VOLUME II

PORTSMOUTH AREA AEC PROJECT

DECEMBER 31, 1954

NUMBER 26

MEET THE MANAGEMENT:

Construction In Two Buildings For R-N

Heading the installation of all electrical work in the X-330 and X-300 Buildings for Reynolds-Newbery's Process Construc-

tion Division is Ralph K. Wal-

The veteran superintendent served with Newbery Electric as an area superintendent on the Hanford Washington AEC job for more than five years prior to coming to Portsmouth in February 1953.

He started as a journeyman ectrician 23 years ago and practically all of his electrician construction experience has been related to heavy construction. He is still a member of the International Brotherhood Of Electrical Workers.

RALPH K. WALLACE

Ralph, his wife Lillian, and their two boys, Richard and Robert, reside in West Portsmouth where the two sons are attending high school in their senior and sophomore years, respectively.

The home at 705 Washington lvd. is frequently darkened when the family and friends are entertained by Ralph's favorite hobby of showing his collection of 8mm movies.

"Out With Old-In With **New" For Piketon PHA Resident Dance Tonite**

Residents of the Piketon PHA project will bring in the New Year tonight with a gala party and dance to be held at the project's administration uilding.

The affair gets under way at 9:30 P. M. and will close one half hour after the New Year arrives. Les Bernie's combo will provide music at the brightly decorated hall.

All residents are invited to the dance which is being sponsored by the community association with the assistance of the recreation division.

Mrs. Michael Zilich has served as chairman of the residents' committee in charge of arrangements.

Revised Social Security Law Changes Calph K. Wallace Directs Electrical Income Base Rate And Age Benefits

The Social Security Act has been amended, effective January

The per cent of employee contribution has not changed.

Before the new program became effective, the employee contributed two cents on every dollar he earned up to \$3,600 a year. The employer contributed the same amount. The employee still contributes two cents from every dollar earned but the base has been raised from \$3,600 to \$4,200. The employer contributes a like amount on the same earnings

This increases the individual's contribution by a maximum of \$12 per year (2% of earnings in excess of \$3,600 and less than \$4,200). But benefits for an individual also have been raised from a present maximum of \$85 to a new high of \$108.50. For a man and wife the amount will rise to a maximum of \$162.-75 per month.

The new plan also liberizes the amount of money a retired worker can earn in outside employment without losing his social security benefits. He may now earn an average \$100 per month in addition to his social security benefits between the ages of 65 and 72. If he earns \$1,200 per year before he is 72, he loses social security benefits in a proportionate amount.

Those workers already retired and collecting social security pensions will find their payments increased by amounts ranging from \$5 to \$15.50 per month.

Controller R. E. Smathers has announced that Earnings Statements (Form W-2) will be issued during the month of January, 1955 for wages paid during the year 1954. The Federal Government requires this form to show each employee's latest address for income tax purposes. Consequently, it is very important that each employee be positive that his correct address is on file in the Records Branch of the Employee Relations Department.

Please contact your supervisor or timekeeper if you have not reported your current address. You will be given a form to complete and this should be forwarded through the supervisor or timekeeper to the Records Branch immediately.

In addition to the significance of having correct addresses for the W-2 form. emergency calls require the location of employees immediately which cannot be done without a correct address.

Vith the arrival of the New Year at Midnight this evening, THE ATUMIZEK and all who in any way assist in its publication, would like to take this opportunity of wishing you and yours a most happy and prosperous new year. May the coming year be as eventful and full of meaning as the first year of life experienced by Charles Terry Bush who is shown above, hard hat and all, wishing everyone the best in the coming year. (Note the article in the upper left of the layout announcing his birth as the first in Pike County in 1954.)

Deputy Resident Manager for the Grinnell Corporation is veteran construction administrator, Harold H. Newcombe.

