PIKETON, OHIO, WEDNESDAY, JANUARY 27, 1965

NUMBER 4

412 People Attend Two-Day Session

GAT Co-Sponsors Computer Seminar For Area Students

Last month, Goodyear Atomic Corporation and the Piketon School Department co-sponsored a computer seminar. The program was held at Piketon High School and conducted by GAT programming and computing department personnel.

GAT has maintained a high degree of competency in the computer field. It was felt that an attempt should be made to expose high school students to the vast subject of computers. Local, progressive school administrators had a similar thought—thus an idea evolved.

One purpose of the seminar was

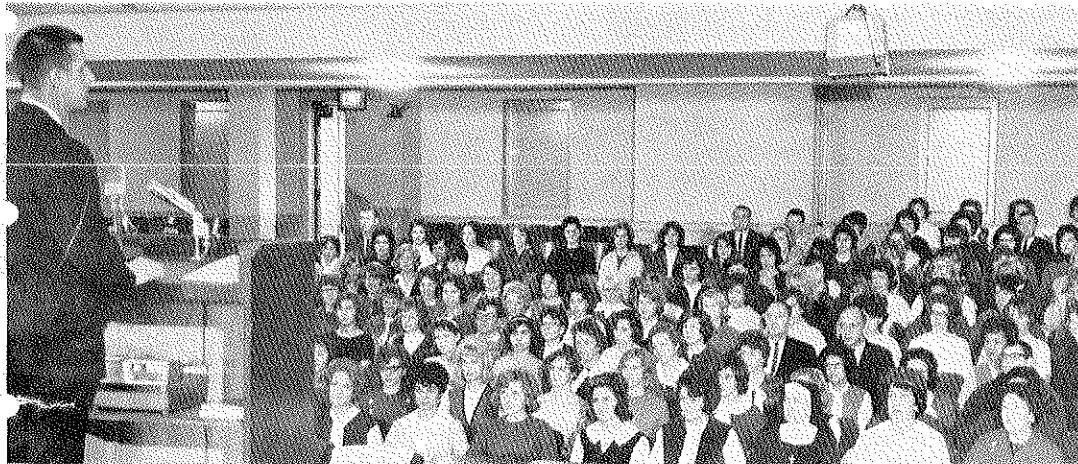

to promote an awareness of the vast and intriguing applications of the computer in today's commercial, scientific, and social activities.

High schools in the four-county area were invited to send a select group of junior and senior students to the two-day sessions. The first session covered the accounting aspects of computing and was directed to the students in the commercial curriculum. The second session was devoted to mathematical applications with the discussions aimed at the students with technical aptitudes.

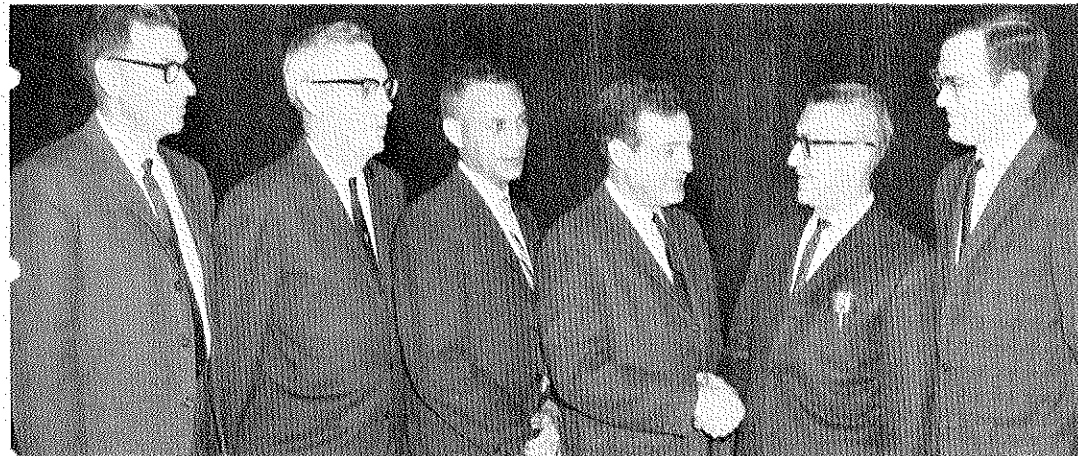

Six employees from GAT participated in the two-day program. Those in attendance and the subjects dis-

cussed were: A. H. Wernecke, uranium control and data processing, "History of Computers"; C. P. Work, data processing, "How The Computer Operates"; Harley Dix, programmer, "Programming The Computer For Business Applications"; P. L. Morgan, programmer, "Programming The Computer For Scientific Applications"; and G. J. Williams, applied programming and hand computing, "Computers In The Future." F. E. Pickens, community relations coordinator, was program moderator of the question and answer period.

