BE SECURITY CONSCIOUS

Project Personnel To Participate In Observance Of Engineers Week

Plans were completed on February 2 by the program committee of the Portsmouth Chapter of the Ohio State Society of Professional Engineers to observe National Engineers Week in Portsmouth from February 21 through 27.

Included on the week-long itinerary of activities will be a panel discussion by personnel of the Atomic Energy Commission, Goodyear Atomic Corporation and Peter Kiewit Sons' Co. This panel discussion and others will be carried over Portsmouth radio stations. J. P. Carr, director of the PKS Contract Awards Department, will act as moderator of one panel discussion which will be carried over Station WPAY on February 25, at 9:00 P. M.

Other members on the panel will be W. C. Young, Jr., Chief Operations Division, Atomic Energy Commission, C. L. Bell, Manager of the Engineering and Procurement Unit, Peter Kiewit Sons' Co., and G. H. Reynolds, Production Manager of the Goodyear Atomic Corporation.

Honorable Harry E. "Huck" Foehr, mayor of Portsmouth, will issue an official proclamation commemorating National Engineers Week in Portsmouth.

All professional engineers employed on the Portsmouth Area project are cordially invited to attend regular meetings of the Portsmouth Chapter of the Ohio State Engineers Society, held on the first Wednesday of each month at 7:00 P. M. at the Wilmore Tea Room in Portsmouth.

— **THINK SAFETY** —
Better to lose a minute and save a life,
Than to save a minute and lose a life.

BRANCH SCHOOLS PLANNED FOR ARMY RESERVE OFFICERS

All Army reserve officers employed on the Portsmouth Area project interested in attending a branch school of the Columbus Military Area to be held at the jobsite evenings are urged to send their name, rank, serial number and address as soon as possible to C. E. Coles, AEC Construction Branch, or telephone Extension 2624.

Officials stated that a Command and General Staff Branch School will be opened on March 1. Classes will be held in the center wing of the Personnel Building and will begin at 5:30 P. M. If sufficient interest is shown in other fields additional schools will be instituted.

Point credit received as a result of attending these schools will count toward establishing eligibility for retirement and promotion.

KOCH EMPLOYEES ENJOY PARTY

Over 130 employees of Geo. Koch Sons, Inc., and their guests enjoyed a successful dinner-dance last Saturday night, February 13, at the Lake White club.

Between dinner and the dancing session those in attendance were entertained by a short program with Charley Parkinson acting as master of ceremonies. One of the featured acts was a magic show presented by Resident Manager G. Ashburn Koch.

J. H. "Jake" Frowine served as chairman of the general committee for the event.

Pictured above are employees of the American Bridge Division of the United States Steel Corporation working on a structural steel fabrication and erection contract on the Portsmouth Area AEC project. In the top photo from left to right are: Timekeeper Warren Lorenzen, Assistant Superintendent Robert Anderson, Superintendent A. B. "Art" Drilling, Field Engineer W. O. Jayne, Assistant Timekeeper John Mullens and Safety Engineer W. W. Clasen. In the middle picture employees of the "yard crew" are shown at a weekly safety talk and in the lower photo workers of the erection group are pictured at a similar session being conducted by Safety Engineer Walt Clasen.

AMERICAN BRIDGE DIVISION USING NEW PROCESS OF STRUCTURAL STEEL ERECTION ON BIG JOB HERE

Rapidly progressing in its phase of construction on one of the large process buildings on the Portsmouth Area project is the American Bridge Division of the United States Steel Corporation.

American Bridge, under Superintendent A. B. "Art" Drilling, has a five and one-half million dollar plus contract for structural steel erection and fabrication.

A total of 160 men are working for American Bridge on the job that will see the division erect over 20,000 tons of steel in completing its contract.

Superintendent Drilling said

the entire steel erection work was being done with the use of the new high-tensile bolt process. Over 400,000 of these high-carbon content bolts will be used in the building of the huge process structure.

