed to each county is as follows: Jackson . . . \$3,181.49; Pike . . . \$8,358.49; Ross . . . \$5,806.89; and Scioto . . . \$11,077.08.

We want to take this opportunity to thank all of you for the efforts which you expended in behalf of the All-In-One. As was stated at the beginning of the Campaign, "This is not a Company nor a Union effort but a United Fund effort by the residents of each county." You have helped to provide the funds which are required to operate the social agencies in your community and you can be proud of your achievement.

/s/ Paul F. Bliss & John F. Wettstein  
Co-Chairmen  
E. R. Weakland, UPGWA  
G. H. Reynolds  
General Manager

AREA UNITED FUND REPRESENTATIVES. G. H. Reynolds (right front), General Manager, discusses GAT's All-In-One Campaign with United Fund officers from Jackson, Pike, Ross, and Scioto Counties. Front row from left are: Mrs. Annette Levine, President, Jackson County United Fund; Joseph Christner, General Chairman, Jackson County United Fund; Kelly Wallace, General Chairman, Pike County United Fund; Reverend Leslie Pritchard, General Chairman, Scioto County United Fund; Lloyd Beck, General Chairman, Ross County United Fund; and Mr. Reynolds. Rear row left to right are: Paul F. Bliss, Co-Chairman, Labor-Management All-In-One Campaign; O. Noble, Chairman, Employee Section, Ross County United Fund; D. W. Doner, Manager, Industrial Relations Division; Henry Kincaid, Executive-Secretary, Scioto County United Fund; and John Wettstein, President, Oil, Chemical and Atomic Workers, Local 10-689, Co-Chairman, Labor-Management All-In-One Campaign. E. R. Weakland, represented the United Plant Guard Workers Amalgamated, Local 66, in supporting the campaign.

## How The GAT Blood Bank Operates

The GAT Blood Bank operates out of the Huntington Regional Blood Center, American Red Cross. Daily the community relations department receives questions relevant to the operation of the blood program. A number of these questions were answered recently in "The Derivative," monthly newsletter of the Huntington Regional Blood Center. These answers are listed below.

Red Cross maintains the highest standards of blood collection and processing and is licensed and regulated by the National Institutes of Health.

The whole process is practically painless.

No GAT employee is ever accepted for donation if it may be harmful in any way to the donor or the recipient of the blood.

No blood is ever wasted. Blood not used for direct transfusion is made into blood derivatives such as fresh frozen plasma, packed cells, serum albumin, fibrinogen and gamma globulin which may be obtained at no charge from the local health department. Other derivatives are available at no charge through Red Cross except for Serum Albumin which is \$10 per unit.

The sole purpose of the Red Cross Blood program is to save lives by meeting a human need.

The Red Cross never buys blood nor does it ever sell blood.

Hospitals do have an administration charge for blood. The Red Cross does not receive any part of this charge.

It costs the Red Cross approximately \$5.86 to collect, process and deliver a pint of blood.

The program in local communities is supported by your voluntary contributions through the UNITED FUND.

A person who is a member of the GAT Blood Bank may secure blood simply by contacting the community relations department, X-100 building.

A person who has established individual credit should simply contact the Red Cross.

The GAT Blood Bank covers you any place in the United States and Canada through a reciprocity agreement with other centers and the American Association of Blood Banks.

The blood is collected by specially trained, registered nurses under the watchful eye of a medical doctor.

All Red Cross blood is typed and tested in a Red Cross laboratory before distribution to insure maximum safety.

Blood types of A, B, AB and O with either a positive or negative RH factor.

There is no difference in the blood of the various races.

The next visit of the Huntington Regional Bloodmobile to Goodyear Atomic Corporation is January 16 and 17, 1962.

RECEIVES GOD & COMMUNITY AWARD. Sharon Steinhauer (center) receives the Girl Scout's God & Community Award from The Reverend M. W. Wilk, Pastor of the St. Paul Lutheran Church in Waverly. The Award was presented following morning worship service Sunday, October 8. Sharon is a member of Troop 136 in Waverly. Her father, H. Steinhauer, is in the Instrumentation Development Department. Standing left to right are: Susie Speraw; Marcia Thomas, daughter of Fred Thomas, Electrical Maintenance Department; Linda Schmitt; Ann Gleason; Barbara Russell; Reverend Wilk; Sharon Steinhauer; Shana Craumer, daughter of R. L. Craumer, Plant Engineering; Margaret Scott, daughter of C. V. Scott, Finance Division; Julia Smith; and Susan Koons, daughter of K. E. Koons, Instrument Maintenance Department.

