BE SECURITY CONSCIOUS

## GOING ON VACATION? WAREHOUSE DIRECTOR SUBMITS ADVICE TO MAKE TRIP ENJOYABLE; 'SAFETY KIT' ITEMS NOT TO BE OVERLOOKED

Inspired by a recent radio message to promote a happy and healthful vacation trip and a safe return to our regular routine, Ralph A. Stiegler, Director of Warehousing Department, came up with the necessary contents to make the "Safety Kit" complete. Of course there will be some extras of your own to throw in, but the following items should not be forgotten.

**A GOOD SUPPLY OF MODERATE SPEED.** You'll need this on long, inviting stretches of open road. You'll need some on curves, too, for these can be tricky when you get used to rolling along at high speed. Save some for the end of the trip, when you feel like hurrying to reach your destination.

**A LARGE PACKAGE OF CAUTION.** By the nature of things, you'll be sharing the road with all sorts of drivers. Some will be good, many will be not so good. Some will be young and impulsive, some will be old and cautious. Many will be in a hurry, and many tired. You can be sure that many times they will do things that are foolish, and dangerous.

**A BOTTLE OF PATIENCE—LARGE SIZE.** The road will seem long, and the family may want you to hurry. At such times, take a big dose of this item. Better to get there late than not at all.

**A BOX OF COURTESY.** Keep this ready all the time—you may need a lot of it. It's contagious, you know, but it won't hurt at all.

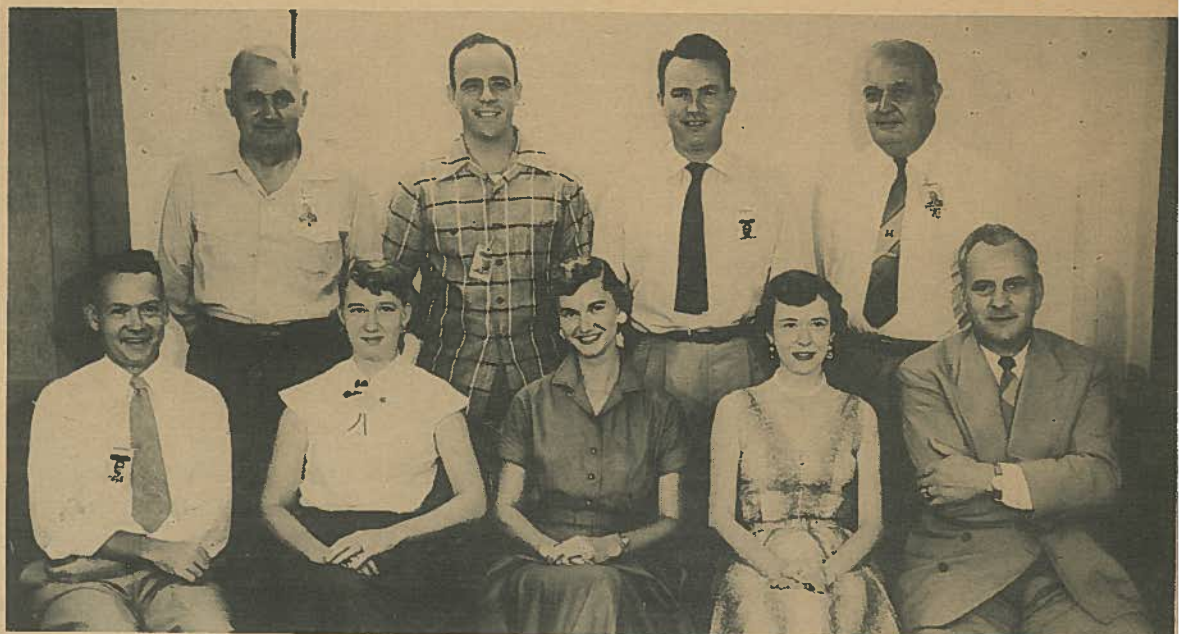

**A LARGE ROLL OF INFORMATION.** Very likely you'll be driving unfamiliar roads—perhaps in states where rules of the road are different from your own. Find out all you can about traffic laws, road markings, driving and traffic signals. Experienced travellers make it a point to inquire about such things when crossing state boundaries.