Utilizing the high-tensile bolt process, the building will be completed without the use of rivets. Drilling explained that a major feature in employing the new system enabled less experienced personnel to be trained for the job in a shorter period of time than it would take to secure and train competent riveters.

The basic principle of the

bolted joint is to clamp steel together tightly enough to hold the loads by friction. This is accomplished by the use of the tensile bolt containing a high amount of carbon.

High-tensile bolting has three distinct advantages—adaptability, strength and economy. Bolting is also the fastest method of steel erection. High-tensile bolts properly installed are fasteners with a permanence equaling the life of the structure.

The American Bridge Division of U. S. Steel on the Portsmouth job operates out of Pittsburgh. The steel being erected

WHY NOT TALK ABOUT IT?

It is sometimes difficult to understand why we are cautioned not to talk about the job when we read so much about it in the newspapers. You occasionally hear the remark, "If they print all this information so everybody can read it, why worry about what I say? I learn more about the job after I get home at night than I do during the day."

But there is an important difference. You see, news releases are carefully screened before being cleared for publication. This screening is done by men who make security their business. They know what information is of a secret nature and what isn't.

It would be impossible for us to make these decisions because we aren't well enough posted on the facts back of them. Consequently, the best way for us to protect ourselves and live up to the trust placed in us by our government is to avoid discussing our work with anyone. "See it Here, Hear it Here, and Leave it Here" is a sound course of action and the best insurance policy for our national defense.

George C. Holling, General Manager
 Peter Kiewit Sons' Co.
 Portsmouth Area AEC Project

FIRE PREVENTION
 by
LT. ROBERT McNISH

It is easy to invite explosions and fires with flammable products. Gasoline is liquid dynamite. One gallon, vaporized and mixed with the air, has the same explosive force as 87 pounds of dynamite. It gives off fumes at all temperatures down to 45 degrees below zero, which are always dangerous. Kerosene requires very little heat (100 degrees—less than that of the immediate after glow of a blow-out match) to form flammable vapors.

Here are some examples of how to invite horrible premature deaths, burns, or serious fire losses:

1. By using hazardous types of containers, such as glass jars or open buckets for transferring flammable liquids.
2. Filling fuel tanks of internal combustion engines, stoves, heaters or blowtorches when equipment is hot or operating.
3. Failure to promptly repair or discard damaged or leaky equipment.
4. Use of products that vaporize readily, like gasoline or naphtha, for cleaning purposes.
5. Spraying with flammable petroleum products in the presence of open flames, lighted cigarettes or pipes.
6. The use of gasoline, fuels or kerosene to start fires in stoves or heaters.
7. Failure to keep poisonous petroleum products out of children's reach. Many children have lost their lives drinking gasoline or kerosene.
8. Failure to be prepared in case a fire does start.

EMPLOYEES MAY BE DUE REFUND ON F. I. C. A. TAX

In answer to a large number of inquiries by project employees to the Portsmouth Office of the Social Security Administration, Manager John Chatfield supplied THE ATOMIZER with the following information regarding the social security or F. I. C. A. tax withheld from employees' wages during 1953.

"When you file your income tax return for 1953, be sure to take credit for any overpayment of Social Security Tax. If you have worked for more than one employer during the year it is possible that you may have paid social security deductions on more than \$3,600 for the year. If your forms W-2 show that more than \$54.00 social security tax was withheld, this over-payment can be taken into account when your income tax is filed. This overpayment is added to additional income tax due, or to any refund coming back to you.

"Payment of the social security tax on more than \$3,600 wages for any one year will not result in any greater benefits to the wage earner. Therefore, if the adjustment is not made on the annual income tax return for any overpayment of tax, the amount of this overpayment is lost to the taxpayer.

"Questions concerning these tax adjustments should be directed to the Bureau of Internal Revenue, New Federal Building, Columbus, Ohio, or to the local agent's offices in the Post Office Buildings at Portsmouth or Chillicothe."

