GAT Picnic Committee Reports All Systems "GO" For July 27

Saturday, July 27 — Camden Park promises to be a fun filled day for all GAT employes and their families when they attend Goodyear's 16th annual company picnic.

The 1968 picnic committee is working hard to make this year's picnic the best ever. New ideas have been combined with old picnic favorites to provide more fun for the family.

For several years, picnickers have had the problem of over-crowded conditions. One major reason for the crowded conditions is that a few employes extend an open invitation to their friends and neighbors.

Again this year as in the past, the picnic committee has established the rule that only GAT employes, their families and house guests are eligible to attend the picnic. This rule will be closely observed this year.

Several steps have been taken to help control unauthorized park entry.

A special letter was sent to all employes requesting they observe the rule; one admission ticket per family will be issued; committee representatives will be assigned to park entrances and all employes

40-Year Veteran Completes Career

H. H. (Mike) Stoops rounds out his 40+ year career with Goodyear when he retires June 28.

Approximately 100 of Mike's friends and associates gathered Friday, June 21, to honor him and pay tribute to his lifetime career with Goodyear. Several gifts were presented to Mike and Mrs. (Mary) Stoops and a special portfolio was unveiled which recalled the countless hours Mike donated as a volunteer member of picnic, Christmas party, golf and other committees and activities.

Mike joined The Goodyear Tire and Rubber Company January 24, 1928, as a member of the production squadron.

In 1941, he transferred to the purchasing department at Goodyear Aerospace. He was in charge of the expediting section until 1946 when he transferred to Goodyear International Corp. In 1947, he was promoted to assistant manager of Goodyear International's merchandise distribution department.

Mike transferred to Goodyear Atomic in 1953 as a member of standard practice. He is currently supervisor, administrative services.

will be required to register their house guests.

Opening festivities will get underway at 11:15 a.m. with a Dixieland beat. The Dixieland group, composed of outstanding players from the Ceredo-Kenova High School Band, is under the direction of Charles Oshel. Oshel's talented youngsters have put together a music filled program that everyone will enjoy.

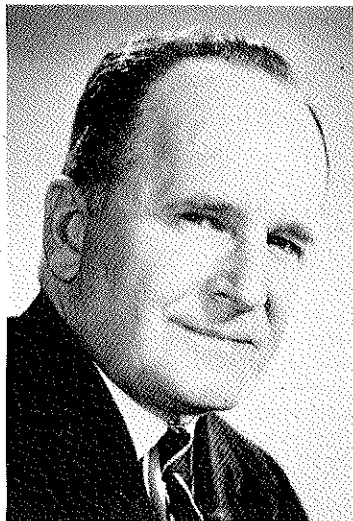

As in the past Camden Park has been reserved and all rides will be free for the five-hour period from 12:00 noon until 5:00 p.m.

Other activities which have been popular in the years past are planned: adult games, bingo, games by the safety department and an intra league putting contest will set the stage for the grand drawing.

Members of the safety department have come up with a Match The Picture Contest. Prizes will be given away during the day to contestants with a sharp eye.

Contestants in the intra league putting competition will tee off at 12:00 noon. Prizes will be awarded to the winners and their league.

AEC is providing a special treat to picnickers. "Power Unlimited" the newest exhibit of the United States Atomic Energy Commission will be on display throughout the day.

H. H. "Mike" Stoops

An active member of the Elks for many years, Mike has served as Exalted Ruler, District Deputy and is currently on the Board of Trustees.

For the past 12 years he has been active in the Scioto County United Fund and has just finished his fourth

(Continued on Page 2)

"Power Unlimited" consists of 12 panels covering the present and future uses of nuclear energy as a source of limitless power on land, under the sea, and in the vast, uncharted regions of outer space.

The ever popular adult games will get started at 1:00 p.m. with prizes awarded to winners of the different games. Highlights of the adult games will be the hilarious water balloon toss. The games will again be held in the open area behind the cafeteria.

Number calling for bingo will begin at 2:30 p.m. Twenty attractive prizes will be awarded to GAT employes covering the proper squares.