On August 1, 1954, the amiable Newcombe was called to the Portsmouth project to assist resident manager Saxby Chaplin. He is presently deputy to Grinnell's new resident manager, Bruce E. Sherrill. Prior to his employment at this project he was the Eastern Division Man-

Serving in the capacity of ager for the Graver Construction Company at their New York Office. This position placed complete responsibility for all sales and construction in the area on the manager, and during his eight years with the firm was in charge of several large projects in New Jersey for the Texas Company and Socony

Prior to the war years Newcombe worked for Alco in the

"TO BUILD OR TO WRECK??" I watched them tearing a building down, A gang of men in a busy town, With a ho-heave-ho and a lusty yell, They swung a beam and the side wall fell. I asked the foreman, "Are these men skilled? And the men you'd hire if you had to build?" He gave a laugh and said, "No indeed! Just common labor is all I need. I can easily wreck in a day or two What builders have taken a year to do." I thought to myself as I went my way, Which of these roles have I tried to play? Am I a builder who works with care, Measuring life by the rule and square? Am I shaping my deeds to a well-made plan, Patiently doing the best I can Or am I a wrecker, who walks the town, Content with the labor of tearing down?

As the New Year approaches, let us ask ourselves-"Am I shaping my deeds to a well made plan, patiently doing the best I can-or am I a wrecker content with tearing down."

George C. Holling, General Manager Peter Kiewit Sons' Co. Portsmouth Area AEC Project

A real construction family that has travelled from projects in Fresno and Baker's Field, California; Norfolk, Virginia; and finally here at the Portsmouth project is the Don Samsal family shown above. Don is employed as an administrative assistant in the PKS Warehousing department. A very interesting geographical birth pattern is portrayed by the children who are shown left to right, Mickey (on Mother Greeta's lap) who was born in Chillicothe; Rickey, born in Findlay, Ohio; Barbara Lou who arrived in Porterfield, California; Linda, Toledo, Ohio; and Donna whose birth took place in Albuquerque, New Mexico. Don and Greeta are native "Ohioans" having been raised at Lima and Findlay, respectively. The family is pictured about to examine a few of their Christmas gifts which have been removed from their brightly L. Jones or Louis Kricker in decorated tree.

The expression on the little face above is only one of many similar seen on the faces of more than 4000 area kids who delighted in talking with Santa during the past two weeks. The recreation division sponsored tour is conducted annually for the benefit of employee families throughout the area. In all, more than 40 villages were visited in a period of five days.

Men responsible for the handling of sheet metal paneling are shown in the above pictorial layout of the huge operation for the George Koch Sons Inc. Upper left pictures a material handling crew which must keep the erection men supplied with material. Shown left to right in front row are: J. E. Smith, J. B. Pickering, and C. C. Gibson. Back row: R. T. Brown, H. E. Norman, H. E. Misewicz and Foreman D. L. Wright. The center insert at left reveals another material handling crew which stacks the many panels in designated areas in the buildings. First two men in foreground left A. Betten and right, J. W. Lee. Second row: B. B. Munch and B. B. Mitchell. Back row left, R. D. Willis and right, material checker C. A. Tice. Bottom left is an erection crew and includes (kneeling left to right): Henry Dorton, W. K. Kelley, Leroy Taylor, B. Vahun and Foreman H. L. Richart. Back row: Ray Steman, detailman; W. G. Burleson, Jim Loyd, E. Shepard, F. F. Forrest and James Cummins. The supervisory group responsible for the operation shown upper right during a meeting pictures C. H. Bishop, Gen'l Foreman; K. A. Cox, Ass't Supt.; E. J. Korbel, Ass't Supt., Carl E. Williams, Bldg. Supt.; J. D. Dingeldein, Ass't Supt.; J. Eric Norman, Engineer; and C. O. Moore, Gen'l Foreman. Lower right shows an unloading crew working on a vendor's truck.

Free Aid For Veterans

Peerless Chapter Number 10 of the Disabled American Veterans has announced that their office in Portsmouth is now providing help to veterans who are employed at the Portsmouth AEC installation.