MEMORY GEMS

- Be brief—politely
- Be aggressive—tactfully
- Be emphatic—pleasantly
- Be positive—diplomatically
- Be right—graciously

Although it may not be quite this bad all the time, Chief General Clerk Dave Hopkins of the PKS Building Services Division pictures himself attempting to handle the numerous telephone requests directed to Building Services daily. At right Project Services Department Director O. H. "Ollie" Folsom (left) is pictured with Building Services Division Chief W. H. "Bill" Quillin.

Hundreds Of Jobs Completed By Building Services

An all-important factor in the construction of the Portsmouth Area AEC project is the many services performed by the PKS Building Services Division, which is a part of the Project Services Department.

The Building Services Division, headed by Chief William H. "Bill" Quillin, employs approximately 340 persons working three shifts around the clock seven days a week, in its maintenance of all temporary buildings on the jobsite.

Personnel making up this division include sheet metal workers, teamsters, carpenters, laborers, electricians, plumbers, janitors, boiler and pump operators, and operating engineers.

Since the division was originated in January of 1953, over 4,000 major work orders were completed in a year's time. In addition to major jobs, Building Services handles an estimated 5,000 miscellaneous odd-jobs each week through its maintenance personnel.

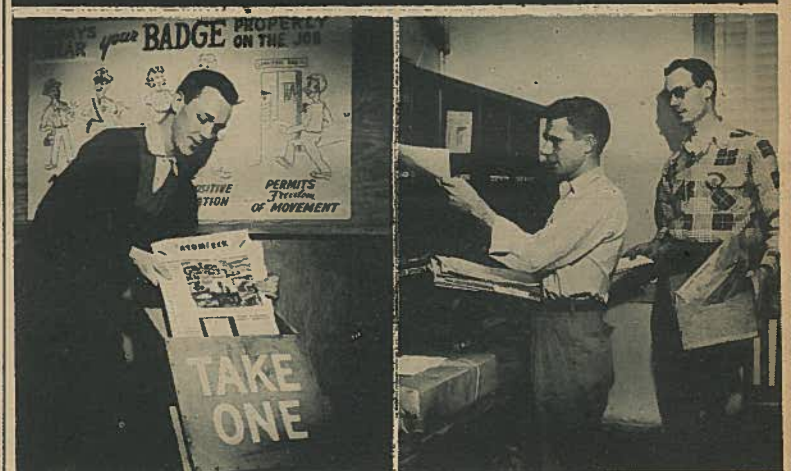

Chief General Clerk Dave Hopkins (see picture) estimates a total of 200 telephone calls reach the division office daily requesting some type of maintenance work or repair.

A few of the major responsibilities of the Building Services Division include the maintenance of some 80 furnaces and 400 oil heaters on the area, the repair and moving of all office and building furniture, repair of temporary buildings, maintenance and repair of electrical service, clocks and lights, and the operation of the project water system.

Additional general maintenance and service completed daily by this division includes the operation of the salvage yard and burning pit, servicing of over 400 drinking water barrels, cleaning and upkeep of all rest rooms and the cleaning of offices and waxing of floors in the Administration and Personnel Buildings, which have approximately 500,000 feet of floor space.

The above mentioned are but a few of the many jobs and services performed by the Building Services Division.

In addition to Chief Quillin, top division personnel include Assistant Craft Superintendent Fred Fletcher, Superintendent of Labor Phillip Cox, Superintendent of Sanitation William Addis and the second shift Superintendent James Hewitt.

Handling many jobs for the PKS Operations Unit are these employees of the Unit Office Services Department headed by Lee Gramm. In the top picture "Neda" Clark (left) and Helen Miller talk over a problem with acting department head Lee Gramm. In the lower left photo Jim West places copies of THE ATOMIZER in an Administration Building distribution box, and lower right Don Adams (left) is pictured sorting Operations Unit mail while George Stone prepares to make a delivery.