**GOOD COMMON SENSE.** Fill up all the remaining space in your kit with this. Use it if you get angry. Use it when you are tempted to "show up" the other driver. Take some when you feel like taking a chance. Use it in preparing your car for the trip. Use it most toward the end of those long, wearying days of driving, and never let your supply run low.

Why not pack up the Safety Kit for everyday living on the job and at home as well as for the vacation trip. By applying ourselves each day on the above mentioned points, I am sure that our job and vacation will be more pleasant and enjoyable.

## Labor Relations Department Contributes To Success Of Project; Acts As 'Go-Between' For A-Plant Workers

Front row, left to right: A. L. Sutton, PKS Department Director; Ramona Fickle, Grinnell Secretary; Bonnie Harrison, PKS Secretary; Phyllis Furbee, Geo. Koch Secretary and D. L. Goodwin, PKS Asst. Director; Back row: Fred W. Barth, Grinnell LR Chief; Douglas White, Reynolds-Newbery LR Chief; Howard Cline, PKS Administrative Asst.; and A. O. Brockriede, Geo. Koch Son LR Chief.

### HEED ROAD SIGNS!

R. L. Senior, PKS Operations Manager, again warns all vehicle operators on the project to comply fully with traffic regulations, signs, and barricades.

The most recent violation has been the moving of or going around barricades established at various points to protect areas prepared for seeding or paving.

Penalties for violations will be invoked in accordance with previous notice issued by the Operations Unit.

### SCIOTO COUNTY FAIR TO OPEN TUESDAY, AUGUST 2 THROUGH 6

Project employees and their families are invited to attend the annual Scioto County Fair which will be held August 2-6. The fairgrounds, located a

mile north of Lucasville on old Route 23, are in readiness for the gala event and ample parking space adjoining the grounds is assured.

### A. L. Sutton Directs Staff; PKS And CPFF Subcontractors Efficiently Share Responsibility

The Labor Relations Department, under the guidance of Arthur L. Sutton, has performed a varied and significant role in the construction of this huge atomic plant.

When the construction of the plant was announced in August 1952, there immediately arose a tremendous need for skilled craftsmen. Where were they to come from and how were they to be obtained?? How much pay?? How many hours?? Overtime pay?? And on and on . . .!!

PKS, as the prime contractor, immediately went about the task of meeting with representatives of all international unions who would speak for the thousands of workers to be employed at the plant.

The Labor Relations Department was assigned the task as bargaining agent and gradually each contract was signed. Policies, limits of work assignments, rates, and all conditions were agreed upon. The Department is responsible for maintaining harmonious relations between PKS and its subcontractors and employees, in compliance with the applicable labor agreements which were negotiated at the beginning of the job. In addition, the Department has administered changes in agreements which have taken place in the past three years.

Essentially they are a "go between" for management and the workers. Workers are represented by their respective international representatives or business agents in dealing with the Department. Pay increases are bargained for when contracts expire. Investigations are conducted. All are duties assigned the Department.

Mr. Sutton is ably assisted by D. L. Goodwin and Howard (Continued on page 4)

## MAY-JUNE SUMMARY SHOWS LOST-TIME INCREASE

COMPANY	MANHOURS		ACCIDENTS		SEVERITY		FREQUENCY	
	MAY	JUNE	MAY	JUNE	MAY	JUNE	MAY	JUNE
PKS	477,295	418,343	0	0	0.00	0.00	61	67
GRINNELL	572,284	510,298	0	1	0.00	1.96	152	327
R-N	283,938	232,440	1	1	3.52	4.30	14	52
GKS	124,209	94,281	0	0	0.00	0.00	0	0
LUMP SUM	74,406	70,721	0	0	0.00	0.00	0	0
<b>TOTALS</b>	<b>1,532,132</b>	<b>1,326,083</b>	<b>1</b>	<b>2</b>	<b>.65</b>	<b>1.51</b>	<b>78</b>	<b>156</b>

### THE ACCIDENT STORY:

Case Number One: Reynolds-Newbery electrician, while putting up conduit clip studs with a Nelson stud gun, some hot molten metal dropped into the left ear.

R/X: Supervision should insist that employees use ear plugs when in danger of foreign particles falling into open exposed ear canal.