## Sharon Steinhauer First Girl Scout To Receive God & Community Award In Area

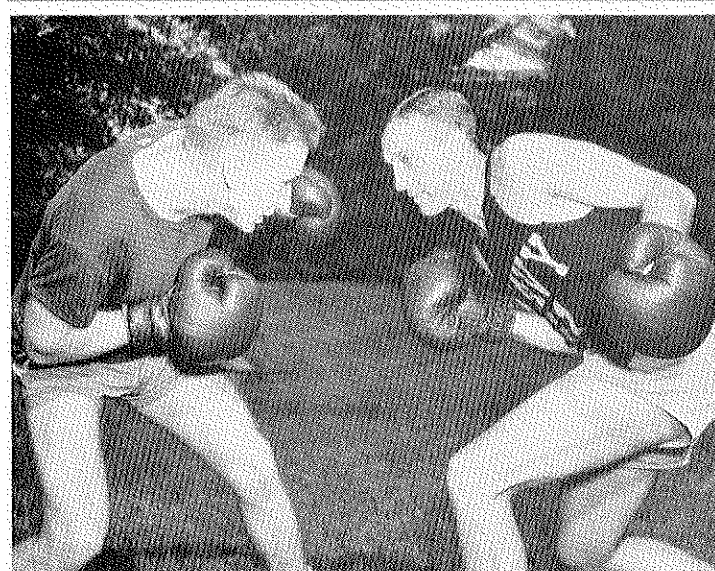

Troop 136, Girl Scouts of America in Waverly, registered a first in the Scioto Council, GSA, when one of its members received the God and Community Award during recent ceremonies in St. Paul's Lutheran Church in Waverly.

The proud recipient is Sharon Steinhauer, daughter of H. Steinhauer, instrumentation development department.

The God and Community Award for a Girl Scout is comparable to the God and Country Award for a Boy Scout. The Girl Scouts cannot make the Award. It must be earned through the Church and in cooperation with her Minister.

The Girl Scouts believe that a basic necessity for the development of good character is the recognition of God and one's responsibility to Him.

To assist a Girl Scout in spiritual growth, The United Church Women of Ohio developed a Church-centered program making available the "God and Community Award" upon recommendation of her Pastor and Scout Leader. This is an Award of the Church, made by the Church, upon fulfillment of religious standards established by the Church.

## WAVERLY BAND BOOSTERS

The Waverly Band Boosters Club is now conducting its annual 1962 calendar sale. The sale, which runs from October 12-23, helps defray expenses of band members entered in State competition.

Co-Chairmen for this year's calendar sale are R. A. Hook, chemical analysis department, and Mrs. Burdell Hoffman, wife of B. A. Hoffman, electrical maintenance department.

The easiest way to crush your laurels is to lean on them.

RECOGNIZE EITHER OF THESE TWO? Explanation on page 4.

GAT BOWLING COMMITTEE. Pictured across the top of the page are members of the Company Bowling Committees. R. L. Schneider and Joyce Seall, (center photos), are Chairmen of the Men and Women Committees respectively. Others pictured, and the area represented, are top row left to right: N. H. Cisco, Jackson; B. M. Haas, Chillicothe; T. J. Snead, Waverly; V. H. Butcher, "A" Shift Portsmouth; Phyllis Bowling, Portsmouth;

Ethel Noel, Waverly; Virginia McDonald, Waverly; and Madge Booth, Portsmouth. Bottom row from left: H. N. Bell, "B" Shift Portsmouth; R. J. Blaine, "A" Shift Waverly; C. F. Trivisonno, Portsmouth; C. R. Daniels, "C" Shift Portsmouth; Meredith Evans, Jackson; and Judy Ray, Jackson. These employees, representative of the various GAT bowling leagues, assist the Recreation Department in the Company's Bowling Program.

### WHO IS HE?

The photograph, columns four and five on page three, is that of W. E. Ellsesser, plant engineering, when he was an officer in the U. S. Naval Reserve during World War II.

This photograph appeared in the July 8, 1944 issue of THE PORTSMOUTH TIMES and was captioned: "A FISTIC INSTRUCTOR at the U. S. Navy Pre-Flight School at Athens, Georgia, 'Peg' Ellsesser, former Trojan Coach, is working out with the Navy youngsters these days. 'Peg' . . . now officially known as Lt. (jg) Willard E. Ellsesser, U.S.-N.R., is shown here sparring with Aviation Cadet E. A. Wolfe (left) Youngstown, Ohio. Boxing is one of 10 sports used in the Pre-Flight Physical Training Program to condition future Navy fliers."

Ellsesser, who formerly coached all sports at Portsmouth High School, was assigned to the University of Georgia as an Instructor in the Navy's Aviation Cadet program.

The clipping from THE PORTSMOUTH TIMES was furnished the *Clan* by W. O. Knauff, police department.

8. Use lowest range gear when descending icy hills or slopes.
9. Slow down for curves and icy ruts, anticipate ice patches.
10. In a skid, steer in the same direction in which the rear of the car is skidding.

## Winter Driving Tips — Check Your Car For Hazardous Weather

### BOWLING TOURNAMENTS

The GAT Bowling Committees have scheduled the following Bowling Tournaments for the 1961-62 season.