The day will be climaxed with the grand drawing which will be held at 4:00 p.m. immediately following bingo. Seventeen prizes will be drawn. Fifteen adult prizes ranging from TVs to blenders and as a special treat bicycles will be awarded to two children.

The schedule of the day's activities are:

10:30 a.m. — Park Opens

11:15-12:00 — Dixieland Band concert

12:00-2:30 p.m. — Safety Department Match The Picture Contest

12:00-5:00 p.m. — Free amusement rides

12:00-12:45 — Putting Contest

1:00- 2:15 — Adult Games

2:30- 4:00 — Bingo (adults only)

4:00 — Grand Drawing

To be eligible for the adult grand drawing prizes an employe must be present or must have worked on July 27. GAT employes' children from ages 8 to 16 are eligible to enter the bicycle drawing. Blank entry forms will be available at the main entrance.

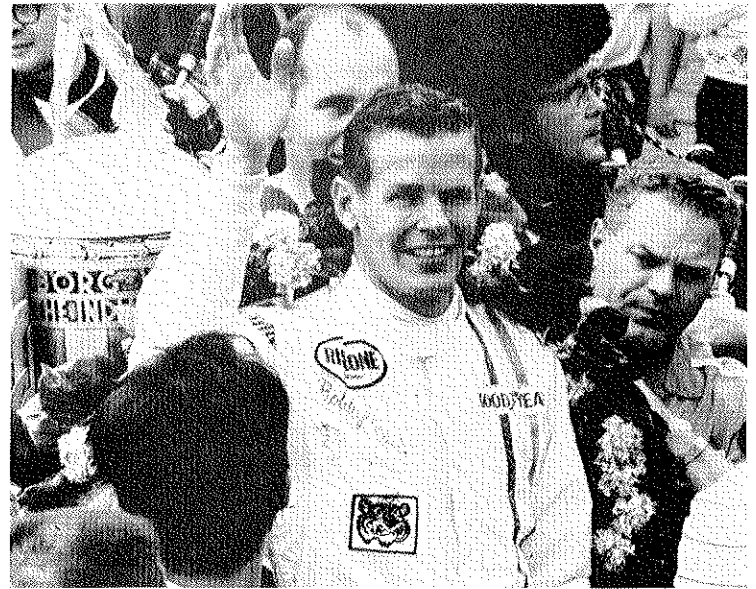

Grand drawing tickets will also serve as admission tickets for each employe and his family. Once inside the main entrance drawing tickets should be deposited in the designated container.

Employes working on the day of the picnic and whose family will be unable to attend should turn their grand drawing tickets into the shift superintendent's office no later than 3:00 p.m., July 25.

Special problems occurring during the day will be handled by members of the picnic committee.

The 1968 picnic committee extends a cordial invitation to each employe and his family to attend this year's outing with the hope that each will have a fun-filled day.

SEE YOU JULY 27TH!

THE WINNER — Bobby Unser, who drove his turbo-charged Eagle Offenhauser to victory on Goodyear tires in the Indianapolis "500" on Memorial Day, appears in the winner's circle. The first four finishers and seven of the first 10 were riding on Goodyear tires.

"500" Winners Ride On Goodyear Tires

When Bobby Unser steered his Goodyear-equipped Eagle Offenhauser into the winner's circle following the Indianapolis "500" on Memorial Day, he made believers out of doubters and led Goodyear to its finest racing hour.

Without having to make a single tire change despite the grueling race, Unser was somewhat of a Pied Piper as he led Goodyear-shod racers to a 1-2-3-4 finish. In fact, seven of the first 10 finishers used Goodyear tires.

Dan Gurney, Mel Kenyon and Dennis Hulme followed Unser under the checkered flag. The showing was Goodyear's most impressive since its re-entry into Indy competition in 1964.

The "Doubting Thomases" and the oddsmakers gave Unser, and drivers of other piston-driven cars, little chance of winning.

Instead, the "smart money" was on

cars of peppery owner Andy Granatelli. Neither of the three turbine cars, all on competitive tires finished the race.

One of them, however, was piloted by Joe Leonard to an early lead and was a serious threat until the last eight laps. The car then quit.