A total of 235 people attended the seminar the first day and 177 the second.

HARLEY DIX, programmer, discusses computer programming with part of the group that attended the seminar.

A. H. WERNECKE, superintendent, uranium control, second from right, receives congratulations from M. W. Way, Piketon High School guidance counselor, for conducting a successful computer seminar. Other participants in the seminar were from left, C. B. Anderson, supervising principal, Piketon High School; C. P. Work, supervisor, data processing; G. J. Williams, section head, programming and hand computing; and P. L. Morgan, programmer.

K. T. McMANIS, utilities maintenance, has his blood pressure taken by Mrs. R. C. Netherton, wife of Dr. R. C. Netherton, medical department, prior to donating blood during the Tri-State Bloodmobile visit to plantsite on Jan. 11-12. Other employees waiting for the preliminary examination are, from left, W. A. Welton, chemical operations; J. M. Pieper, police department; G. L. Russell, chemical operations; J. J. Surack, process engineering; W. S. Smith, receiving & shipping; D. J. Prosch, paymaster's section; and J. T. Parker, utilities maintenance.

"We Are Swamped"; This Tells The Jan. 11-12 Bloodmobile Story

"I have rescheduled a few of the men," said F. E. Pickens, community relations coordinator, "we are swamped."

This tells the story of the successful visit of the Tri-State Bloodmobile on Jan. 11-12 when 209 pints of blood were donated.

This type of response assures the continuing existence of the GAT Blood Bank.

West Virginia.

All plantsite employees of Goodyear Atomic, Ohio Valley Electric Corporation and the Atomic Energy Commission belong to the Blood Bank. As a member, each employee and his immediate family, including his parents, his wife's parents, and any relative living within his household may have blood replaced from the Blood Bank.

Within a few days the blood replacement is completed, either by paper transaction or by the actual transportation of blood between the two blood centers involved.

A certain procedure must be followed for the replacement of blood. The employee reports to the community relations department and completes a blood receipt card. This card is mailed to the Tri-State Red Cross Blood Center in Huntington,

In regards to the latest bloodmobile visit, G. H. Reynolds, general manager, made the following comment: "The excellent response of the recent visit of the Bloodmobile — 209 units of blood — indicates once again that our GAT employees recognize their good citizenship responsibilities and proudly accept them. I am gratified with the response, and I extend to all participants my sincere congratulations."

GAT's '64 Shipment of Enriched Uranium Exceeds \$100 Million

The amount of enriched uranium for non-military uses supplied by GAT showed a marked increase during 1964.

The total value of this material shipped during the calendar year of 1964 amounted to \$106.3 million dollars. This exceeded by more than \$60 million dollars the amount shipped in 1963.

During the year six different commercial processors received shipments of uranium hexafluoride from GAT. These processors were: United Nuclear Corporation, Nuclear Fuel Services, Nuclear Materials and Equipment Corporation, Eldorado Mining, Kerr-McGee, and foreign interests.

Atomic in Pittsburgh, Pa. The Rover Project which is the government's program for nuclear rocket experiments, etc., received material from GAT.

The material was used in power reactors (\$9.0 million), the nuclear rocket program (\$44.0 million), atomic laboratories (\$23.9 million), research and development (\$21.6 million), and power reactors in foreign countries (\$7.8 million).

The first shipment of uranium hexafluoride was made by GAT in August 1957. From that date through December 1963, the value of material shipped totaled \$130 million dollars. The amount shipped in 1964 almost equalled the quantity shipped during the previous six years.