Case Number Two: Grinnell pipefitter, was disconnecting vacuum testing machine when the 8 foot connection of 12" pipe that was connected to pipe and machine rolled and caught right ring finger, injuring same badly enough to cause amputation.

R/X: Foreman to stress keeping hands in clear, as well as established safe methods of handling objects and material.

Case Number Three: Reynolds-Newbery electrician, was working from straight ladder, installing conduit, when ladder slipped and man fell fracturing bone in foot. There were safety shoes on ladder but no place to tie off ladder. Floor was waxed linoleum.

R/X: Action should be taken by foreman to see that ladders are in first class condition, equipped with safety shoes, and tied off where possible. In this case, due to slippery condition of floor, ladder should have been held at base.

## WHAT'S THE SCORE?? MOUNTING JULY FIGURES NOTED

There it is—the story for May and June of this year. After setting a splendid record by working eight full weeks without a lost-time accident, we apparently have become rather careless. Three accidents in May and June, added to the five recorded thus far in July, and our total jumps to eight mishaps in the past eight weeks. The eight accidents recorded since May 26, 1955, represent 250 days of time lost from work by the individuals concerned. In addition to the thousands of dollars in salaries which these employees lost, some of them will carry permanent reminders of the mishap for the rest of their lives. Is it worth the risk for the sake of a few seconds of time which might be gained? REMEMBER—THERE ARE NO SPARE PARTS FOR THE HUMAN BODY.

To indicate the apparent laxity on the part of all employees, let's take a look at the period from January to June of last year as compared to the same period this year.

A SIX MONTHS COMPARISON OF ACCIDENTS				
	MANHOURS	ACCIDENTS	FREQUENCY	SEVERITY
January to June, 1954	16,620,647	28	1.68	85
January to June, 1955	11,477,412	22	1.92	96

It almost unbelievable to note that although more than five million manhours less were worked in 1955, we have experienced 22 accidents, only six less than the number during the first six months of last year. Thus, the reason for the frequency rate jumping 24 points. It does not seem possible that this could happen. Let us combine our efforts in one big push to finish the job without needless lost-time accidents. It can be done! Let's do it!

# SUPERVISORS-STAFFS IMPORTANT TO SUCCESS OF PROCESS CONSTRUCTION DIVISION

Published fortnightly by Peter Kiewit Sons' Co., its subcontractors and affiliated companies for all employees and their dependents on the Portsmouth Area U. S. Atomic Energy Commission project. "THE ATOMIZER" is edited and printed as a function of the PKS Recreation Division, Luther F. Poling, chief.

## 'Cooperate And Complete' Are Key Words Of Superintendents Directed By E. L. Coffman

Supervisory personnel of the PKS Process Construction Division speak of coordination of efforts as a MUST in their complex phase of construction, and obviously so, if their assigned duties are to be completed on time and performed in an efficient manner.

Under the direction of Division Superintendent E. L. Coffman, the Division has become a smooth functioning body through planned conferences, critiques, and observances of good construction practices. Mistakes and delays must be kept at a minimum on a project of this scope and that attitude is reflected through Mr. Coffman's staff, area superintendents, superintendents, assistants, and so on down through the office forces.

The picture of coordination begins at the department and division level through periodic conferences of all involved contractors who thoroughly discuss development, progress, and any problems which are causing discrepancies. By fully understanding the problems of each other, the activities of one contractor is not contrary to the other, nor to their combined efforts. Results of these periodic conferences are carried down to the area superintendents and their assistants of the X-330, X-326, and X-333 Buildings, where, in turn, the information is directed to various supervisors.

Conferences are not only attended by department and division heads but are also held twice weekly in each building for area superintendents and their staffs. In order to check progress toward target-date turnover and to further coordinate their work these meetings are very important.

A multitude of problems arise, both major and minor, which must be solved expeditiously. One of the major problems during the construction period has been cleanliness control. Mud, dirt, and refuse in the buildings are combatted by special washing devices for equipment and materials and by general "policing-up" of the areas.

Another troublesome problem was solved when trash chutes extending through outside walls were placed in use, eliminating congestion of scrap in areas under construction.

Safety tours are regularly conducted through the buildings. From these tours and general thinking toward safety the devising of safety equipment has eliminated many hazards that previously existed.