Unser, taking the lead from Leonard early, consistently turned in the fastest lap speeds of the race and led for more laps than any other driver. His overall time was an Indy record, 152.882 miles per hour.

Completing Goodyear's conquest were Ronnie Duman, in sixth place; Mike Mosley, eighth, and Sam Sessions, ninth.

The welcome mat will be out for GAT employes July 15 and 16 when the bloodmobile makes its semi-annual plantsite visit.

As usual facilities will be set up in the south wing of the X-100 Building on July 15 from 12:00 to 6 p.m. and July 16 from 7:00 a.m. until 1:00 p.m.

Goodyearites are urged to accept the welcoming invitation to contribute to themselves through GAT's blood program.

For further information please call extension 2158.

Plan Ahead For Your Retirement

(Editor's Note: This is the first in a series of articles dealing with retirement for the many Goodyear Atomic pensioners, for employes nearing retirement and for those who want to plan ahead.)

Retirement years often are called the golden years. But many pensioners would agree the gold could turn to iron pyrite, fool's gold, without proper retirement planning.

Sometime during 1968, Goodyear's companywide pension rolls will swell to 10,000. As of last month, there were 22 who had retired from GAT and are receiving pensions.

Making the best use of the company's benefits, Social Security, and other retirement programs demands careful consideration and planning.

You say you're in your 40's and not particularly worried yet about retirement. Planning for retirement, particularly the financial aspects, should begin years before an employe enters his sixties. At least you should become aware of how much outside income you'll have, along with how much income your years of company service will bring on your Goodyear pension check.

Financial problems could be solved, for instance, by a part-time job. From retirement at age 65, or even 62, until age 72, anyone receiving Social Security benefits may earn up to \$1,680 per year and still receive maximum benefits under Social Security.

The \$1,680 ceiling includes income from actual work — service rendered to an employer. It does not include income derived from the Goodyear pension, annuities, rental properties, interest or dividends.

After age 72, a pensioner may earn as much as he desires without losing Social Security benefits.

To be considered, too, are the pensioner's non-financial needs. Volunteer work and recreation clubs are available to retired employes. Retirement can mean time for travel, or it can mean unhealthy inactivity. Just because a pensioner can take it easy and get plenty of sleep, it does not

mean he should neglect his health habits.

Without the need to follow regular schedule, a retired employe's exercise and eating habits can become erratic and a detriment to good health. More frequent medical examinations can stop serious trouble before it starts.

The subject of housing during retirement years is important. If the pensioner owns his own home, he can stay where he is, move into rental property to avoid the trouble and expense of maintenance, or move into a retirement home in a resort development.

Services and advice for pensioners — and soon-to-be pensioners — are usually available from social service agencies, counseling firms, churches, veterans groups and other organizations.

(Next: Investments for Retirement).

Blood Program Asks Your Help

None of us want to be in the position where we will need blood, but who knows when the problem may occur. It is through our company blood program that the blood is there "Just In Case".

In our last GAT bloodmobile visit a total of 160 pints of blood was contributed. This is the least number of pints received in 14 years and extremely close to the minimum required to maintain our blood bank participation.

In December, twenty GAT donations requested their blood be used for non-employe replacement. Replacement blood is accepted, however donors should realize it does not count toward GAT's blood program.

Our blood program depends entirely upon individual participation. Only your donation will assure that an adequate supply is available.

Let's make a special effort to visit the bloodmobile July 15 and 16 and take a co-worker with you.

Editorial Comment

We seem to be living in a period in history filled with unusual turmoil and unrest. During the past two years, civil disorder, rioting, looting and lawlessness has resulted in many injuries, hundreds of deaths and an untold loss of property.

Already this year we have witnessed more examples of this discontent in the assassinations of Dr. Martin Luther King and Senator Robert F. Kennedy. We are witnessing more student demonstrations, revolt against college administrators and defiance of law and order.

Violence is continuing to erupt throughout the land.

We as citizens cannot afford to stand by while the foundations of our freedom are threatened. Fortunately in these days of turmoil we have influences that are both stabilizing and constructive.