The two power reactors receiving this material were the Yankee Reactor in Rowe, Mass., and the La-Crosse Reactor in Genoa, Wis. The power laboratories are Knolls Atomic in Schenectady, New York and Bet-

Attention! Employees Taking Off Plantsite Courses

All employees registered for off plantsite courses must make application and receive approval

for educational assistance. "Educational Assistance" form A-1170, must be submitted

not later than 10 scheduled workdays after registration for the course.

APPROVED FOR RELEASE BY:
M. M. Earnhardt

Year-End Statement From Goodyear

Banner Year In 1965 Predicted By Board Chairman R. DeYoung

Goodyear's continued growth, as witnessed by recent increases in authorized capital expenditures to a record \$135 million, will place the company in a position to enjoy another banner year in 1965, Chairman Russell DeYoung emphasized in a year-end statement.

"Goodyear's faith in the industry's continued healthy growth in 1965 and beyond is being backed up daily by increased capital expenditures in research, testing, production and retail facilities," DeYoung said. "And since this faith in our business is not a new thing, but as old as the industry itself, 1964 paid off very well."

Rubber became an \$11-billion industry in 1965, scoring record highs in every major field.

Sales of replacement tires for passenger cars by the industry in 1964 totaled 88 million, a jump of 11 per cent over the 79 million sold the previous year. The magnitude of this increase is evident when weighed against the normal annual growth of about four per cent.

Although strikes held auto production from a record and erased about two million tires from the original equipment market, the tire industry shipped 42,380,000 units for new cars, only a few hundred thousand below the 1955 record.

Based on the prospect of the first 8-million-car-year in 1965, DeYoung said original equipment tire sales should reach 43.5 million, while replacement auto tire sales will return to a more normal growth pattern and reach over 90 million.

The chairman said sales of tires by U. S. companies for all types of vehicles in 1964 will be about 154 million, an eight per cent increase. By 1975, the 200-million-mark should be passed.

"Polyester came of age as a tire cord material last year," DeYoung said. "In June we manufactured the millionth tire made with Vytacord, our polyester fiber which combines the best features of nylon and rayon. The use of Vytacord definitely will grow next year in truck and agricultural as well as passenger tires.

"Our non-tire divisions also benefited from the high level of industrial activity. Synthetic rubber consumption reached an all-time peak of 1.45 million tons, accounting for three-fourths of all rubber consumed in the U. S."

DeYoung saw the greatest growth for the future in the "stereo" rubbers, which are relatively new on

the market. Polyisoprene, or Natsyn, and polybutadiene, or Tufsyn, are major stereo rubbers and accounted for 150,000 tons of the total. Within 10 years this total should nearly double.

The chief executive said Goodyear Aerospace Corporation made significant strides in such areas as aerospace plastics, electronics and inflatable structures for a variety of space missions. The SUBROC anti-submarine missile, for which GAC is prime contractor, moved into operational evaluation in late 1964, and work continues on production contracts.

Goodyear International Corporation, keeping pace with upsurging economics and fast-growing automotive industries throughout the world, achieved new sales and profits in 1964, DeYoung reported.

Color Film Describes Detection Of Nuclear Atmospheric Blasts

A new color motion picture, which describes the detection of nuclear explosions beyond the earth's atmosphere by satellites, is now available for loan to the public by the Atomic Energy Commission.

Entitled "Vela Program: Satellite Detection System," the 16mm 17½-minute film was produced by the Sandia Corporation for the Advanced Research Projects Agency of the Department of Defense and the AEC.

Designed primarily for professional audiences, the film explains the nature of the atmosphere surrounding our planet and the problems involved in detection of nuclear explosions outside of the earth's atmosphere.

The film may be borrowed, free of charge except for return postage, by contacting: Film Loan Library, Atomic Energy Commission, P. O. Box "E", Oak Ridge, Tennessee.

In Memoriam

M. J. Kenny died Dec. 24, 1964, in Mercy Hospital in Portsmouth. Mr. Kenny was a member of the industrial relations division.

K. F. Koons died Jan. 1, 1965, in Ohio State University Hospital in Columbus. Mr. Koons was a member of the plant engineering and maintenance division.

H. A. Zola died Jan. 8, 1965, in Citizens General Hospital in New Kensington, Pa. Mr. Zola was a member of the production division.