Unit Office Services Department Is Important Part Of Operations

An all important phase of work performed by Peter Kiewit Sons' Co. Operations Unit is handled by its Unit Office Services Department under the supervision of Lee Gramm.

On the long list of duties handled by Unit Office Services is the pick-up and distribution of thousands of pieces of Operations Unit mail each day, maintenance of unit files and distribution of daily weather forecasts prepared by the AEC weather station on the project.

Unit Office Services also handles the distribution of THE ATOMIZER throughout the entire area every publication day, an incidental to its activities. Persons not receiving a copy of the paper are requested to contact the Unit Office Services Department located in the Administration Building.

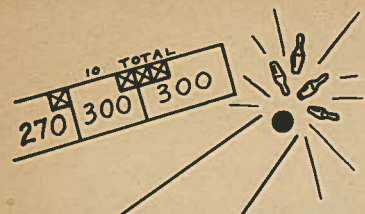

Mail is picked up and deliv-

ered by this department every half hour in the Administration Building and every hour in the Personnel Building and in the "field". Another task performed is locating employees who have had personal mail sent to the project without jobsite location listed.

Many forms originated by the Operations Unit are kept by Unit Office Services, in addition to the servicing of unit files.

OSU ALUMNI BANQUET FEB. 23

All Ohio State University alumni are invited to attend the annual Portsmouth Chapter banquet to be held at the All Saints Church at 6:30 P. M. on February 23. Persons wishing to attend should contact Mrs. Richard Brunner at Portsmouth 4-0249.

Leading the American Division teams in the PKS Recreation Division's Project Basketball League are the Clerks (pictured above) with seven wins and no losses. Left to right are: Player-coach "Chuck" Rodgers, Howard Stewart, Don Kegley, Walt DeLotelle, Jerry Dressler and Gaylord Kennedy. Absent when the picture was taken was Gary Born.

Clerks, Expediting Remain Unbeaten In Project Basketball Competition

The Clerks and Expediting remain on the schedule and another win by the Clerks and Expediting will assure either team of at least a tie in their division. League Director Jack Feck announced a playoff between the American and National division winners will follow the end of league play.

The Clerks and Expediting continued to roll along undefeated in the PKS Recreation Division's Basketball League with seven wins, but both were hard pressed to eke out victories in recent games.

In the National League, Expediting copped its sixth win, taking a 49-48 triumph from Warehouse "C". Dick Miller of Expediting and Don Samsal of Warehouse "C" each hit for 23 points to take scoring honors for the night.

The National loop leaders had little trouble in posting their seventh win, rolling over Contract Awards 52-39. Fred Brandenburg paced Expediting with 22 markers while Wayne Cooper led the losers with 19.

Coach "Chuck" Rodgers' Clerks racked up their sixth American League win, downing Procurement Control 51 - 43. Don Kegley and Walt DeLotelle led the winners with 14 points each. "Kentucky" Bob Ziegfried also tossed in 14 markers to top the losers' scoring.

The Clerks experienced a close call in gaining their seventh victory, edging by an improved Fuel Department quint 37-35. Kegley again led the Clerks with 17 tallies with DeLotelle adding 12. Trusty and Gilmore each garnered nine for the Fuel Department.

Three weeks of league play

remain on the schedule and another win by the Clerks and Expediting will assure either team of at least a tie in their division. League Director Jack Feck announced a playoff between the American and National division winners will follow the end of league play.

JOHNNY LATTNER TO SPEAK AT ND AWARDS DINNER

A limited number of tickets are available at THE ATOMIZER office for the annual Notre Dame High School Athletic Awards banquet to be held in the new Notre Dame school gym on Monday, March 1, at 6:30 P. M.

Principal speaker at the dinner will be the University of Notre Dame's great All-American football star Johnny Lattner. In addition to Lattner's address awards will be made to members of Notre Dame's Titan athletic teams.