Here at GAT we have many employes working toward the development of our youth. Little League, Boy Scouts, Girl Scouts, church youth groups, Junior Achievement, YMCA, YWCA and 4-H clubs are just a few of those organizations that guide our children to become better citizens.

We as parents and citizens can do two things to help curtail this lawlessness:

1. By helping our young people develop the old-fashioned principles of fair play, teamwork and sound moral values.
2. By working and living together in harmony we can contribute toward a better community and help build a better nation.

Employes Named Nuclear Managers

The Officers and Executive Committee of the Institute of Nuclear Materials designated C. D. Tabor, Manager of the Technical Division and Deputy General Manager, and Jon S. Murrell, Uranium Control, as Certified Nuclear Materials Managers, at a meeting in Chicago, on May 12. This action established that they met the educational and diversified responsibilities required of the Institute, and will conduct themselves in accordance with the code of ethics of the Institute of Nuclear Materials Management.

Currently, there are seven employes at Goodyear Atomic who are members of the Institute: A. H. Wernecke, V. J. DeVito, J. S. Murrell, J. A. McBride, F. S. Voss, M. Bruno, and C. D. Tabor.

H. H. Stoops

(Continued from Page 1)

term as President of the Board of Trustees. He was recently named Executive Secretary of the U.F. and will assume full responsibility of the office August 1.

In 1966, Mike was recipient of the Distinguished Citizen Award presented by the Portsmouth Junior Chamber of Commerce. In addition he is a member of the Silver Compass Club, Aurora Lodge F&AM, York Rite, Shrine, and second vice president of the Portsmouth Shrine Club.

Mike and Mary Stoops reside at 2233 McKinley Avenue. They are members of Trinity Methodist Church where Mike is a member of the Board of Trustees. Mrs. Stoops is a past president of the Goodyear Women's Club in Portsmouth.

EPS HOLDS 150TH MEETING. Management has long recognized the need for plantwide direction of emergency situations. To accomplish this a group of plant personnel with specialized knowledge and training were appointed to serve as members of an emergency planning staff. This group is responsible for evaluating potential emergencies, to take the necessary precautions to prevent recurrence of such emergencies and to make adequate recommendations for handling them. Through the years the EPS has proved to be a most unique and

important committee to the operation of our plant and has functioned in a manner to effectively cope with all emergency situations. On April 24, the staff conducted its 150th meeting. Members of the staff attending the meeting are (first row, l to r) J. M. Pieper, D-103, Genie Gundlach, D-110, G. H. Reynolds, general manager, G. F. Cooke, D-101, W. B. Thompson, D-817, (2nd row) C. L. French, D-228, J. R. Shoemaker, D-560, J. A. Brackett, D-761, R. F. Channel, D-110, D. B. Jones, D-852, H. B. Lehman, D-210, M. Hartle, D-710, and B. Kalmon, D-212

Bond Rates Up

The boost from 4.15 per cent to 4.25 per cent on regular Series I bonds is seen by General Manager G. H. Reynolds as further incentive for employes to purchase bond through payroll deduction.

The interest rate on Freedom Shares, which mature in 4 1/2 year compared with seven years for Series E Bonds, has been increased to 5 per cent. The old rate was 4.75 per cent.

The new interest rates automatically apply to bonds previously purchased, as well as to future purchases.

Review of Labor Relations

The following arbitration awards were received from Marlin M. Volz who acted as arbitrator and heard the cases April 9-10.

GRIEVANCE I-36-66

Grievance: In this case, the Union protested the use of two welders in welding together a test pan, claiming a sheetmetal mechanic should have been assigned to help the welder. The Union contends that for the past fourteen years it has always been the practice for pans of all shapes and sizes to be fabricated in the Sheet Metal Shop. The Company disputes the Union's conclusions as to past practice and cites past grievance activity.

Discussion: In enforcing both the past practice and job description standards, the practicalities of a large, departmentalized industrial operation must be recognized. Here, the Sheet Metal classification has not acquired exclusive jurisdiction over the task of assisting a Welder, even though the test pan was largely made of sheet metal. It was conceded that employees in other classifications have and do assist a Welder in holding in place pieces of metal. The work involved in holding such pieces related as much to welding as to sheet metal work; it, therefore, fell within the area of overlap.