Success of the Division cannot be "pin-pointed" or accredited to any given area, because through observation of their daily routine, success was spotted everywhere.

## Annual Picnic At Lake

The second annual Office Employees' picnic was held Saturday, July 16, at Lake Margaret. Approximately two hundred were in attendance.

cans, bottles, and other refuse along the highway or into some recreational area. Be sure to have a picnic or party at one of our many beautiful roadside parks, then leave the garbage, broken glass, and cans for the next party.

**LET'S BE SERIOUS!** We are not so careless with our living habits at home and would not tolerate our neighbors to be so negligent.

In our daily travels to and from work, let's try to be a little more considerate of our surroundings and show the same respect to the out-of-doors as we do to our own back yard.

## BEWARE! LITTERBUGS ON LOOSE IN VICINITY

Are you a member of the rapidly growing national organization of the Litterbug??? Why not??? You can easily meet the requirements. Perhaps you are a member in good standing and are not conscious of the fact!

All you have to do to become a member is to throw paper,

# Project Golf Championship Tourney August 13; Site To Be Announced

## Fifth Project Handicap Tournament Honors Shared By Both Joe Brumley And Roy Key

With the completion of the fifth golf tourney over the week-end of July 22-23, Luther F. Poling, Recreation Division Chief, has announced the scheduling of the event everyone has been waiting for, THE PROJECT CHAMPIONSHIP TOURNEY.

The tourney site and players' handicap will appear in the August 12 edition of THE ATOMIZER. If you don't have a handicap you will still be permitted to play and will be given one. Those who desire to participate in the event are urged to play at least two or three rounds during the next two week-ends and submit their scores to the Recreation office. Players who already have handicaps are still requested to submit scores up to the date of the event.

Trophies and prizes will be awarded for low gross and low net scores and many others. A blind bogie drawing will also be held in conjunction with the selection of one champion.

Players who plan to enter the tournament are requested to call the Recreation office on Extension 3442 or 3588 and declare their entry. No player can be scheduled for tee times unless this is done. Make plans now to call the office before Wednesday, August 3. It would be best to call at once.

Keep in mind that the event is open to all project employees regardless of whether you have a handicap printed in the paper, but you must notify us of your intension to play. Play on the 13th and a handicap will be computed. "Mulligans" will be allowed on the first hole only.

Thereafter, official USGA and local club rules will prevail.

The fifth project tournament ended in a first place deadlock between Joe Brumley and Roy Key. Brumley posted an 82-15-67, while Key carded a 79-12-67. Second position went to reliable Jack Schuerman with a 70-1-69. Ab Wright took third place honors by carding an 80-9-71.

Winners are requested to call at the Recreation Division office for their prize.

The complete list of scores for the fifth tourney will appear in the next edition of THE ATOMIZER.

Lt. Jake Kinstler, PKS Guard Force, with wife and son Jay, exhibits 14 lb.-12 oz. prize-winning catfish caught in the Scioto River.

## FINAL FISH CONTEST WINNERS ANNOUNCED

Results of the final fish contest were announced Monday by the Recreation Division. Competition in the game fish classification was won by James Wood of Piketon, with a 19 inch, 2¾ lb. large mouth bass caught at Lake White.

J. P. Meader's entry of an 8½ inch bluegill was far ahead of others in the Panfish class. Meader's fish was taken from Lake Caldwell.

Roy Mayberry of PKS Plant Protection Investigation Section waited until the last week-end for his first prize catch of an 18 lb., 9 oz., 37 inch catfish taken from the Ohio River. Crayfish, shrimp and minnows were used to catch 41 fish for Roy and his party.

Second in the catfish competition went to Jake Kinstler (see picture) and his son Jay. The 14 lb., 12 oz. catfish measured 32 inches.

Third place went to John E. Lewis who entered a 24½ inch shovel head, weighing 6 lb., 10 ozs. The Hocking River near Nelsonville, Ohio, was the site of Lewis' catch.

## 10-Day Advanced Swim Class Offered; Second Beginners Session Graduated

The third session of the Learn To Swim program conducted by the PKS Recreation Division, got underway last Monday, not only with beginners getting attention for the ten-day instruction but those desiring to improve their technique as well. By popular demand, plans were initiated to operate a carry-over program for those who had attended one of the earlier sessions and is progressing through the first phase this week.

