Number 8

WHAT'S YOUR NUMBER?? Ever wonder "what goes" with those new painted numbers and recently installed telephones in the X-206B (X-100) parking lot. Well stop wondering; it's GAT's latest method of keeping track of you. The painted numbers are gathering points for

divisional personnel in the X-100 building in case of evacuation. The telephones are for use by divisional representatives to report personnel accountability. Although all eyes are on Connie Nourse (D-501), that's Art Smith (D-726) doing the painting.

New Personnel Evacuation Plan Goes Into Operation

A lot of questions have been asked about the new telephones and freshly painted numbers in the X-206B parking lot adjacent to X-100 building. Like most mysteries, their solution is simple:

The nine painted numbers are areas designated for personnel in each division when the administration building is evacuated. Seven of these numbers are for 100, 200, 300, 400, 700, and 800 division personnel

with two painted areas assigned to credit union and AEC personnel.

Do you know **WHAT TO DO** or **WHERE TO GO** if you are in the administration building (X-100) and the evacuation horn is sounded?

WHAT TO DO? — Classified materials should be placed in approved repositories before evacuating the building if it is possible to do so without jeopardizing one's life or safety. In event you are prevented from locking up classified materials, keep them in your possession until such time as they can be placed into safe custody.

WHERE TO GO? — Leave the building promptly, by the route and exits indicated on the evacuation plan displayed on bulletin boards, and proceed to the designated assembly areas in the main parking lot (X-206B) east of the X-100 building. That is what the numbers painted on the parking lot are for. Assemble in your division area and report to your immediate supervisor, so in the event of a personnel accountability he can account for his employees to the divisional representative. The divisional representative will use the telephones mounted on the light poles to contact his alternate reporting point and/or the police communications office.

WHAT TO DO? — If you are away from your X-100 home base and a plantwide personnel accountability is called, there will be no one in your section to receive your reporting call since the building has been evacuated.

Alternate reporting points for each division have been established:

- 100 Division — Verification Office.
- 200 Division — Hospital
- 300 Division — Telephone Operator
- 400 Division — X-720 Receiving
- 500 Division — X-710 Mass spectrometry shift supervisor
- 700 Division — X-720 Alma Coriell
- 800 Division — X-300 Power Coordinator

So if you are away from your home office and you call back to report and no one answers, report to your alternate reporting point.

Next time the evacuation horn sounds off we hope you know what to do and where to go.

Goodyear To Host College Teachers

Goodyear is taking part in a nationwide program designed to help teachers from predominately Negro universities gain first-hand knowledge of the business world.

Working in conjunction with the National Urban League, Goodyear is host in Akron to three college professors for six-week periods this summer. The salaries of the three are paid by Goodyear. The Summer Fellowship Program will provide a close look inside industry.

The three professors under the program are Walter Floyd, a professor of chemistry at Bethune-Cookman College, Daytona Beach, Fla.; Gilbert Senter, a professor of chemistry at Tennessee A & I State University, Nashville, Tenn. and S. C. Shah, a professor of engineering at Southern University, Baton Rouge, Louisiana.

Flow Of Blood Is Excellent With 202 Pints Collected

Through the years Goodyearites have learned that support of their blood program is essential to each employe. On July 14 and 15 they upheld their reputation for generosity when employes from every section of the plant took time out to contribute 202 pints of their life-giving blood.

A close look at the figures reveals 231 employes signed up to donate. One hundred and four were accepted the first day and 98 the second. To those unable to contribute goes a sincere thanks for trying.

Employes on 4-12 and midnight shifts boosted the total count by donating 29 pints.

By responding to the appeal for blood, Goodyearites once again guaranteed enough replacement blood to fill the needs for each employe, his family, parents, parents-in-law, and all GAT retired employes and their spouses.

"I"deas Submitted To AEC

Max Coryell, special assistant to the general manager, reports that during the just concluded six-month period, seventy-five Cost Reduction "I"deas have been submitted for evaluation. Thirty-five of these were favorably evaluated and are in the process of being implemented. Twenty-one of these "I"deas were classified as cost reduction actions and are included in the Semi-annual Report of Cost Reduction Actions to Atomic Energy Commission for the period ending June 30, 1969.