Any vet who desires advice or assistance in solving any problems related to disability, insurance, G. I. Loans, school or others may receive same (free of charge) by contacting Charles Portsmouth. Jones, who is the adjustant at the local office, may be contacted at 1536 4th St. or call 4-9131 from 7 to 9 P. M. Service officer Kricker may be reached on phone 6-5221 at 1022 22nd St. in Portsmouth.

This service is handled by men who are well trained and qualified to handle the claims and problems of veterans, their widows and dependents. Last year more than 21 million dollars in benefits were obtained by service officers of the Disabled American Veterans.

'FAVORITE FUNNY"

A Red Cross instructor quizzing a bunch of girls asked: "Which article of clothing would you remove last if you fell into the water fully clothed?" The class broke up when one bright girl mswered: "The blouse, 'cause air gets under it and acts like a buoy."

Under the overall direction of area superintendent George Spaniol the installation of sheet metal paneling and accessories is accomplished at the Portsmouth Area project.

Practically all panels arrive at the job site in trucks directly from the vendor and go to specific buildings. 12 to 14 huge tractor-trailer outfits roll in and off the project daily.

As has been the working plan throughout the Koch operation specific crews of men are delegated exact assignments. With the arrival of trucks from vendors a fast moving unloading crew moves onto the machines and the paneling is disbursed throughout the buildings. As an indication of the tremendous amount of paneling unloaded if the crew were to stack it end to end as it comes off the truck it would reach from the job site to Cincinnati, Ohio.

A special crew is in charge of stacking all panels in order that it might be distributed efficiently as erection crews call for it. Upon receipt of a specific order the material handling group immediately dispatches the insulation material to a designated area in the building.

Erection consists of placing panels, tightening bolts to hold them, and caulking spaces left in the joining process. If all panels placed were joined to form the roof of a building it would be necessary to have a building 1250 feet square. In addition

a total of 131 miles of caulking is necessary which requires that almost 5000 gallons of the sealer be on hand.

With the erection of paneli (receiving and storage, and duct erection were covered in two previous articles) this draws to a close the series of stories dealing with the George Koch Sons, Inc. operations unit. Next: Sheet Metal Supervision.

Editor's note: Immediately following the supervisory story in the January 14th edition THE ATOMIZER will feature the Grinnell Corporation.

HAROLD H. NEWCOMBE

(Continued from page 1)

construction of an oil refine at Kawasaki, Japan. Ironically, this refinery was destroyed by Jimmy Doolittle's historic bombing in 1943.

Newcombe attended the University of Texas and graduated from the Missouri School of Mines at Rolla, Missouri with a BSCE. He and his wife, Clara, reside in Chillicothe.

CLARENCE WILLIAMS ROLLS HIGH 705 SERIES AT CLASSIC BOWLING LANES

Clarence Williams, of the PKS Engineering and Scheduling Division, has recently performed a bowling feat that only two other men have accomplished in the history of the Classic Lanes

in Portsmouth.

CLARENCE WILLIAMS

Clerks Battle Process Engineers In Opener Of Project Cage League

Basketball league action begins for project fives Monday evening, January 3rd at the Washington grade school gym. The first game of the evening, beginning at 7:00 P. M. pits the Clerks against the Process Engineers.

In the night cap on Monday, Heavy Construction battles the Grinnell Field Office. The remainder of the schedule for the next two weeks:

Tuesday, January 4: 7:00—George Koch Sons vs Grinnell

Engineers 8:00—Grinnell Fiscal vs Engineers Wednesday, January 5:

7:00—R-N vs Timekeeping 8:00—Pipe Fab vs Building Services Monday, January 10

7:00—Timekeeping vs Pipe Fab 8:00—R-N vs Engineers

Tuesday, January 11
7:00—Clerks vs Building Services

Rolling for Hudephol Beer in the Recreation League in Portsmouth, Williams cracked the magic 700 series with games of 226, 210 and 269 for a total of 705. The series is only the fourth ever to exceed 700 as one of the two other men attained the score twice.