In addition to the advanced class, two classes of six through eight year olds are in daily attendance which will continue through August 5.

Graduation for the second session swimmers was held July 19 at Lake White when 76 persons received their certificates. The following swimmers were honored: (Age group 6 through 8).

Junior Adams, Jane Birkhimer, Rose Ann Blakeman, Sharon Bonfini, Tommy Bonfini, Guy Cannon, Robert Cannon, Edde English, Susanna Fitts, Billie A. Fraley, Gwendolyn Grass, Michelle Haynes, Steven C. Hunter, Carolyn Jenkins, Marilyn Jenkins, Virginia Justice, Tommy McCall, Brent McNelly, Sharon McNelly, Frederick Perry, Marcia Sue Perry, Patricia Robb, Mark Roosa, Elisabeth Sherrill, Avonelle Voelker, Kathy Sue Davis, Suzan Eylar, Henry Fanning, Leroy Faircloth, Billy Fleck, Cheryl Houck, Vickie Jo Magnetti, Earl Moates, Jr., Glenn Morris, Jon Mortensen, Paula Mortensen, Glenn Nolt, John N. Prasek, Jane Rice, Carol Ross, Deborah Smith, and Buddy Worrell.

(Nine through Adults): Cheryl F. Bishop, Osa Blakeman, Carol Bonfini, Frances Bonfini, Joe Bonfini, Bette English.

Bobbie Faircloth, Maxine Faircloth, Shirley Fanning, John Fitts, Paul D. Friend, Thurman Grass, Vernon Justice, Craig Langhor, Josie Lindley, Eula McCall, Florence McKee, Joey D. Partain, Marjorie Rice, Harry Rider, John Rider, Wilma Ritchie, Jimmy Robb, Marjorie Roberts, Gary Voelker, Ruth Voelker, Rebecca Sue White, Curtis D. Williams, Glenda Witt, and Gladys Woodruff.

## PORTSMOUTH MIXED LEAGUE IS COMPLETED

The Lucky Strikes maintained first position to cop the Portsmouth Mixed League championship Thursday, July 21. Due to the scheduled refinishing of the Classic Lanes, it was necessary for the teams to bowl twice during the final week to complete the required number of games.

The Pressler (George and Kay) and King (Russ and Betty) combination finished the season with a 22-11 won-lost record while compiling 30 points to head the field. Runner-up position went to the Rovers with 25½ points which was a very slim edge over the 4 Strikes and A Spare with 25 points.

Final standings are listed in box in first column.

— THINK SAFETY —

Victors of the Waverly Women's Summer League, THE FOUR SPARKS, are shown above proudly exhibiting their trophies a few moments after presentation by Luther F. Poling, Chief of the PKS Recreation Division. The champions are, left to right: Mabel Heckler, Mary Hibben, Clara Grosenbach, and Mary Zint. Absent from the picture was Kay Sparks, a regular bowler up to the last week of competition who was substituted for by Mary Hibben.

Bowling and more bowling was the theme for the Waverly Women's League during the week of July 11-15, when it was necessary for the teams to bowl three times in order to declare a champion. The Four Sparks walked off with the honors with a 21-9 season standing. Mary Zint, a consistently good bowler and president of the league, finished with a .147 average to spark the Four Sparks.

The Trailerettes made a drive from fourth place to a second place tie with the Four Strikes team, both finishing with 22 points. The Muggs combination also came on strong after spending most of the season in the cellar, dropping Little Beaver into sixth place. Standings are to be found on this page.

Shown above are the two teams presently tied for the lead of the Piketon Softball League. They are, top photo, front row left to right, Grinnell Fitters: Joe Laird, Jim McConnell, Leroy Simpson, Charley Cartwright, and John McAffie. Back row: Jerry Underwood, Cyrus Stephens, H. C. Briscoe, Manager; Edwin Gingery, Tun Bowie, and Leon Brady. Lower photo, front row left to right, Moore's Trailer Park: Jim Rutherford, Manager; Bob Prestridge, Ruby Gilmore, Jeff Harris, and Gerald Neal. Back row: Kenneth Wilson, Reese Barger, Ishmael Ward, Carl Trusty, Arthur McFann, Dutch Rankin, and Tom Jones.