Award: Grievance I-36-66 must be, and is, denied.

GRIEVANCE I-37-66

Grievance: This grievance protested the Maintenance Mechanic classification replacement of a fan housing on the X-705 facility roof which involved bolting in place. In the arbitration hearing, the Union further asserted repair of the housing elbow and replacement of bird screen. The Union maintains that this fan housing and duct work originally was installed by Sheet Metal workers; that in the past Sheet Metal employees have been responsible for the repair of fan housings since they are made of sheet metal; that their job description defines one of their duties as installing and repairing equipment constructed of sheet metal; and that the work of repairing the seams on

the elbow, of cutting and installing the bird screen, and of bolting it to its mounting fell within their classification. The Company takes the position that the work of removing and replacing fan housing on buildings has always been the work of the maintenance mechanic classification.

Discussion: If the only work involved was the removal and replacement of a fan housing, Sheet Metal employees would have no cause to complain. However, in the instant case more was involved. The seams of a sheet metal elbow required repair, and a bird screen was cut out and installed. The Arbitrator finds that the bolting of the fan housing to its mount was not necessarily part of the repair of the elbow or of the installation of the bird screen. Past practice has not established such bolting as the exclusive work of Sheet Metal Mechanics. Maintenance Mechanics also have done such work in the past.

Award: For the misassignment of the two items of work in question the next two Sheet Metal Men in line for overtime are each to be granted two hours' pay at one and one-half times his regular rate.