Yearly Review Of GAT Women's Organizations Shows Continued Effort Of Community-Wide Spirit

Last month, each of the three GAT Women's Clubs elected and installed officers for 1965.

The secretary and treasurer of each club submitted their yearly report of club activities.

JACKSON

The Women's Club of Jackson is organized primarily as a social club. Last year, however, money was contributed to the 40&8 (American Legion) for the purchase of toys for needy children. In addition, money was given to the Jackson Band Mother's Club to help purchase uniforms for the high school band.

Mrs. Roscoe Wimer, Jr. (D-712) is the outgoing president.

PIKE COUNTY

The Women's Club of Pike County is a social club, also. It is their policy, however, to make an annual contribution to the Pike County Scholarship Fund. They, also, donated two Christmas albums to the Good Shepherd Manor.

All meetings of the Club are held at the Governor's Lodge on the second Friday of each month.

Mrs. Gerald R. Towler (D-761) is the outgoing president.

PORTSMOUTH

The Women's Club of Portsmouth is a service organization as well as a social club.

The club selected two projects for the 1964 year, the Happy Hearts School and the Shawnee Juvenile Service Council. The School is for mentally retarded children of Scioto County and the Council sponsors a program for youth rehabilitation.

The club's money-making projects for the year were: the annual spring bridge benefit, a telephone bridge party with each club member entertaining one table of bridge, and the annual Christmas dance.

The combination bridge party and style show held in April realized a profit of \$339.12, the telephone bridge parties raised \$97.00 and the December dance added \$374.00 to the treasury.

The club's contributions during the year were: \$200.00 to the Shawnee Council for operating expenses, \$25.00 for storing the Happy Hearts furniture during the summer while the school administrators were finding a building suitable for classes, and \$451.60 for the purchase of one complete room of new furniture for the School which included 24 chairs, 2 tables and one teacher's desk and chair.

Throughout the year club members were kept busy performing committee work and attending various organizational meetings.

To become better acquainted with the youth rehabilitation program, a committee visited the Ohio Youth Commission and Buckeye Boys Ranch in Columbus. It is the dream of the Shawnee Council to have a Buckeye Ranch in Scioto County to care for those youths who must be removed

OFFICERS OF GAT WOMEN'S CLUB OF JACKSON — left to right, Mrs. A. J. Blair (712), vice-president; Mrs. C. I. Crawford (851), treasurer; and Mrs. A. T. Hale, Jr., (554), president. Absent was M. E. Evans, secretary, an employee of the purchasing and materials division office.

OFFICERS OF GAT WOMEN'S CLUB OF WAVERLY— left to right, Mrs. H. A. McClelland, secretary, purchasing department; Mrs. O. F. Tussey (256), treasurer; and Mrs. E. L. Salazar (531), president. Absent was: M. W. O. Butler (522), vice-president.

OFFICERS OF GAT WOMEN'S CLUB OF PORTSMOUTH — left to right Mrs. E. F. Marsh (817), secretary; Mrs. A. E. Roach (762), treasurer; Mrs. J. E. Hale (801), vice-president; and Mrs. J. D. Delabar (851), president.

from home environment, yet should not be incarcerated.

The club was represented at a Portsmouth City Council meeting when all civic organizations were asked to help find a solution to the city's financial difficulties. Members attended the initial planning meeting of the River Days' Celebration

Committee. The club was in charge of a dinner in October for the Shawnee Juvenile Service Council. In addition, the group has maintained a liaison, both on the old council for retarded children and on the newly formed Parents Board for the children, so they can be kept informed of the needs of the school.

Mrs. Charles W. Beaumont (D-560) is the outgoing president.

Goodyear's Act Of Patriotism Creates Widespread Goodwill

The fact that Goodyear did not sell a synthetic plant to Communist Romania is a perfect example of "True Americanism."

We seem to see so very little of "Americanism" these days that Goodyear's act stood out like a soft rain on a dry summer's day.

As you read in last month's Clan, Goodyear refused to sell a synthetic rubber plant to a Communist country, even though the State Department had approved the sale. Such a transaction, the Company felt, would not be in the best interest of the nation and the Free World.

Goodyear's decision had a profound affect on many American people. Letters were received from shareholders, the heads of companies, a U. S. senator and countless "average" citizens.