Shown doing some "tinkering" on his newly acquired antique bed is George Kosko. Offering an able assist by steadying "pop" is 11 year old Walter. For the interesting background on the ancient bed, see story below.

## Grinnell Employee Acquires Ancient Bed; Believed To Be 115 Years In Age

George Kosko, Administrative Assistant to the Mechanical Superintendent for the Grinnell Corporation, has in his possession an ancient bed which many people might like to have. The mammoth bed is estimated to be 115 years old and is constructed of walnut with burl inlays. It is then covered with hundreds of geometric carvings, which magnify its beauty and splendor.

Kosko purchased the bed at an auction of the McKell-Kilvert estate in Chillicothe. It was obtained with the thought that the old relic might be cleaned up and sold. The McKell-Kilvert estate is said to date back to the turn of the 18th century through investments of an individual from Scotland who was in the whaling industry. This might account for the expert's estimate of 1840 for the date of the bed.

The Kosko family, Mrs. Virginia, sons George, 11, John, 6, and daughter Gloria, 3, live at 182 Western Avenue in Chillicothe. Originally from Johns-

town, Pa., George came to the local project from Charlotte, N. C., in April of 1953. He is now in his ninth year with the Grinnell Corporation.

Although never having an interest in antiques previously, George is now contemplating the collection of additional items. What is he going to do with the huge bed? You guessed it!!! Sleep in it.

### NEW ARRIVAL FOR FIELDS

Mr. and Mrs. Melvin Fields of Route 4, Jackson, are announcing the arrival of a baby son born July 11, weighing 11 lbs., 2 ozs. The new baby was welcomed by three brothers, Douglas, Ronald, and Gregory. Mr. Fields is employed by Peter Kiewit Sons' Co.

## CLASSIFIEDS

The following classified ads are free to any Portsmouth Area project employee but must be confined to items pertaining to transportation and lost and found articles.

Phone 3442 or 3588

**WANTED**—Ride or to join car pool from Ironton to project on swing shift. Contact *E. M. Miller, Ext. 3782 or Ironton 1806 R.*

**LOST**—Helbros pocket watch. Lost July 22, in X-333 Bldg., cell floor. Finder please call *E. M. Alley, Extension 3735.*

**WANTED**—Riders from East Portsmouth on 8:00 to 4:30 shift. Call *Charles Reynolds, Extension 3338.*

### NEW DAUGHTER

AMY BIANCA

A new daughter, Amy Bianca, was welcomed by proud parents Mr. and Mrs. Julio C. Martinez at the Portsmouth Mercy Hospital, July 12, at 5:30 A. M. The little girl was their first and weighed 7 lbs., 9 ozs., at birth. The Martinez family resides at 5516 Third Street, Sciotoville. Julio has been an employee of PKS since December, 1952 and is now with the Audit Department. The above likeness of the infant was done by Dick Smith, brother-in-law to Julio Martinez.

## Operation's Secretary On Honeymoon Travel

The Franklin Avenue Church in Portsmouth was the scene for the wedding of Eloise Branham and Stan Doddridge, Saturday, July 16, at 2:30 P. M. Eloise is employed by Peter Kiewit Sons' Co., Operations Unit, in the capacity of secretary. The groom until recently, was employed in the PKS Timekeeping Division.

Upon return from a short honeymoon to Niagara Falls and Canada, the happy couple will return to Portsmouth where they will make their home.

### LABOR RELATIONS

(Continued from page 1)

Cline. Representing the CPFF subcontractors in handling labor relations problems for their respective crafts are: Fred Barth for the Grinnell Corporation, Doug White for Reynolds-Newbery, and A. O. Brockriede for Geo. Koch Sons, Inc.

The relationship presently and previously existing between contractors and employees is obviously a good one. The record speaks for itself.

YOU EITHER stand for something—or you fall for everything.

Ronald H. Boyd, PKS laborer, has proven to be quite a slingshot artist. It seems that the employees who were eating beneath the oak tree at Twin Oaks farm had been trying for weeks to knock a Pine Snake from the top of the branches. Finally Boyd heard of the venture and in one evening made his weapon and brought it to work the next day. One shot was all that was needed to knock the creature down. After he was killed he was stretched out and measured—52 inches. Quite a catch! Shown with Boyd, at left, is teamster Ray Reynolds.