GRIEVANCE I-38-66

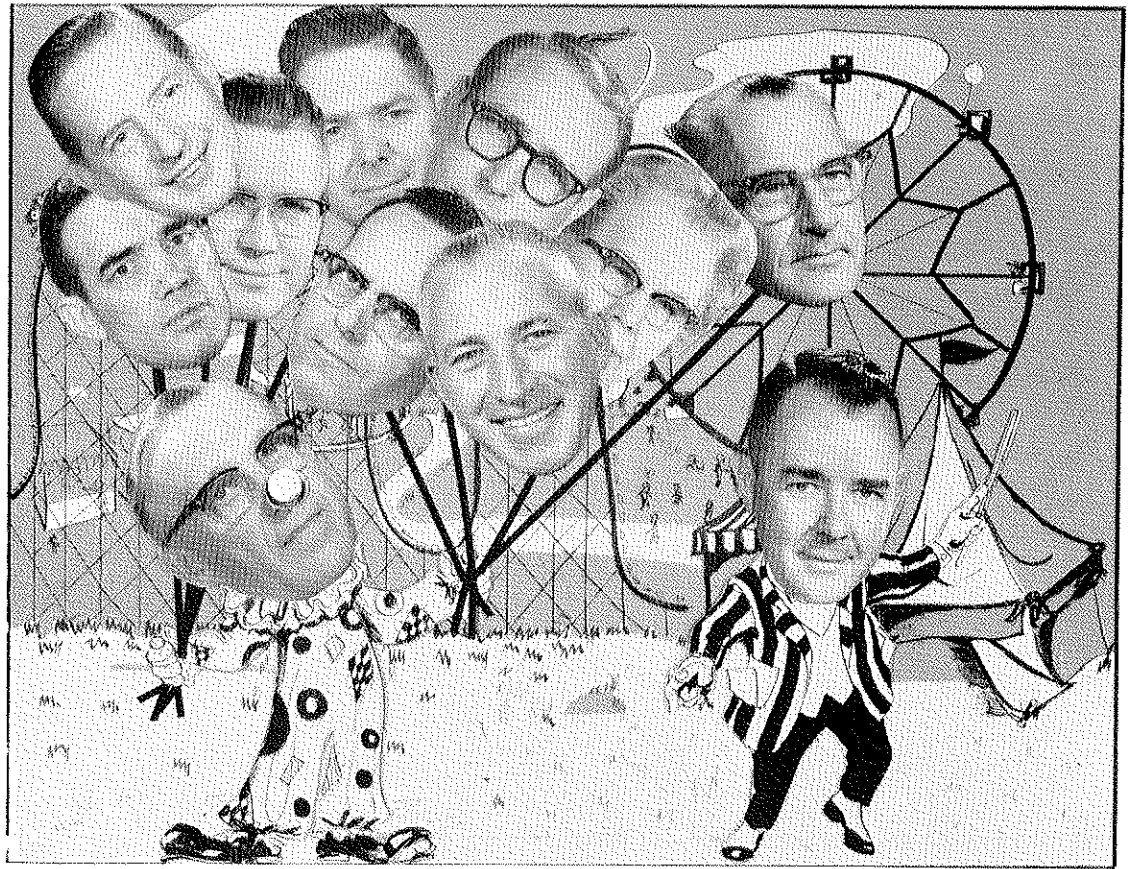

Grievance: The Union protest Maintenance Mechanic classification removing the metal covering on a cold trap for the purpose of locating a leak. The Union contends that Sheet Metal workers originally fabricated and installed the metal covering on the cold trap in question and that they should have been given the task of removing it. The Company asserts that the Sheet Metal Mechanic's responsibility with respect to the metal covering on a cold trap is limited to initial fabrication, maintenance thereto, or modification thereof.

Discussion: In this case part of the metal covering on the cold trap was removed, not for its repair or

1968 PICNIC COMMITTEE members who organized this year's outing are: General Co-Chairmen — Peg Ellsesser (D-701) and Gordon Johnson (D-224); Grand Drawing — Bob Rutherford (D-801) and Frank Valentine (D-810); Tickets — Maurice Trowbridge (D-375); Safety — Les Oyler (D-228); First Aid — Dr. Harold Lehman (D-210) and Helen Lewis (D-211); Photographer — Harley Cantwell (D-375); Adult games — Bob Holland (D-553), Jack Crawford (D-858), Bill Beaumont (D-560); Bingo — Joe Rhea (D-112), D. J. Blanton (D-224), Frank Wood (D-761), Del Prickett (D-224); Admission and Identification — Joe Parker (D-711), Marian Shawkey (D-301), M. G. Webb (D-761), Clair Langebrake (D-533). (Not pictured) John Gedeon (D-224) and Dr. H. B. Lehman (D-210).

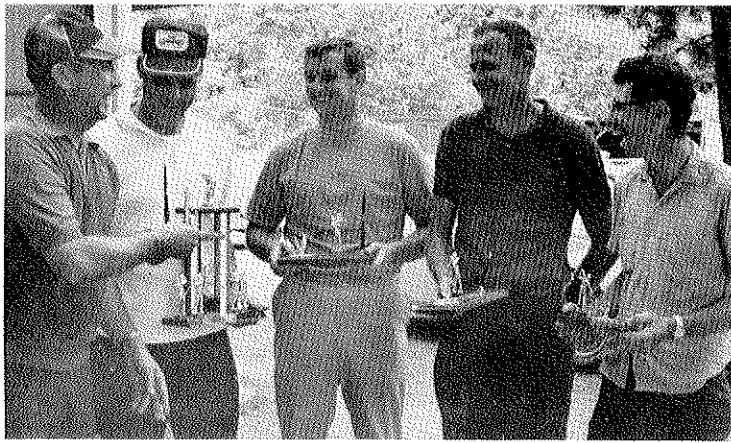

LIGHT AND SHADOWS — Camera bug Steve Kohut, plant engineering, focused in on top honors in the annual competition of the Cambridge Camera Club of Columbus. Independent judges chose Steve's photos first and third place out of some 60 entries. His top winner Lights and Shadows (above) was taken in natural light with a 35mm Exakta camera.

GT&R To Build Ashland Plant

Goodyear Tire will build a \$1-million plant in Ashland, Ohio, for production of a growing line of adhesives, Russell DeYoung, chairman and executive officer, has announced.

Plans for the integrated facilities are part of an expanding marketing program designed to give the Goodyear Chemical Division an increasingly important role in the fast-growing adhesives industry, DeYoung explained.