A letter from a Brooklyn man read as follows: "May I, as a veteran, offer you my Silver Star Medal with an Oak Leaf cluster for your gallant decision not to do business with the Communists."

Many people who have invested their savings in Goodyear stock expressed their gratitude to the company in such words as these:

"As a shareholder, and an American citizen I am proud that you took the patriotic and honorable stand in refusing to deliver strategic information to Communist Romania."

Some of the writers hit home in earthly language, as did this resident of New York:

"It took what I call a lot of 'American guts' and courage to refuse the offer, but a feeling of pride and respect was felt by our family when we read it."

Thus the letters ran, making the point that the writers would purchase Goodyear tires and other products in the future in appreciation of the company's action. Here are excerpts from typical letters:

"For me and mine, if it doesn't have the Goodyear trademark, it isn't good enough."

"I, for one, will buy, when needed, a new set of tires for my car and make sure that the Goodyear name is on them because I know that America is also written in that name."

"Once again congratulations and when the man asks me why I want a Goodyear product I'll tell him about your action. I'm sick and tired of doing business with people who are selling us out, so my New Year's resolution will be if the company helps Communism I'll buy elsewhere . . ."

And so they went, heart-warming comments that continue to reassure the company that it had made the right decision in foregoing the immediate profit to be gained from selling technology to the Communists in favor of the best interests of freedom-loving peoples everywhere.

Lauxterman Retires From GAT February 1

L. F. Lauxterman retires from the Goodyear Atomic Corporation on Feb. 1, 1965.

Lou is an "oldtimer" as far as the company is concerned as he came to GAT in May, 1953. Quiet and reserved, Lou is "efficiency plus" as he methodically carries out his responsibilities which include the preparation of, and keeping current, job descriptions for all classifications, determining proper hourly and salary rate levels, and performing a continuous audit to maintain equity between salary classifications.

With a broad background of accounting and business administration, in 1943, Lauxterman entered the field of wage and salary administration with Schenley Industries. Other industries in Cincinnati where he was employed were General Electric and Cincinnati Ordinance.

During his time with Goodyear Atomic, Lou and a small group of wage and salary administrators formed the Ohio Wage and Salary Association. Because of an increased membership the organization became the Midwest Compensation Association. It is now called the American Compensation Association.

Mr. and Mrs. Lauxterman have three children. Two daughters are married and live in Columbus. A son who graduated from the University of Dayton in January 1963, is now employed at Detroit Edison.

Lou's plans for the future are indefinite. He would like to keep active in a permanent position with another industry, or he may try the field as a consultant.