The series entitles Williams to membership in the ABC "700 Club of America", and he will receive a certificate of merit in addition to participating in a special "700" tournament.

He has bowled actively for a short five years and is presently maintaining an average of 183 in two leagues at the Classic. The 705 series is the season high for the Recreation League and his 650 series cops honors for the National League season. Although this is his first series to break 700 he has been over 600 six times — a feat which many bowlers have yet to perform

Clarence arrived at the Portsmouth Area project 18 months ago from his home in Huntington, W. Va. He and his wife make their home at 2208 7th Street in Portsmouth.

8:00—Grinnell Field Office vs George Koch Sons

Wednesday, January 12 7:00—Grinnell Fiscal vs Grinnell

8:00—Process Engineers vs Heavy
Construction

All are invited to watch the games.

A real trained crow about to take one of his favorite toys from his owner is "Jimmy" shown above. Esther McMullen states that the pet was especially adept in acquiring new tricks and is constantly learning more. (See story)

B. F. BROWN BAKER PROVING WILD CROWS CAN BE TRAINED TO PERFORM MANY FEATS

Proving that "pets are where you find them", Esther Mc-Mullen, a baker for the B. F. Brown Company, has one of the most unusual in the area with her trained crow, "Jimmy".

CINERAMA

Cinerama officials in Cincinnati have announced a special holiday schedule which will be of interest to employees who might be in the area over the weekend.

Beginning with Cristmas Day through Sunday, January 2 there will be a matinee every day at 2 P. M. and a performance at night at 8:30 P. M. In addition to these two daily shows, an extra show is scheduled at 5 P. M. on each Saturday and Sunday.

For New Year's Eve, tonight, there will be a midnight show beginning at 11:30 P. M. This is to be the first midnight showing of Cinerama since the attraction opened in June.

Employees who wish to attend any of the showings may make ticket reservations by contacting the Recreation Office on extension 3442

The pet crow was found when he was but three weeks old in the woods near O'Dell's Trailer village. The mother crow had been killed and left "Jimmy" and two others to face life alone.

"Pert" Esther immediately attempted to save the small birds but two died from the intense summer heat. It was necessary to keep them in water almost constantly to survive. Sturdy Jim weathered the storm and has become a most faithful pet.

The crow is now seven months old and has lived on a steady diet of milk and Pard dog food. In order to keep cool and clean the little pet bathes in his special tub two and three times daily. Behaving as any domesticated animal, he plays with the neighbor cats and dogs who sometimes become a little rough as shown by an absence of tail feathers. Jim is a real watchdog for the village, as his loud screams quickly denote the arrival of strangers to the trailer court.

Although a very likeable pet he sometimes bothers his master and neighbors by stealing lipstick, combs, clothespins and many other small items. He loves to smoke cigarettes, but uses a "Kool" diet.

Miss McMullen, who resides with her parents (Don Baker, PKS ironworker), is quite proud of her pet and spends many hours training the bird. At the present he is being trained to speak and supposedly he said "hello" and several other words.

Esther is from Hunkhannock, Pa., and has been employed by the Brown firm since July of 1954.

"ALL RIGHT, MAGIC-MAN_AM I GONNA GET A HIT OR NOT?"

-AND A GOOD TIME WAS HAD BY ALL . . . "

One of the most entertaining events of the year, staged at Waverly High School Monday, December 21st, can certainly be labeled a tremendous success as shown in the pictorial account above. The high school overflowed as close to 2000 employees and their families crowded into the gym to witness the recreation division's second annual Christmas Show. Shown upper left are members of the Kiewit Choraleers who sang carols for the huge audience. Upper center catches one of the professional acts in an extremely difficult back bend from a tiny platform, recovering a lighted cigarette from a holder. At upper right Santa presents one of many prizes to children who attended the extravaganza. An act of great interest performed to fix the spell-bound interest of the crowd pictured in the lower right photograph. A lost little gal who was so interested that being lost was of no concern watches MC Ed Coatney in lower center while lower right the juggling act receives a thunderous ovation of applause.