Keep those "I"deas coming in!

Goodyear In 22nd Place

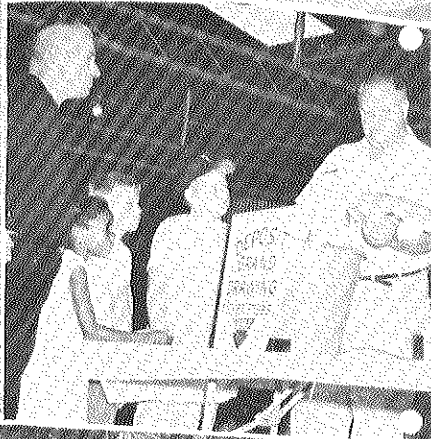

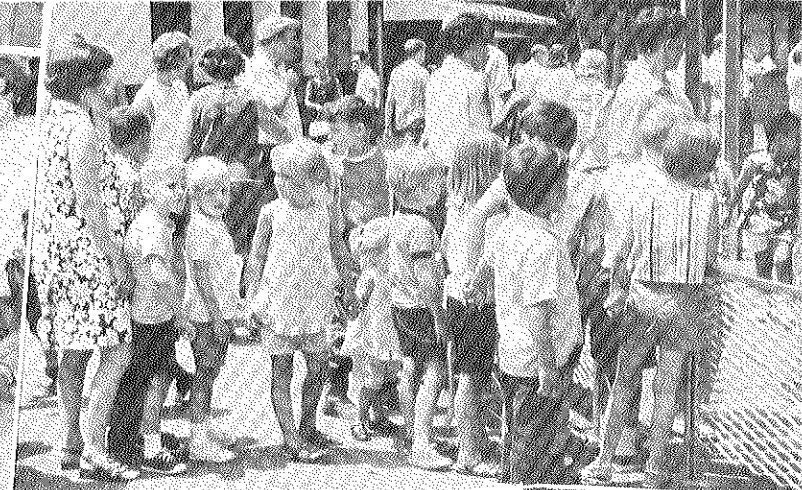

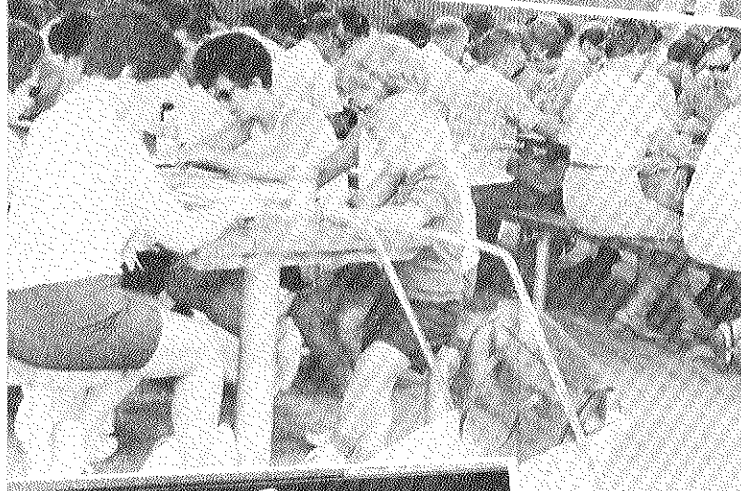

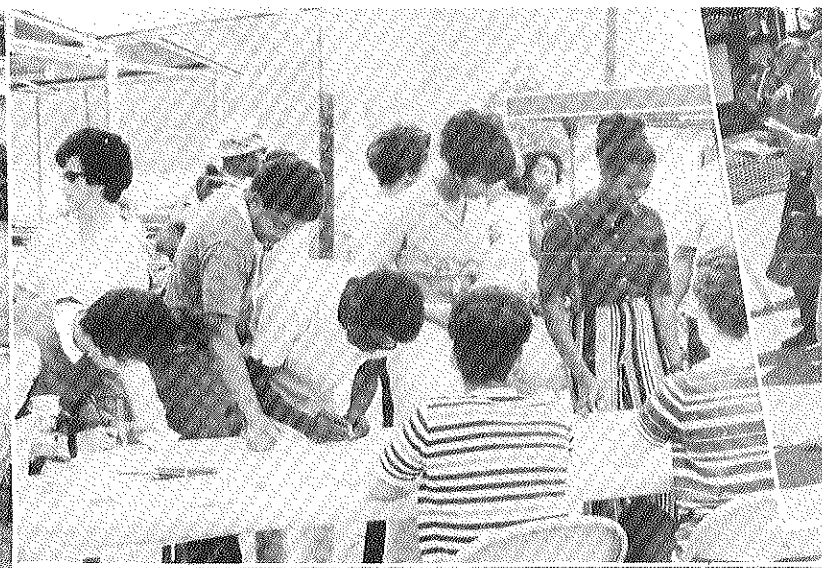

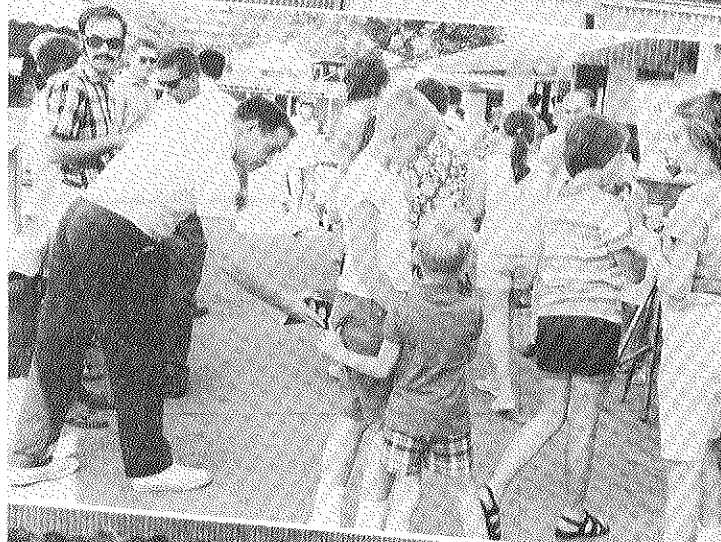

Fortune magazine's directory of the nation's 500 largest industrial corporations, based on 1968 sales, shows Goodyear in 22nd place — the same position it held the year before.

Firestone advanced from 37th to 36th place, Uniroyal jumped from 63rd to 60th, Goodrich moved from 83rd to 82nd and General slipped seven slots, from 90th down to 97th.

Full Slate Of Activities Set For Golf Championship

Company golfers can look forward to the biggest day of the year Saturday, September 6 where they vie for championship honors at the JC Golf Course in Chillicothe.

The Chillicothe Jaycees have generously agreed to close the course to make possible the many events planned by the golf committee, Foreman's Club and members of the Chillicothe league.

The day's activities will begin when the first foursome tees off at 7:30 a. m. and will continue through the evening when the Foreman's Club holds a Smoker-Poker.

Golf action of a less serious nature will be on tap after the golf championship's when members of the golf committee and Foreman's Club will conduct pitching, putting, and driving contests.

Time-out from contests will be called when members of the Chillicothe league serve food and refreshments.

Activities will continue throughout the evening when GAT Foreman's Club sponsors a Smoker-Poker.

Flight championships will be awarded to the golfer shooting the

lowest score in each flight. Flight assignments are based on league or club averages.