The plant, to be constructed on 22.5 acres of farm land at the north edge of Ashland, will improve technical service and distribution to customers by combining development, production, marketing and merchandise control activities in one facility, DeYoung said. In addition, substantial improvements in operating efficiency and product quality will be achieved in a plant designed specifically for production of adhesives.

CHAMPIONSHIP FORM was shown by GAT golfers when they shot the lowest score in the Second Annual Goodyear Southeastern Ohio Open Golf Tournament held in Logan, Ohio. Seventy golfers representing five Goodyear plants located in Logan, St. Mary's, Point Pleasant, Jackson and Goodyear Atomic participated in the tourney. Tom Johnson, Logan personnel manager, presented the championship trophies to members of the winning team (l to r) Joe Thoms (D-533); Ron Hall (D-514); Dick Entler (D-561); and Fred Hohorst (D-521). Miles Bruno (D-551) won second place handicap honors.

Labor Relations

(Continued from Page 3)

modification or for its use in sheet metal fabrication, lay-out, installation or assembly, but for the purpose of enabling Maintenance Mechanics to locate the source of a leak and to repair it. The nature and purpose of the work in question, and not which classification originally fabricated and installed the item, must control its assignment.

Award: Grievance 1-38-66 must be, and is, denied.

GRIEVANCE 1-42-66

Grievance: The Union protests the assignment of the Truck Driver classification doing work of the Laborer classification. Two charges were made in moving snow frames, one in shoveling calcium and one of spreading gravel.

Discussion: As to the hauling of snow frames on October 10 and 19, 1967, the grievance must be denied. By the words "certain work" in Section 2 of Article XV, the parties must have meant a category of work and not a specific task performed by a particular method. Laborers have not established by past practice an exclusive claim to such work, although they may have moved snow frames in the past. Such task is related as much to that of Truck Driver as to that of Laborer.

Shoveling involved in the load-

ing and unloading of trucks may fall in the area of overlap between the Truck Driver and Laborer classifications. It was shown that Laborers in the past had shoveled out the large lumps from the calcium pile. It was not established that Truck Drivers had done so before.

With respect to spreading gravel on the berm of a road, the Company may eliminate a workman from a crew where his duties have been eliminated by authorized technological changes. Here, the spreader installed on the truck eliminated the duties of the Laborer who formerly had operated the lift gate to release the gravel. But spreading gravel with a shovel is the work of the Laborer.

Award: For the work in question performed by Truck Drivers on October 18, 1967, the next two Laborers in line for overtime are granted four hours' pay each at time and one half.

Tie Tac Available

A new service award — a tie tac — for employes has been announced.

The new choice brings the total number of service award selections to five: pin, bracelet, necklace, tie bar and now the tie tac. The tac is available for all future service awards of five through 50 years.

In Memoriam

JAMES EDWARD HURN

James Edward Hurn, Sr. died May 14, 1968, at Lucasville, Ohio, after an extended illness. Jim joined Goodyear in September, 1953. He was employed in D-712 at the time of his death. He is survived by his widow, Mrs. Ester Hurn, three sons and four daughters.

Mrs. Bernice Wilson died June 3, 1968, at Holzer Hospital in Galipolis. A daughter, Mrs. Ruth Haydon, is employed in D-101.

CLASSIFIEDS

FOR SALE

1968 Mercury Comet convertible, 6 cylinder, good shape. Call Piketon 289-5052.

AM, FM and stereo multiplex tuner and 75 watt per channel stereo amplifier. 1967 model Silver-tone, all solid state units with individual walnut cabinets. Used very little. \$150. See Bob Cutler, Route 2, Waverly.

Girls' 24" Bike, \$15. Boys' 26" Bike, \$25. Mini Bike, \$85. All in good condition. Call Chillicothe 774-7567.

1963 Pontiac LeMans, sport coupe, V8, air conditioned, standard shift, excellent condition, 40,000 actual miles. Call Piketon 289-3395.

Sale of Surplus Government Property

Goodyear Atomic Corporation will sell the property described below by sealed bid at 1:00 p.m. EDT on July 12, 1968 at our surplus and salvage warehouse No. 15.