November 25	Mixed Scotch Doubles	All Areas
January 6	Mixed Outing	Shawnee Lanes, Chillicothe
January 13	Mixed Outing	Shawnee Lanes, Chillicothe
January 27	Women's Team Event	Jolly Lanes, Jackson
February 3	Men's Team Event	Sunset Lanes, Portsmouth
February 10	Men's Team Event	Sunset Lanes, Portsmouth
February 17	Women's Doubles & Singles	Sunset Lanes, Portsmouth
February 24	Men's Doubles & Singles	Jolly Lanes, Jackson
March 3	Men's Doubles & Singles	Jolly Lanes, Jackson
March 10	Women's Scratch Singles	Weiss Recreation, Waverly
March 17	Men's Scratch Singles	Weiss Recreation, Waverly

Each year, about this time, motorists are reminded of the importance of properly winterizing their automobiles. Yet each winter, thousands of motorists are caught napping when that first freeze arrives.

With the great number of car pools at Goodyear Atomic Corporation, each of us should see to it that the vehicle which is driven to and from work is in proper working condition and properly "winterized" for the coming months. When it's your day to drive others are depending upon you to get them to and from work.

This year, let's all use the following check-off list and avoid the discomfort and inconvenience of a "first-freeze" breakdown.

### SERVICE CHECK POINTS

1. Check battery for condition and charge.
2. Add windshield washer anti-freeze.
3. Add fuel system anti-freeze to gasoline.
4. Check automatic choke operation.
5. Change to winter weight oil.
6. Lubricate car.
7. Check radiator and heater hoses for defects.
8. Install proper anti-freeze and thermostat.
9. Inspect and adjust all types of pulley belts.
10. Check ignition system, points, condenser, plugs, etc.

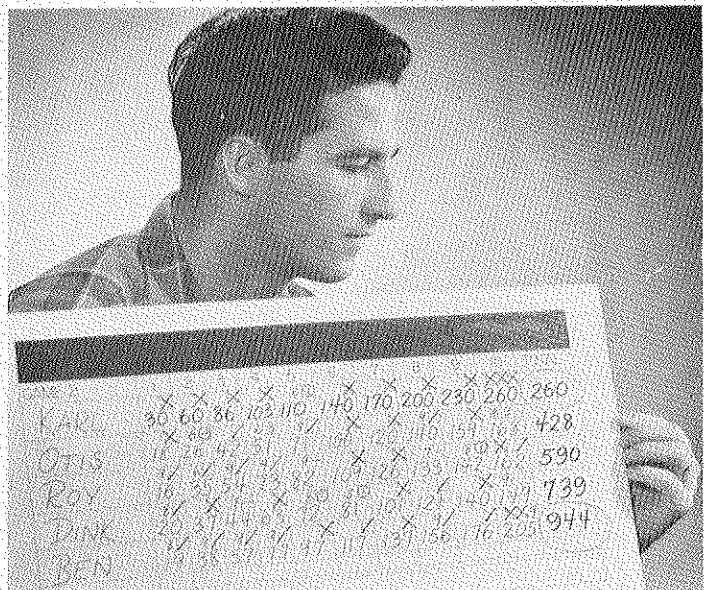

### SAFETY CHECK POINTS

1. Rear view mirror . . . clear, adjusted for rear vision.
2. Glass . . . clear, no cracks or discolorations.
3. Steering . . . proper alignment, no excessive play.

4. Stop and tail lights both operative.
5. Exhaust system—quiet, no leaks.
6. Snow tires . . . free of defects, properly inflated (or tire skid chains).
7. Horn . . . operative.
8. Brakes . . . evenly adjusted, proper fluid level, and clearances.
9. Headlights and turn signals . . . both operative.
10. Windshield wiper . . . operative, wipe clean.

### WINTER DRIVING POINTERS

1. Keep windshield, rear window, lights, and mirror clear.
2. Start in drive range on snow or ice, move slowly.
3. Allow greater distances in following the car ahead.
4. Reduce speed to meet conditions.
5. Avoid sudden acts of braking, acceleration, and steering.
6. Do not apply steady pressure, but pump the brakes to stop on snow or ice.
7. Maintain even speed when climbing icy hills or slopes.

SEASON'S HIGH. Karl Chapman, Process Area 1, proudly displays his 260 game rolled in the GAT Bowling League of Portsmouth. Karl is a member of the Raiders team which won the league last season. With this kind of bowling the team will be in contention again this year. Other members of the team are Otis Hinkle, Janitor Service; Roy Wolfe, Steam Plant; Charlie Mullins, Mechanical Development; and Ben Murnahan, Process Area 1. The 260 game is the third highest in a Goodyear League. Elmo Flinders, Cascade Operations, holds the record . . . a 287 game. Jack Wilkerson, Plant Engineering, is second with a 265.