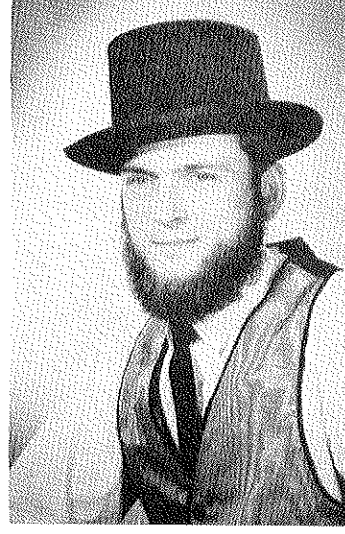

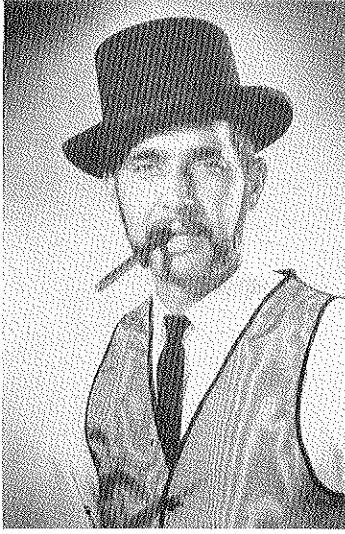

The company championship is a 36-hole tourney. Employees competing in the first 18 holes at the Portsmouth Elks Club July 26 are eligible for the company championship.

The person shooting the lowest score for the 36 holes will be company champion; second lowest score will be company runner-up.

Shift personnel unable to play September 6 can make special arrangements to play earlier by contacting Recreation.

To help relieve overcrowded conditions morning and afternoon golf sessions will be held with no tee off times in between. Chillicothe golfers are encouraged to save the afternoon tee off times for out of town golfers.

Starting times for both morning and afternoon sessions are available through Recreation on a first come first served basis.

THE DAPPER DANS you see above are GAT employees that got that way to help the Lucasville area commemorate their sesquicentennial celebration. Several other GAT employees are sporting similar brushpiles but were too shy to pose for the cameras. Brothers of the Brush are l to r (top) John Wolford, D-112; Fred Sullivan, D-816; Jack Hehl, D-858; (Bottom) Jake Bell, D-858; and Bob Stambaugh, D-551.

"America" To See State Fair

Like old soldiers, old blimps never die. They just lose their gas. That is the fate of the oldest of the Goodyear blimps which has made its final trip home.

The Columbia, which has been based in Los Angeles, arrived last month at Goodyear's blimp spawning ground at Wingfoot Lake, south-east of Akron.

The journey home ended six years of service that has seen the 160-foot long aerial giant log more than 300,000 miles in trips from coast-to-coast and border-to-border.

Goodyear, which has built 299 airships in Akron since 1917, will

put a new and larger airship into service later this year and it will adopt the name Columbia. The docking of the Columbia left only one blimp, the Mayflower, based in Miami, Fla., in active service until the commissioning of the new \$2.5-million blimp, the America.

The America is expected to make an appearance at Ohio State Fair August 21-Sept. 1 before being headquartered in Houston, Texas.

Miss Deborah K. Bradley and Mr. Gregory E. Barch were married June 28 at the First Presbyterian Church in Waverly.

Mrs. Barch is the daughter of Colleen Bradley, D-227. Mr. Barch is an employe of D-761.

Miss Anne Wagner and Mr. Ralph Wilcoxon were married May 15 at St. Raehfields Church, Springfield, Ohio. Mr. Wilcoxon is employed in D-761.

Miss Judith Pegley and Lt. Alfred G. Zangri pledged marriage vows June 14 at Santa Rosa Church in San Fernando, California. Lt. Zangri is the son of S. J. Zangri, D-532.

Miss Wilma Baer and Mr. Paul Hieneman were married May 10 at Bloem Frezwill Baptist Church in Wheelersburg. Mrs. Hieneman is an employe of D-514.

Miss Mary Anne Waddell and Mr. Dan Sainopulos were married June 7 at Trinity Methodist Church in Portsmouth. Mr. Sainopulos is employed in D-554.

Miss Judith Kay Keller and Mr. Roger Fischer pledged vows June 7 at Blessed Sacrament in Covington, Kentucky. Mr. Fischer is an employe of D-352.

Miss Gail L. Wood and Mr. Stephen K. Battle were married July 12, at the Pleasant Green Baptist Church in Portsmouth. Mr. Battle is an employe of D-222.