Due to the limited number of ducats available employees desiring to attend are requested to contact THE ATOMIZER office in the Personnel Building or call Extension 2887 as soon as possible. Tickets are priced at \$2.50 each.

World's Champion Match Bowlers To Appear At Classic

The world's match game bowling champions, Strohs of Detroit, will appear at the Classic Lanes in Portsmouth on February 27 at 9:00 P. M., it has been announced by Virgil Akers, manager of the Classic.

Strohs will compete in an exhibition match against an All-Star team of keglers selected from top-flight league bowlers in Portsmouth. There will be no admission charge.

Last year Strohs, captained by the famed "Buzz" Frazio, won the world match title and copped its eighth national championship in the past 20 years. During that time the team has won over 500 medals and trophies.

In addition to Frazio the other members of Stroh's famous team include Lee Jouglard, Tom Hennessey, Tony Lindeman, Pete Carter and Ed Lubanski. Strohs is managed by Carl Peters who is currently in his 13th year with the team.

Frazio and Lubanski were selected on Mort Luby's 1952-53 All-American bowling team, and Jouglard holds the world's record of 776 pins for a three game series.

FEB. 22 IS DEADLINE FOR SWEEPSTAKES

Final arrangements have been completed for the first annual PKS Bowling Sweepstakes, sponsored by the PKS Recreation Division, to be held on Sunday, February 28 and Sunday, March 7, at the Classic Bowling Lanes in Portsmouth.

Team events are scheduled for February 28, at 3:30 and 8:00 P. M. Singles and doubles matches are set for the March 7 session at 3:30, 4:15 and 8:00 P. M.