Atomic Area Ladies Clubs Plan Attractive Fashion Show

"A costume suit of wool tweed, navy flecked with white . . . The box jacket uncovers a navy crepe wrap-around blouse . . . the straw sailor is the small hat story for spring . . . and is worn straight over the head ... " This description and many others will fill the air as the model shown and eleven others parade before the Atomic Area's women at their fashion show scheduled at the Lake White Club.

Professional Models Will Parade At Lake White Club, Mon., January 17th

The Recreation Division has announced plans for the staging of a gala style show for all women employed on the project and the wives of all project men in the area.

The show has been in the making since early fall when officials of several womens clubs at housing projects met with the Recreation Division to complete plans for the event. The Lazarus Company of Columbus will assist in the promotion of the first show of its kind strictly for the benefit of project people.

In order to be conducted in a very informal manner the models will perform at the Lake White Club around a background of colorful scenes. Plans call for two shows on January 17th, with the first at 2:00 P. M. and the evening show at 8:00 P. M.

The fashion show will last about one-half hour and will feaslacks, pedal pushers, spring suits and coats.

The most exciting news for spring in the fashion picture is the long-torso silhouette, originated in Paris by Christain Dior and now adds an interesting flair to American fashions.

Fashion Promotion director Nancy Davis of the Lazarus firm states that there will be much color this spring, for in addition to the traditional navy blue, there is fashion interest in beiges, pale mossy greens, yellow, and mauves—from pale to deep tones. There will be more costumes than ever. Dresses with jackets or with full length coats and linings to match the dress will be very popular.

There will be costume suits, many planned with a coordinated blouse worn over-blouse fash-

ion, another indication of the longer leaner look in fashion. Separates will help to create the costume look too, with the addition of two, three and sometimes four pieces. All of these will be featured in the show, and the size story will be featured prominently including Junior, Misses, Brief, and Half sizes, showing that fit, without unnecessary alteration is an important prerequisite to fashion.

For the convenience of all women employed at the plant, tickets for the 8 P. M. evening show will go on sale at the recreation office from January 5th-7th. Tickets for the remaining places at the evening show and ture 12 professional models, the 2:00 performance will be The scenes presented will fea- sold by the various women's ture sportswear and dressy sep- clubs from January 10th to 15th arates, casual daytime dresses, inclusive. The price of the tickets will be \$1.00 which will cover the cost of the dessert served at the show. The show is free of charge with the exception of the dessert, and was planned by the women to be strictly non-profit.

> All ticket reservations must be made prior to January 15. Further information concerning places where tickets will be sold off the project may be obtained by calling Extension 3442.

"BIG TEN ROSE BOWL STORY"

Big Ten football teams have played in the Rose Bowl a total of 10 times since Michigan defeated Stanford 49-0 in the first ever in 1902.

During the 10 meetings the midwest erners have won 8, losing only two outscoring their opponents 262 to 110. This is an average game score of four TD to one.

Only two Big Ten teams have been shut out in the series, Ohio State, 28-0 at the hands of California in 1921 and Wisconsin 7-0 in 1953 by Southern California.

MANY SIGNIFICANT **LOST ARTICLES BEING**

Thought For New Year

With the arrival of the New Year at 12:00 tonight many will be making their resolutions for the coming 12 months. Below are several which might make each of us a little happier if only a few are adopted:

Let me be a little kinder, Let me be a little blinder

To the faults of those about me. Let me praise a little more. Let me be, when I am weary,

Just a little more cheery Let me serve a little better, those that I am striving for.

Let me be a little braver, When temptation bid me waver.

Let me strive a little harder, To be all that I should be. Let me be a little meeker,

With the Brother that is weaker Let me thing more of my neigh-

bor, and a little less of me.

"AN ANGRY man opens his mouth

second place prize. The judging committee was composed of representatives of the various UCDS agencies in the area.