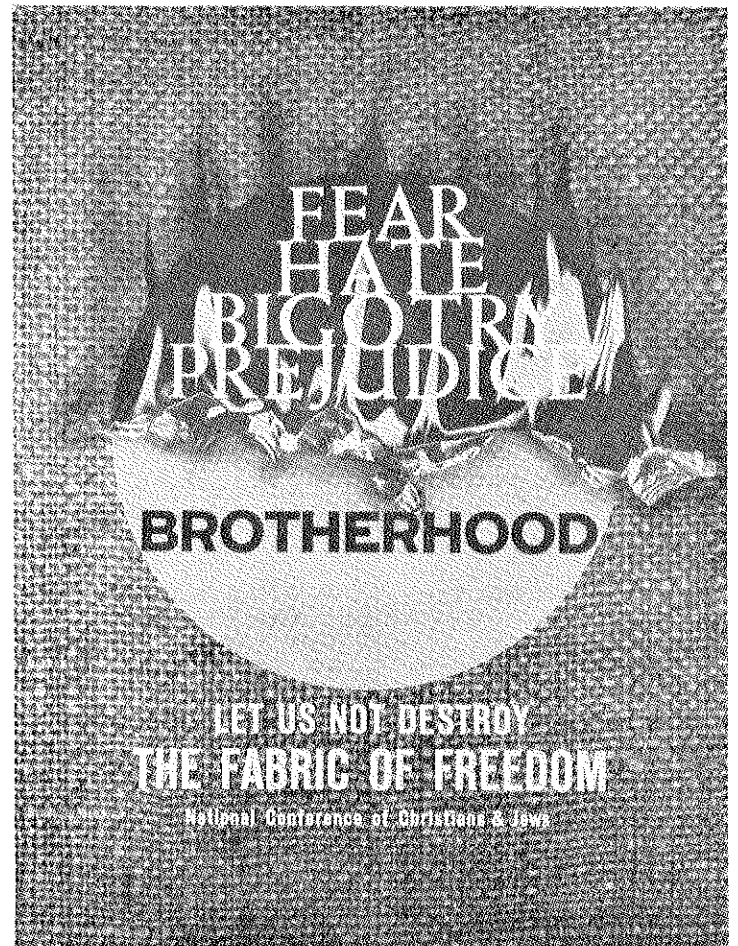

L. F. LAUXTERMAN

AEC Will Construct Cancer Center Unit

The Atomic Energy Commission's Oak Ridge Operations has opened bids for the construction of facilities to be used in a joint federal agency effort to determine the cause or causes of cancer.

Work under the project will include the remodeling of three floors of an existing building at the Y-12 Plant here to provide laboratories, animal quarters, related service areas and offices, including the installation of laboratory furniture and equipment. The project also calls for the construction of a two-story service annex, and an elevated, enclosed walkway.

The first three floors of the building will contain some 37,000 square

Make It Brotherhood Year Throughout 1965

A National Inventory

Brotherhood Week is a time of national inventory. It is a time when every citizen is encouraged to evaluate the progress we as individuals and as a nation have made toward a better way of life for all, not in any materialistic sense but in the humanistic and Judaeo-Christian spirit of universal Brotherhood.

In such an inventory, we can justly be proud of our accomplishments during the past year, but we cannot afford to rest on these laurels.

Through the democratic processes of representative government, Americans have faced up to a major regional, national, yes, even international problem and have taken decisive steps toward its resolution. Guided by the moral and ethical principles of religion and our democratic heritage, bi-partisan action by the Congress of the United States has removed a burning social issue from the realm of debate.

The passage of the Civil Rights Act has upheld as the law of the land that all Americans are entitled to full citizenship rights. The problem of race relations now shifts from one ideology to that of adaptation.

That complex task of translating the law into constructive attitudes, habits and practices will have to be undertaken. How much wisdom the white and Negro citizens bring to this task will determine our own civic health and will certainly have repercussions, good or bad, throughout this troubled world. We all have a great deal to learn, both minority and majority groups alike. A sense of community must be built devoid of resentment on the one hand or a sense of guilt on the other, for these are backward looking emotions, and our objective and that of the National Conference of Christians and Jews is to build a better future.

This is one of the great challenges of Brotherhood Week 1965. The way of brotherhood is to seek understanding through respect and good will in the faith and knowledge that all men, no matter what their race, creed or national origin, are brothers under the fatherhood of God. Just as we seek to be understood, let us give that same understanding to one another.

feet of floor area. The top floor of the building has already been completed and contains other laboratories and equipment to be used in the project.

The completed research laboratory will provide facilities for biochemical, pathologic, and microbiology studies to be performed by the Biology Division of Oak Ridge National Laboratory under a joint program between the Atomic Energy Commission and the National Cancer Institute.

Employees Reminded Of Company Dance

Don't forget the dance at the Elks Club in Chillicothe on Saturday, Jan. 30.

Joe Childers and his orchestra will play from 9:00 p. m. to 1:00 a. m.

The cost of the tickets is \$2 per couple and will be made available at the door.

United States ATOMIC ENERGY COMMISSION Oak Ridge Operations

Office of the Manager

Oak Ridge, Tennessee
December 18, 1964

Mr. G. H. Reynolds
General Manager
Goodyear Atomic Corporation
P. O. Box 628
Piketon, Ohio

Dear Bud:

Each year at this time it is a pleasure to be able to commend you and your employees for an outstanding performance in carrying out the Commission's programs assigned to Oak Ridge Operations.

A review of our accomplishments during 1964 shows continuing progress towards the objectives of the Atomic Energy Commission. During the year you have met new situations with initiative and ingenuity, and your operations have been performed in an efficient and economical manner.

As we approach the new year, it is reassuring to be able to depend upon your continuing resourcefulness and cooperation. I extend to you, and each member of your organization, my warmest wishes for an enjoyable holiday season and continuing success in the challenging year ahead.