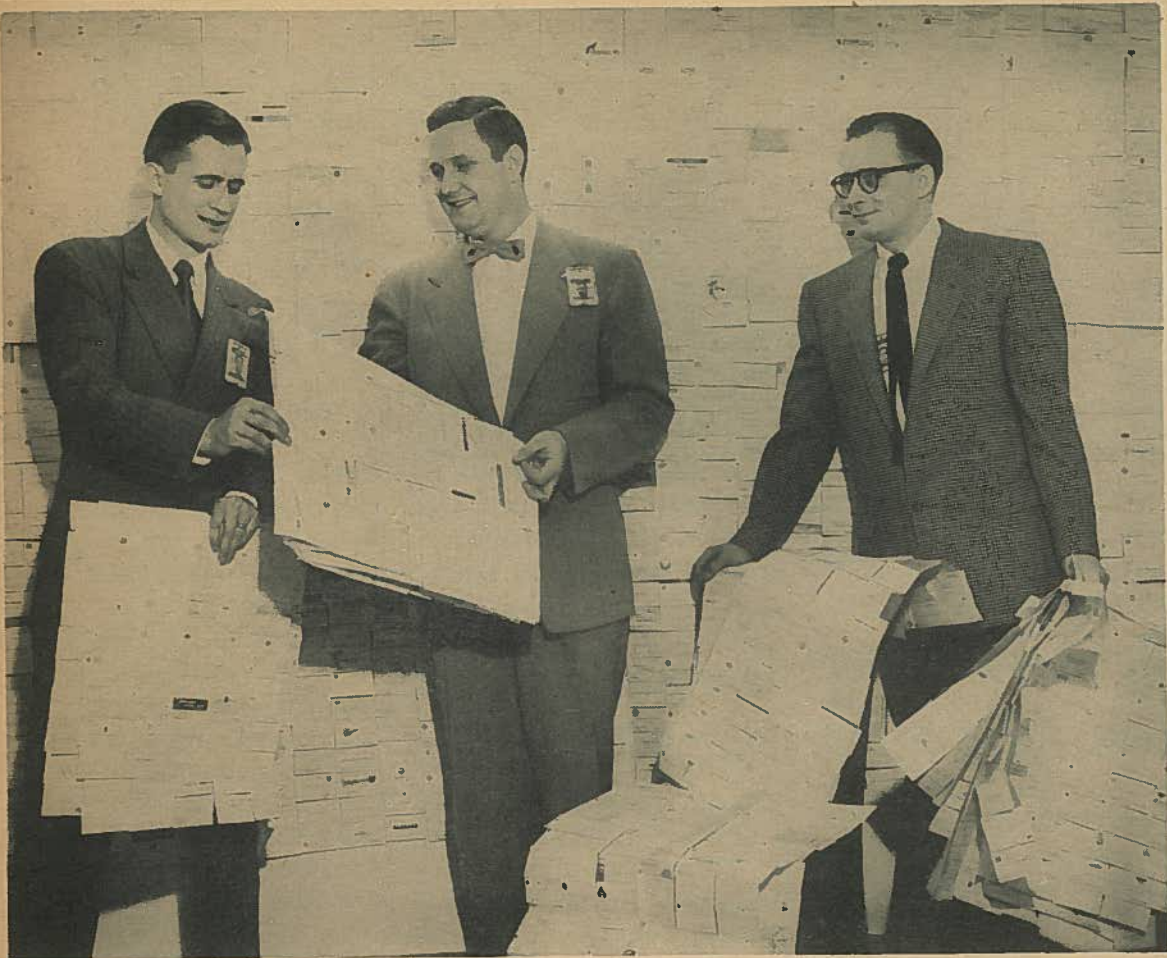

The deadline date for filing entries is 1:00 P. M., February 22. Entry blanks should be sent to Jack Feck, PKS Recreation Division, and must be accompanied by entry fees. All checks should be made payable to John R. Wilson. The sweepstakes has been sanctioned by the American Bowling Congress.

HOLLYWOOD REVUE TICKETS AVAILABLE

Ticket applications are available at the PKS Recreation Division office in the Personnel Building for the 1954 Hollywood Ice Revue which will be presented March 2 through March 10, at the Cincinnati Gardens.

Featured in the all-star skating show is Olympic and World's champion Barbara Ann Scott. In addition to the nightly 8:30 P. M. performances, matinees will be presented at 2:30 P. M. on Saturday and Sunday, March 6 and 7. Ticket information and applications may be obtained

Bright. Each of the cards were presented to Procurement Department interviewers by company representatives who visited the project as prospective suppliers.

Volunteer Workers Needed To Aid Girl Scout Program In Chillicothe

An appeal has been made to employees and their dependents connected with the Portsmouth Area project to assist with the Girl Scout program in the Chillicothe-Ross County section.

With the exception of troop and assistant troop leaders and camp leaders, men as well as women will be of valuable assistance to the girl scout organization. Experience in the fields mentioned is valuable but not necessary as the organization will offer proper training courses.

There is an urgent need for adult volunteer workers interested in working with girls in age groups ranging from seven to eighteen years.

Persons interested in assisting in the girl scout movement are urged to contact The Girl Scout Association of Chillicothe office located at 5½ West Second Street or telephone Chillicothe 2-6436.

At the present time there are 42 troops located in the Chillicothe-Ross County Girl Scout Council. Adults are needed to serve as troop and assistant troop leaders, troop and standing committees, camp leaders, craft experts and group work trainers.

**SAFETY IS FREE
USE IT GENEROUSLY**

COOPERATION PAYS OFF

This project attained an excellent safety record last year. However, your Safety Department reminds you that good safety records are not made by sticking out chests and crowing about past accomplishments, but by continual vigilance and the exercise of care on the part of all employees—today—tomorrow and all of the time. Management, supervisors, employees, and the Safety Department, all working hand-in-hand, can reduce accidents on this job.

second, or last on the rope. Each has a particular job to do and one of those jobs is to help others.

In every activity of life we are all on a rope. It is an invisible rope but it is just as real as the rope of mountain climbers. In accomplishing any good record, neither management nor workers can reach the top alone, but only by pulling together can they succeed.