The property consists of the following:

- 10 ea. Trucks, pickup, 1959 & 1960
- 3 ea. Sedans, 1959 & 1960
- 1 ea. Tractor, towing
- 1 ea. Forklift, 2000 lbs.
- 2 ea. Lawnmowers
- 2 ea. Sickle Bars
- 1 ea. Street Sweeper
- 1 ea. Floor Sweeper
- 8 ea. ARC Welders
- 1 ea. Metal Lathe
- 1 ea. Pipe Threader
- 1 ea. Industrial Washer
- 1 ea. IBM Key Punch
- 3 ea. IBM Verifier
- 3 ea. Film Protectors
- 1 ea. Tape Recorder
- 1 ea. Sight Screener
- 1 ea. Metabolor

Several lots of electronic and laboratory instruments; amplifiers, recorders, meters, panels, relays, batteries, tires, cabinets, filters and miscellaneous hardware.

Bid forms will be furnished at the site during inspection or will be mailed upon request. A bid deposit of 20% in the form prescribed in the Invitation to Bid is required.

Inspection will be permitted on Monday through Friday, July 1, through July 11, 1968, from 8:00 a.m. to 2:00 p.m. EDT, and July 12, 1968, from 8:00 a.m. to 1:00 p.m., Saturdays, Sundays, and holidays (July 4) are excluded.

New Arrivals

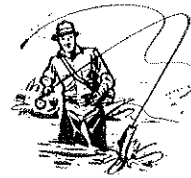

Mr. and Mrs. R. D. McDermott, D-761, daughter, Barbara Jo.

Mr. and Mrs. D. P. DeLong, D-858, daughter, Christy Elaine.

Mr. and Mrs. Rodney Collingsworth, D-761, daughter, Julie Anne.

"Go ahead—check the records—this is the first time my uncle Charley's passed away on opening day!"

Sports In Short

GAT golfers will be hitting away at the Chillicothe JC Golf Course or July 20 when the first 18 holes of the 1968 company golf championship gets underway. A peccia golf tourney and playday are other activities that are planned along with the championship action.

All GAT male employes are eligible and will automatically be competing for the championship title, when they tee off July 20.

The Chillicothe JC's have generously agreed to limit play to GAT golfers only until all foursome have started on the back nine. Tee off times are available from 7:00 a.m. to 9:00 a.m. on a first come, first served basis. Times may be reserved by calling recreation.

The final round of the 36 hole company championship along with Flight Championship play, is scheduled for September 14 at the Portsmouth Elks Country Club.

Thanksgiving came in May for Bill Welch (l) and Eddie Evans when they were successful in stalking two of the twenty wild turkeys killed in Ohio in 1968. Bill and Eddie got their gobblers while hunting in the Scioto Trail State Forest with Dick Varney, process operations. Both kills were made with 12 gauge shotguns and each bird weighed in excess of 19 pounds. Both men are employed in process operations.

When the Olympic torch heralds the opening of the 1968 games in Mexico City in October, Goodyear will be represented among the athletes.

Two members of Goodyear's amateur basketball team, which this past season won 33 of 39 games in national amateur play, have been selected for the U. S. Olympic squad.

They are Calvin Fowler and Jim King. Fowler, a 6-1 guard and Goodyear captain, played college basketball at St. Francis in Loretto, Pa. King, a 6-7 forward, played his college basketball at Oklahoma State.

Another Goodyear player, 6-11 center Tom Black, was chosen an alternate for the Olympic team and will suit up if any member of the team is unable to play.

Goodyear coach Hank Vaughn was picked to serve as assistant coach of the Olympic cage squad.

Eric Humston, son of Capt. F. P. Humston, police department, was honored recently at the annual Muskingum College All Sports Banquet.

Eric, a defensive end in Football and a sprinter on the Track Team, was named Muskingum's Outstanding Freshman Athlete.

Humston showed great promise in his first year by winning a starting berth on the Football Team which had nine victories and only one defeat. Capt. Humston noted that his son is also a good student having made the Dean's list this semester.