Sincerely,

/s/ S. R. Sapirie

THE SAFETY CORNER

The Safety Slogan Contest is entering its ninth year. It has changed from two awards a month to one a month with the addition of the now popular Safety Poster Caption Contest.

During the past year there were 538 safety slogan entries and 649 poster caption entries.

All employees and members of their families are eligible to participate, and may submit as many entries as they wish. Entry blanks are available at all portals and on most bulletin boards throughout the plant. It's fun for the entire family and could be profitable.

Each month a ten dollar award is given for the best safety slogan and a ten dollar award for the best poster caption. Annually, a \$100 merchandise certificate is awarded to the two persons whose safety slogan and safety caption entries are judged the best.

Better try it — you may be a winner.

JANUARY WINNERS

SLOGAN

CAPTION

"Drive wise and save lives." "A courtesy they will remember long past December."

The slogans below were the monthly winners for 1964. From this group the annual winner was selected. The committee had a difficult time deciding which slogan was the best, but finally selected the one submitted by A. M. Talda, "Take Time To Take Care."

NO MATTER HOW YOU SEASON IT,
COMMON SENSE IS THE SPICE OF SAFETY

— A. P. Romero

MY SAFETY, TOO, DEPENDS ON YOU

— W. C. Lauderbach

SAFETY CANNOT BE MEASURED IN INCHES,
BUT IS A GOOD RULE

— A. P. Romero, J. W. Wood

SAFETY — A MIRROR OF SOUND PLANNING

— W. S. Fleshman

THE KEY TO SAFETY LOCKS THE DOOR TO DANGER

— J. G. Ewing

STOP

GO

FLIRTING WITH HAZARDS STEADY WITH SAFETY

— W. S. Fleshman

SAFETY SAVES DOLLARS AND MAKES SENSE

— A. P. Romero

SAFETY IS THE KEY NOTE TO A HAPPY TUNE

— E. E. Wilburn

THERE'S ONLY ONE ANGLE TO SAFETY — THE RIGHT ANGLE

— G. L. Gundlah

KNOW THE VALUE OF SAFETY AND THE PRICE OF HAZARDS

— A. P. Romero

TAKE TIME TO TAKE CARE

— A. M. Talda

THE WAY TO BREAK A BAD SAFETY HABIT IS TO DROP IT

— J. G. Ewing

THE WINNER RECEIVES HIS PRIZE. A. M. Talda, instrument maintenance, second from right, is the proud owner of the tape recorder presented to him at a luncheon last week. The presentation was made by W. A. Brown, far right, manager of plant engineering and maintenance division. Because his safety slogan was judged the best slogan submitted in 1964, Talda was awarded a \$100 merchandise gift. He selected a recorder. Others who viewed the presentation were D. W. Doner, far left, manager of industrial relations division and G. H. Reynolds, second from left, general manager.

Activities Period Each Monday Night At Waverly North

An activities night for men employees is being held at the Waverly North Elementary School gymnasium each Monday night.

The activities consist of volleyball, basketball, physical exercises, etc.

The program starts at 5:30 p. m. and continues until 9:00 p. m. All who attend may participate for any period of time they so desire.

Those who care to join in the fun need only to report to the gymnasium with tennis shoes, shorts and towel.

TENTH ANNIVERSARY

The following employees will complete ten years of continuous service with Goodyear Atomic Corporation this month:

- | | |
|-----------------|----------------------|
| D. L. Clark | R. M. Kennard |
| K. L. Ritchie | D. L. Scott |
| H. G. Morkassel | E. C. Schletzer, Jr. |
| A. D. Smith | K. E. Beu |
| M. T. Sparks | C. Campbell |
| H. H. Hurley | J. C. Franklin |

Engagements

Miss Regina Arthur, works laboratory, has announced her engagement to Mr. Cecil Harris. The couple became engaged on Dec. 25, 1964.

Miscellaneous Items Will Be Sold Feb. 5

Goodyear Atomic Corporation will offer for sale on Feb. 5, 1965, the following property:

- 32 desks, wooden, executive and steno type; 1 metal cabinet safe; 2 wooden picnic tables; 2 wood frame settees; and 1 lot of miscellaneous furniture, such as chairs, tables, etc.