### STEWART AND CHRIST WED

The marriage of Patricia Stewart and Frank E. Christ took place at Lawrenceburg, Indiana, Tuesday, July 9.

The bride is employed by PKS General Accounting, while Frank is an employee of Reynolds-Newbery Timekeeping.

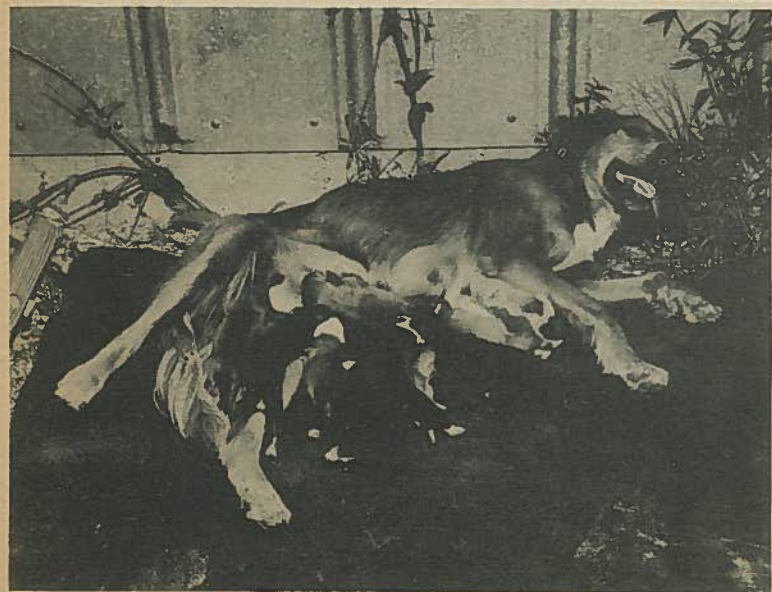

Residence for the newly-weds will be at 2452 Mabert Rd., Portsmouth.

### CIMOTA WOMEN MEET

The Cimota Women's Club of Chillicothe is scheduled to meet Tuesday, August 9, at 7:30 P. M. at the Jane Lee Tea Room.

### BUS SERVICE DISCONTINUED

Greyhound bus service between Portsmouth and the project was discontinued Friday, July 22.

WHAT A BIRTH ANNOUNCEMENT THIS WOULD MAKE! "Momma" Collie (?), the adopted pet of Reynolds-Newbery Line Department, gave birth a few days ago to a litter of twelve puppies and is doing nicely with her new family. One puppy died shortly after birth due to crowded conditions in her barrel home, but since moving to more spacious surroundings she proudly cooperates in the mass satisfaction of the survivors while they seek out their noon meal. "Momma" has been housed, fed, and cared for by R-N Linemen and office personnel since she arrived on the scene about fourteen months ago.

W. A. "Bill" Shelleda, formerly of the Grinnell Corporation, is the proud owner of one of the "best recreation crafts" on Rocky Fork Lake near Hillsboro. Tied on the inlet of the south beach at the lake is "The Isle of Man" which Bill and his wife, Johanna, and several project friends constructed. Those who assisted in the building of the huge craft were George Kosko, John Norton, Fred Barth, (who was known as the "shore-line superintendent") and George Pyatt. The tremendous size of the craft can readily be seen in the accompanying photograph and it is constructed of scrap 12 x 12's and railroad ties. It is licensed to carry 12 persons. Bill has put a refrigerator, 3 burner stove, kitchen, and bed on the floating house. Normally she flies the "Jolly Roger" but Bill says that when women are aboard a "Battle Axe" is run up. Next year Bill is planning to install a paddle wheel which will permit running the craft all over the lake. The Shelledas' friends visit the lake every weekend and Bill has issued an invitation to all to visit them throughout the summer. Bill has been at the Portsmouth job since May of 1953. Prior to his arrival here he had spent 20 of the past 29 years on foreign soils. He met his wife Johanna in Germany and she came over from Landshut, Germany, to marry him on December 23, 1953. The couple are shown in the photo above with the children of project employees.