Working together to attain any goal might be compared to the recent conquest of Mt. Everest. Who reached the top first? Was it Sir Edmund Hillary or Tiger Tenzing? The way the head of the expedition, Sir John Hunt, answered the above question and settled the controversy was—"They got there together".

Men with any job to do can do that job faster, better and safer when they work as a team, tying together their energies and know-how, pulling for each other, climbing to the top together.

You get to the top of a mountain only as the result of climbing with other people on a rope. It is not a matter of who is first,

Last year occupational accidents in this country cost over one billion dollars in wage loss, medical expenses, compensation, property damage and other indirect costs, and the value of lives lost is beyond dollar figures. It costs much less to prevent accidents. This is why we say in our heading "PREVENTION IS THE KEY TO SAFETY".

CLASSIFIEDS

The following classified ads are free to any Portsmouth Area project employee but must be confined to items pertaining to transportation and lost and found articles.

Phone 3442 or 2887

ANNOUNCEMENTS

Mr. and Mrs. Gene Beck announce the birth of a daughter, Tamara Gene. The baby was born February 1. Mr. Beck is with the Engineering Division of Geo. Koch Sons, Inc.

Mr. and Mrs. J. P. "Jack" Bailey announce the birth of a seven-pound 11-ounce daughter named Lesley Ann, at Portsmouth General Hospital on February 2. Jack is employed in the PKS Administrative Department.

Mr. and Mrs. J. C. Rauch announce the arrival of an eight-pound seven-ounce son on January 30, at Smith-Everett Hospital in Portsmouth. The new boy was named Steven Charles. Rauch is employed as a chief engineer in the Grinnell Corporation Process Engineering Division.

Mr. and Mrs. Gene Lane announce the birth of a daughter, Susan Mary, on January 18. Mr. Lane is with Geo. Koch Sons, Co. Engineering Division.

Mr. and Mrs. W. C. Moore of New Boston announce the arrival of a six-pound girl named Terry Denise. The baby was born January 10. Mr. Moore is employed in Grinnell's Record and Reports Section.

Mr. and Mrs. George Stone, Jr., announce the birth of a six-pound 11-ounce son named Randall Dale, on February 4. Stone is with PKS Unit Office Services Department.

Mr. and Mrs. Bob Williams announce the birth of a six-pound four-ounce girl named Nancy Jean, born in Mercy Hospital February 10. Bob is employed as an electrical engineer with Reynolds-Newbery.

WOOSTER COLLEGE CHORAL GROUP WILL SING IN PORTSMOUTH

Project employees and their families are invited to attend one of the musical highlights of the year in Portsmouth on Sunday, February 21, at 3:00 P. M., when the famed Wooster College Glee Club will appear at the First Presbyterian Church.

The Wooster group, comprised of some 70 voices, has been very well received in previous Portsmouth appearances. The First Presbyterian Church is located at Third and Court Streets. There will be no admission charge and the public is cordially invited to attend and hear this outstanding group.

AMERICAN BRIDGE

(Continued from page 1)

by the company on this job is fabricated in Ambridge, Pa., and is shipped here by rail.

Six rigs, ranging in height from 110 to 130 feet are being used by American Bridge to handle its steel. Steel is transported from the "shake out" yard, after being unloaded and sorted, to the erection area by two large 22½ ton capacity Ross "Straddle-Trucks".

In keeping with its policy of carrying on a strict safety program, American Bridge retains its own full-time safety engineer. Serving in this capacity is W. W. Clasen. Clasen, in addition to administering a constant safety program, holds 15-minute safety talks with American Bridge employees in the yard and in the erection area twice each week.

"BY JUPITER" DANCE FEB. 20

The PKS Recreation Division announces a "By Jupiter" employees' dance will be held in Chillicothe at the Elks Club tomorrow night, February 20, from nine until one. Playing for the dance will be Lou Martin and his orchestra. Admission will be by "By Jupiter" card.