The sale will be held at Warehouse No. 15. Bid forms will be available at the site. Inspection of the property will be permitted on Feb. 1, 2, 3, 4 and 5, from 8:00 a.m. to 2:00 p.m.

The property will be sold "as is—f.o.b. conveyance."

CLASSIFIEDS

FOR SALE

52 Gal. electric hot water heater. 3 years old—like new. Telephone Chillicothe 772-4640.

1964 Plymouth Sport Fury. Hard top. Power brakes and steering. Air-Cond. \$2995. Telephone Portsmouth EL 3-4006.

1961 Thunderbird. Power brakes and steering. \$1825. Telephone Waverly 947-2030.

1964 Olds F85. Deluxe 4-door. Cutlass engine. Power steering and brakes. Telephone Chillicothe 774-1340.

1958 Chev., Belair, V-8, automatic. 2-door hardtop. Price \$450.00. Telephone Minford STate 4-5174.

1961 Ford, Fairlane, 6 cyl. std. shift. 38,000 actual miles. Price \$975. Telephone Minford STate 4-5174.

'Round The World

Goodyear's Competitors

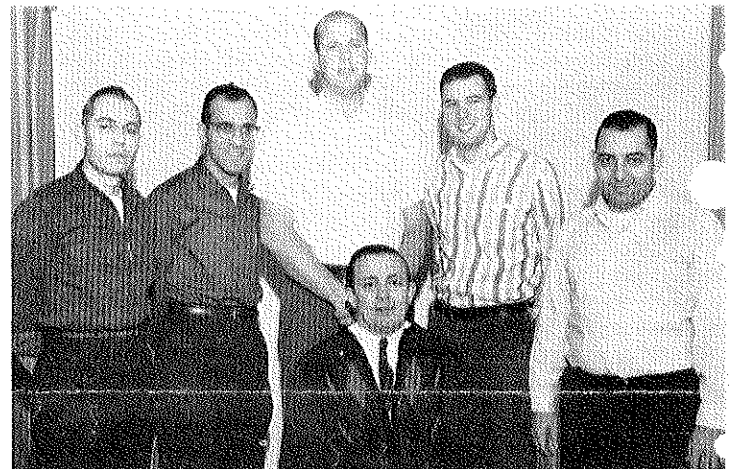

Firestone has signed an agreement with Romania to build a synthetic rubber plant, marking the first time American private industry has directly entered a Communist nation since World War II. Cost of the facility would be in the neighborhood of \$40 million, it was reported.

Lee National announced it is closing its tire manufacturing plant in Conshohocken, Pa. The company said the decision was made by the board after fruitless negotiations to end a strike that had kept the plant shut for nearly a year and a half. The company said it would continue

to market and distribute Lee tires made for it by other manufacturers.

Cities Service said it has signed an agreement with Goodrich to market Goodrich tires, batteries and accessories through its dealers in southern states. The Goodrich will be handled in addition to the Goodyear line, Cities Service officials said.

Firestone acknowledged its proposed acquisition of the tire division of Seiberling. Terms were not disclosed, but trade sources estimate the transaction at around \$35 million. The sale is subject to federal government approval.

THE CHAMPIONSHIP TEAM in the Waverly volleyball league was the Celtics. Members of the winning team were: Seated, Dick Spaeth, captain; left to right, Elmer Litteral, Charles Trivisonno, Lee Canterbury, Jim Vitte-toe and Ollie Vita.

Halfway Winners Announced

Bowling Leagues Complete First Half

The bowling leagues have completed one half of the 1964-65 season. The winners of the first half of play in each league are as follows:

Bowlerettes	Alley Gats	Rockets
Virginia McDonald	Margaret McNaughton	Paul Cravens
Marian Shawkey	Ingrid Bridwell	Ken Ralston
Dawn Bettasso	Dolores Hoover	Dick Jones
Helen Koons	Rita Dobbins	Bob Shoaf
	Eileen Ward	John Carr
Pin Busters	Rayon's	Laboratory
Cliff Thomas	Judy Ray	Joe Thoms
Elwood Martin	Andy Ondera	John Henry
Lou Donini	Charles Ray	Frank Voss
Dick Dever	Marge Ondera	Perry Dalouis
Al Roach		Giles Kauffman
